## ULTIMATE GDPR & CCPA PLUGIN

### 1.1 General Information

Thank you for purchasing Ultimate GDPR & CCPA Compliance Toolkit for WordPress (Ultimate GDPR & CCPA) Plugin! We're very pleased that you have chosen our plugin to extend your website. We're doing our best not to disappoint you! Before you get started, please check out these documentation pages. Ultimate General Data Protection Regulation (Ultimate GDPR & CCPA) can only be used with WordPress and we assume that you already have it installed and ready to go. If you don't, please see [WordPress Codex](#) to get started.

### 1.2 Requirements

Before using Ultimate GDPR & CCPA Compliance Toolkit for WordPress (Ultimate GDPR & CCPA), please meet the following requirements:

- Essentials to run WordPress – Read more about [WordPress Minimum Requirements](#) – in case any doubts regarding the server, contact your host provider.
- Latest version of WordPress, which you can [download here](#).
- Create secure [FTP](#) and Database.

### 1.3 Installation

In our guide, we will show you step by step instructions on how to install our plugin. Below you will find two ways how to install a WordPress plugin.

#### 1.3.1 Installation via Administration Panel

If Ultimate GDPR & CCPA Compliance Toolkit for WordPress (Ultimate GDPR & CCPA) files are downloaded from your Themeforest account, you can start an installation using WordPress administration panel.

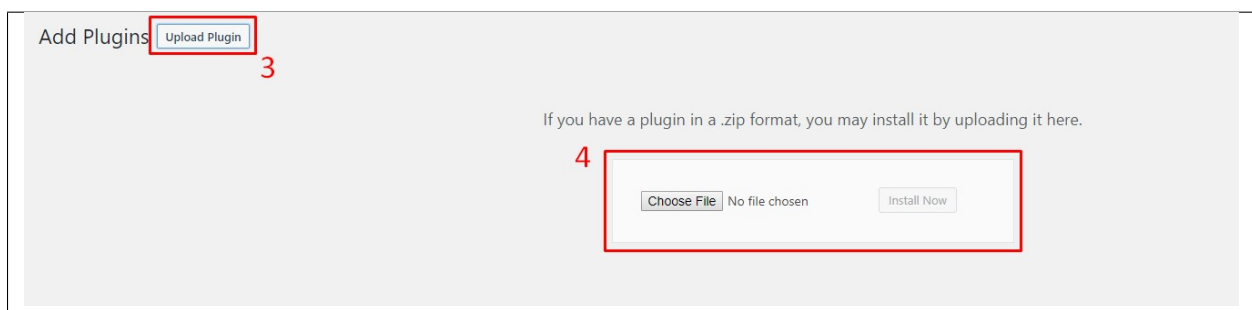

- **Step 1** - Once you've logged in to your administration panel, go to *My Sites > Network Admin*.

- **Step 2** - Then click on *Plugins > Add New*, you will be directed to a page where you can choose available themes.

- **Step 3** - Once directed to the page, on the upper left side of the screen click on *Upload Plugin* button.
- **Step 4** - Choose the *ct-ultimate-gdpr.zip* file from your computer, then click *Install Now*.

- **Step 5** - After this, you will see the success message with a link to activate the plugin or return to plugin installer.

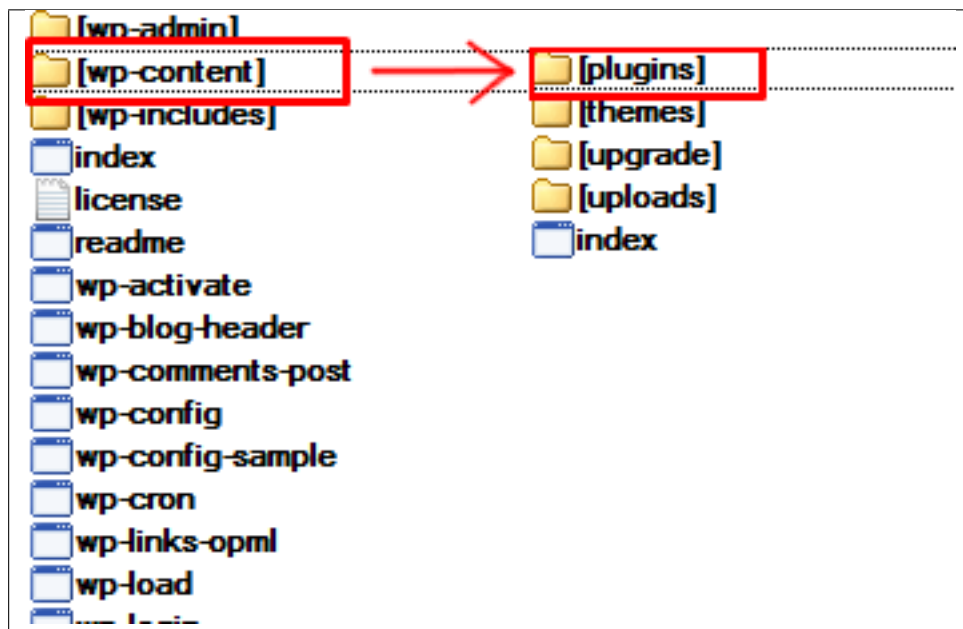

### Common Install Error: Are You Sure You Want To Do This?

If you get the following question message when installing *ct-ultimate-gdpr.zip* file via WordPress, it means that you have an upload file size limit. *Install the theme via FTP* or call your hosting company and ask them to increase the limit.

### 1.3.2 Installation via FTP

To install Ultimate GDPR & CCPA Compliance Toolkit for WordPress (Ultimate GDPR & CCPA) via FTP, follow steps below:

- **Step 1** – Unarchive *ct-ultimate-gdpr.zip* file
- **Step 2** – Access your host web server using FTP client
- **Step 3** – Find directory *wp-content > plugins*
- **Step 4** – Put folder Ultimate GDPR & CCPA Compliance Toolkit for WordPress (Ultimate GDPR & CCPA) in directory *wp-content > plugins*

Learn more:

- [WordPress Codex – FTP clients](#)

## 1.4 Support

All of our items comes with free support. Free support is limited to questions regarding the themes features or problems. We provide premium support for code customisation or third-party plugins.

---

**Note:** Our support hours: **10:00 AM – 6:00 PM UTC +1 on Monday to Friday.**

---

### 1.4.1 Standard Support Support

For issues and concerns, you can reach us through these support methods:

- **E-mail** – [support@createit.pl](mailto:support@createit.pl)
- **Help Desk** – Click [here](#) to go to our support website. Just click on the *Submit Ticket* button and follow instructions to create a ticket.
- **Forum** – Comment/Post on the product you have issues/queries in [ThemeForest](#) or [CodeCanyon](#) websites.

#### **Before You Post in a Forum**

We urge you to follow the steps below, before you post a new topic on the forum, to speed up your request. It's in everyone's interest and will benefit in making the entire forum more efficient:

- **Step 1** – Always check the Documentation and the Knowledgebase Section. Most questions are already answered in those areas.
- **Step 2** – If your question hasn't been brought up on the forum, please post a new topic. Always be as specific as possible. Creating a topic requires entering the live URL to your home page or page that shows the issue in question. It also has bars for WP and FTP login info, which aren't required, however, providing us with your login information can save a lot of time for both of us. Login credentials are securely stored and accessible only by our support staff.
- **Step 3** – We usually answer questions in 24 hours on working days. However, if you don't get any answer within 72 hours bump up your question or send us an e-mail.

For *all support methods*, you will receive confirmations and replies on your queries through e-mail or by tracking your ticket which you will also get through e-mail. To track your ticket, please [click here](#).

Once we reply to your query, *each ticket will be open for 7 days* without a reply from you. On the 6th day without a reply, an e-mail will be sent to notify you of the ticket's inactivity. To make the ticket active again, you simply need to reply or follow the steps in the e-mail. If you won't make the ticket active within 7 days, on the 8th day the ticket will automatically be closed.

### 1.4.2 Premium Support

We can create your website from scratch, redesign it or just extend the current ones. For more information, please take a look at [our website](#). Typical issues covered by Premium Support:

- Custom CSS
- Support for third party software and plug-ins
- WordPress Installation with Theme configuration
- Server configuration
- Site structure modifications
- Graphic adjustments, etc.
- WordPress general howto's
- Shopify general howto's

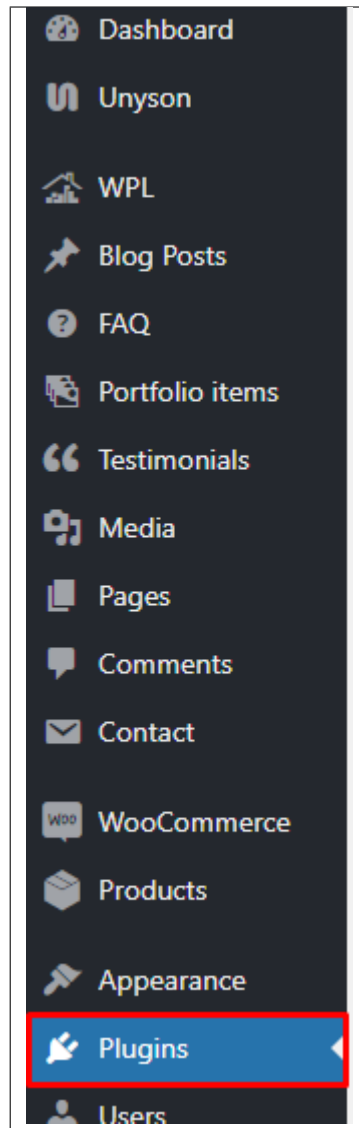

## HOW TO

### 2.1 Activation

To activate the Ultimate GDPR & CCPA Compliance Toolkit for WordPress (Ultimate GDPR & CCPA), follow these steps:

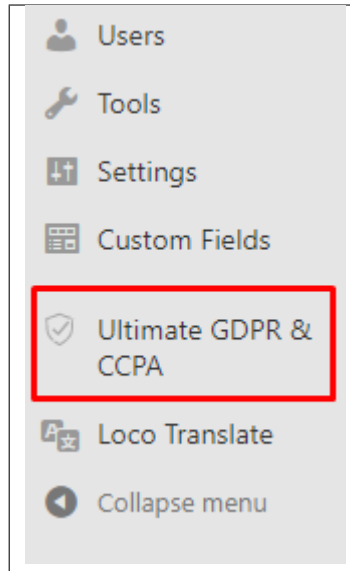

- **Step 1** - In your wordpress dashboard, navigate to *Plugins*.

- **Step 2** - Locate the *Ultimate GDPR & CCPA Compliance Toolkit for WordPress (Ultimate GDPR & CCPA)* from the list of plugins. Click on Activate, then wait for the plugin to load and activate.

- **Step 3** - Once *Ultimate GDPR & CCPA Compliance Toolkit for WordPress (Ultimate GDPR & CCPA)* is activated, you will see *Ultimate GDPR & CCPA* in the dashboard.

- **Step 4** - You can now use the plugin.

## 2.2 Use and Features

---

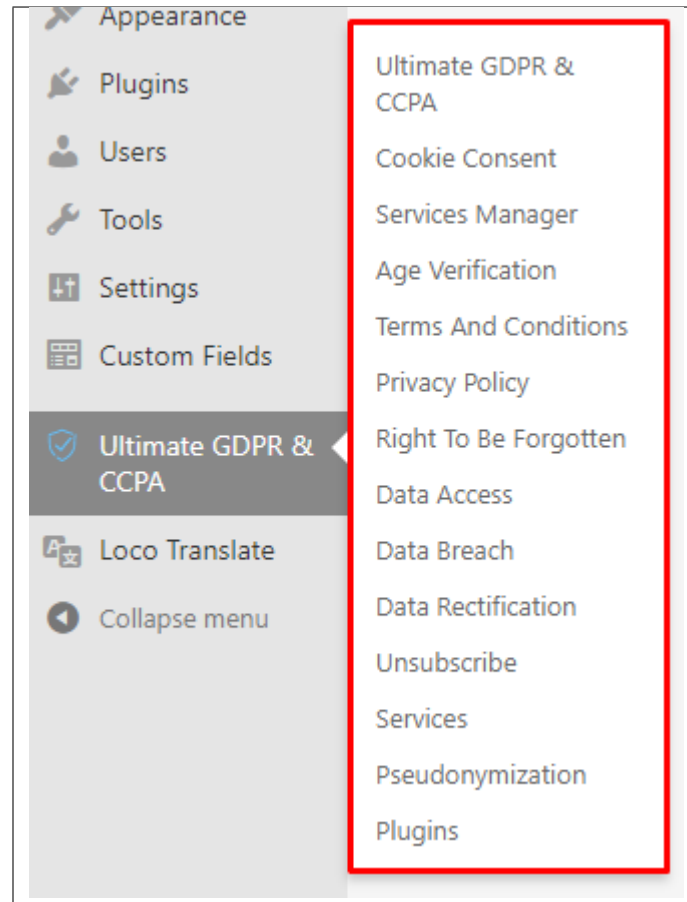

**Note:** Before using this plugin, please read the explanation for the use of this plugin in:

- [European Commission – Data Protection](#)
  - [Original Consilium Europa Regulation document](#)
  - [GDPR INFO](#)
- 

GDPR standardizes data protection law across all 28 EU countries and imposes strict new rules on controlling and processing personally identifiable information (PII). From 25 May 2018 every website collecting data from EU citizens must need the GDPR requirements.

**Use and its Features are as follows:**

In your wordpress dashboard, navigate to *GDPR & CCPA*:

### 2.2.1 Ultimate GDPR

Ultimate GDPR & CCPA  
Settings

Introduction

Compatibility

The GDPR was approved and adopted by the EU Parliament in April 2016. The regulation will take effect after a two-year transition period and, unlike a Directive it does not require any enabling legislation to be passed by government; meaning it will be in force May 2018.

The GDPR not only applies to organisations located within the EU but it will also apply to organisations located outside of the EU if they offer goods or services to, or monitor the behaviour of, EU data subjects. It applies to all companies processing and holding the personal data of data subjects residing in the European Union, regardless of the company's location.

This plugin will create a form where users can request access to or deletion of their personal data, stored on your website. It is also possible to:

1. Create a custom cookie notice and block all cookies until cookie consent is given.
2. Set up redirects for your Terms and Conditions and Privacy Policy pages until consent is given.
3. Browse user requests for data access/deletion and set custom email notifications.
4. Send custom email informing about data breach to all users which left their email at your site.
5. Automatically add consent boxes for various forms on your website.
6. Pseudonymize some of user data stored in database.
7. Check currently activated plugins for GDPR compliance.

To start, browse through settings. Then, create a new page with shortcode: `[ultimate_gdpr_myaccount]`

**Available Shortcodes**

User Settings: `[ultimate_gdpr_myaccount]`

Privacy Policy Button: `[ultimate_gdpr_policy_accept]`

Terms and Conditions Button: `[ultimate_gdpr_terms_accept]`

Cookie Popup Link: `[ultimate_gdpr_cookie_popup]Link`  
`[ultimate_gdpr_cookie_popup]`

Display Cookies List: `[render_cookies_list]`

Protect Content: `[ultimate_gdpr_protection level=4]content`  
`[ultimate_gdpr_protection]`

Privacy Center: `[ultimate_gdpr_center myaccount_page=15 contact_page=18 icon_color=#e03131]`

**System Requirements:**

PHP Version: 5.4+

Memory Limit: 64 MB

Disk Space: 10 MB

**License**

Envato key

- **Introduction**
  - This will show a summary of the use and purpose of GDPR & CCPA and features of the GDPR & CCPA Plugin.
- **Available Shortcodes**
  - Shortcodes that can be used to show features of GDPR & CCPA.
- **System Requirements**
  - System requirements for the plugin to work.
- **Forms skin**
- **Export/import options**
  - **Export Plugin Settings** - Export current plugin settings into a file. It can be imported to another website with GDPR & CCPA plugin.

- **Import Plugin Settings** - Import a file that have GDPR & CCPA plugin settings. The current setting of the GDPR & CCPA plugin will be overwritten.
- **Export Services** - Export services from service manager.
- **Import Services to Service Manager**- Import a file that has services saved.

THIS WEBSITE WILL

- ✓ Essential: Remember your cookie permission setting
- ✓ Essential: Allow session cookies
- ✓ Essential: Gather information you input into a contact forms newsletter and other forms across all pages
- ✓ Essential: Keep track of what you input in shopping cart
- ✓ Essential: Authenticate that you are logged into your user account
- ✓ Essential: Remember language version you selected
- ✓ Functionality: Remember social media settings
- ✓ Functionality: Remember selected region and country

THIS WEBSITE WON'T

- ✗ Analytics: Keep track of your visited pages and interaction taken
- ✗ Analytics: Keep track about your location and region based on your IP number
- ✗ Analytics: Keep track on the time spent on each page
- ✗ Analytics: Increase the data quality of the statistics functions
- ✗ Advertising: Tailor information and advertising to your interests based on e.g. the content you have visited before. (Currently we do not use targeting or targeting cookies)
- ✗ Advertising: Gather personally identifiable information such as name and location

List of features

SAVE & CLOSE

- **Save Changes** - Button to save all the added/changed details in Cookie Consent.
- **Download consents log** - Button for the admin to download the consent logs of cookie consents. The downloaded file will be in a .txt format.
- **Scan for cookies** - Clicking this button will scan the site of the cookies that are used.

### 2.2.3 Services Manager

This is where the cookies that are detected are saved. You can change the cookies's details here. You can also make a customized cookie to be blocked from your site.

**ID**

**Service name**

**Script names**  
*Please input comma separated names of cookie creating scripts*

**Cookie names**  
*Please input comma separated cookie names*

**Type of cookie**

**First or Third party?**  

▼

**Can be blocked?**  
☐

**Session or Persistent?**  

▼

**Expiry Time**

**Purpose**

**Do you want to activate this service?**  
☐

- **Title** - Used only for admin user to navigate through services.
- **Service name** - Name of the service which will be displayed in table created using `[render_cookies_list]` shortcode.
- **Script names** - Comma separated names of java-script scripts which are to be blocked, to prevent creation of unwanted cookies.
- **Cookie names** - Comma separated names of cookies which are to be blocked. It's important use actual name of cookie, not name of service.
- **Type of cookie** - Pick the group the cookies belong.
- **First or Third party?** - Option to choose if the cookie is created by the site or by a 3rd party.
- **Can be blocked?** - Option for the cookie to be blocked.
- **Session or Persistent?** - If cookie is deleted when session ends, or if it has set expiry date.
- **Expiry Time** - Fill only if cookie is Persistent.
- **Purpose** - Purpose of the cookie.
- **Is active?** - Option to activate or deactivate. Only services which are active, are being blocked.

### What Cookies are used on your website

---

**Note:** Functionality available since version 1.4

---

You can render the table with all cookies collected by your website with simple shortcode: `[render_cookies_list]`

Active cookies will be displayed in a table, like the following:

Cookie names	Type of cookie	First or Third party	Session or Persistent	Expiry Time	Purpose
__cfduid	Advertising		persistent	23 May 2019 12:06:07	
ss	Advertising		session		
tawkUUID	Advertising		persistent	19 Nov 2018 12:06:07	
NID	Advertising		persistent	22 Nov 2018 12:06:09	
__utma, __utmb, __utmc, __utmt, __utmz, __ga, __gat, __gid	Analytics	third_party			
act, wd, xs, datr, sb, presence, c_user, fr, pl, reg_ext_ref, reg_fb_gate, reg_fb_ref	Advertising	third_party			
km_ai, km_lv, km_vs, __atuvs, __atuvc, uvc	Functionality	third_party			

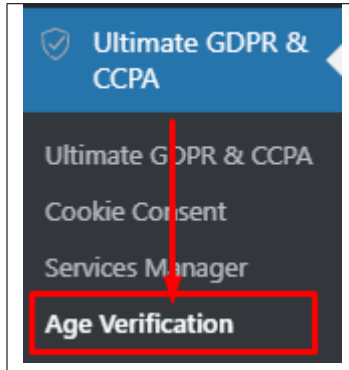

---

**Note:** Your website should be publicly accessible to correctly detect all cookies that are used on it

---

## 2.2.4 Age Verification

**Note:** This option work only for the Box style: **none** which can be set in the **Ultimate GDPR & CCPA > Preferences > Popup box – Box style**

---

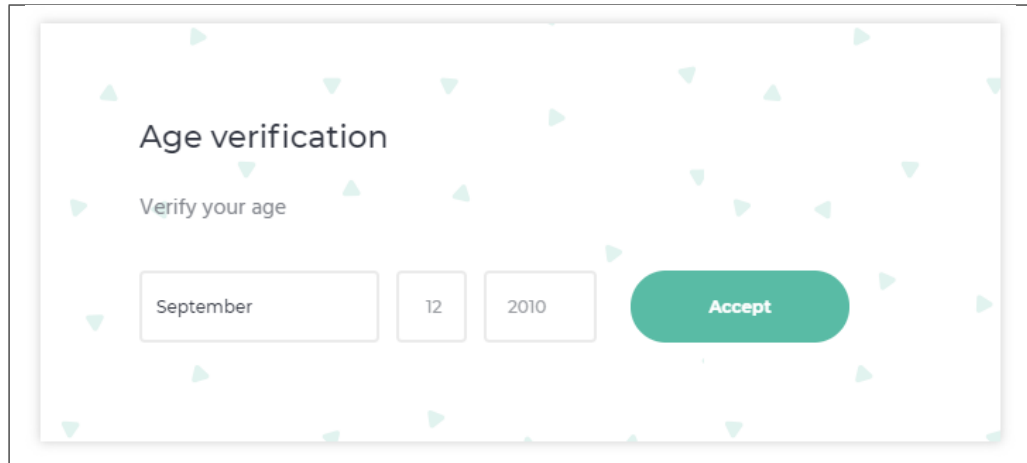

- **Button shape** – There are two types of button shapes available
  - Rounded
  - Squared
- **Button background color** – Allow admin to choose the color of the button.
- **Button text color** – Allow admin to choose the color of the button

### Popup box

- **Box style** - Box style of the cookie consent popup.
  - Red Velvet

A screenshot of an "Age verification" popup box. The box has a light gray background and a thin black border. At the top, the text "Age verification" is displayed in a bold, dark gray font. Below it, the text "Verify your age" is displayed in a smaller, lighter gray font. The form contains three input fields: the first is a dropdown menu showing "September", the second is a text field containing "12", and the third is a text field containing "2010". To the right of these fields is a prominent red button with the word "Accept" in white text.

Age verification

Verify your age

September 12 2010 Accept

This image shows a dark blue background with white text. The title 'Age verification' is at the top, followed by the instruction 'Verify your age'. Below this are four input fields: a dropdown menu showing 'September', a text box with '12', a text box with '2010', and an orange 'Accept' button.

– Blue Velvet

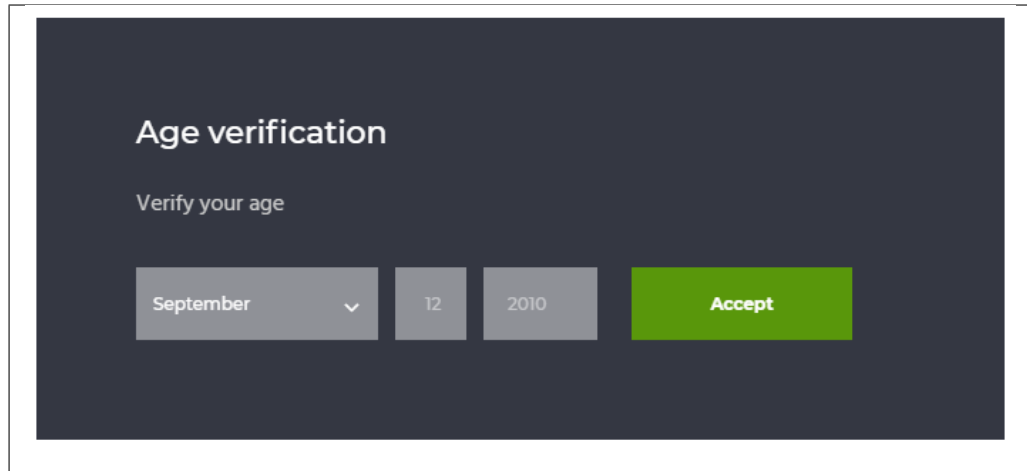

Age verification

Verify your age

September 12 2010 Accept

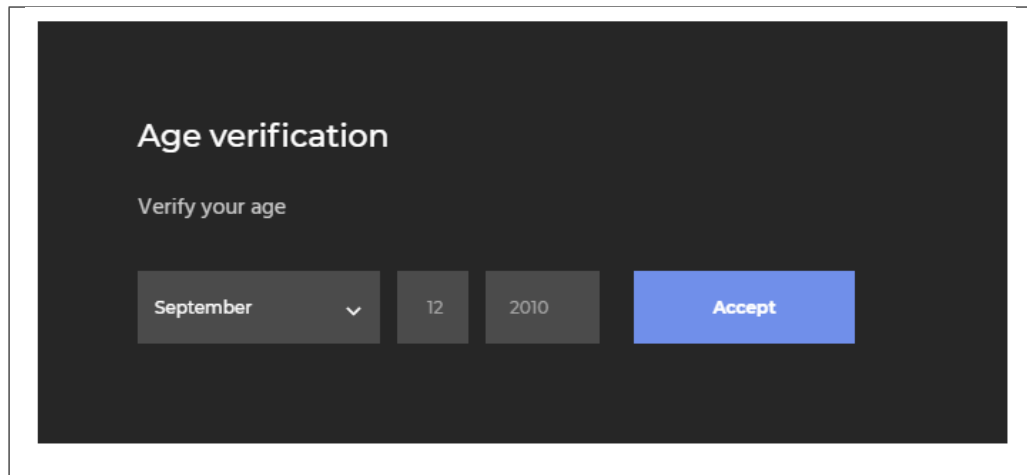

This image shows a medium blue background with white text. The title 'Age verification' is at the top, followed by the instruction 'Verify your age'. Below this are four input fields: a dropdown menu showing 'September', a text box with '12', a text box with '2010', and a white 'Accept' button with blue text.

– Matcha

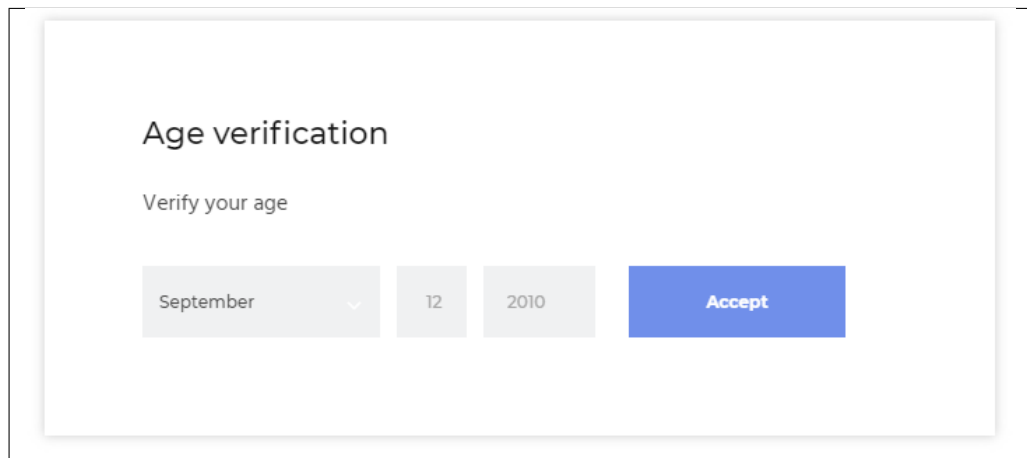

The image shows a dark-themed age verification form. At the top, the text "Age verification" is displayed in a light color. Below it, the instruction "Verify your age" is shown. The form consists of three input fields: a dropdown menu showing "September", a text field containing "12", and a text field containing "2010". To the right of these fields is a prominent green button labeled "Accept".

– Classic Dark

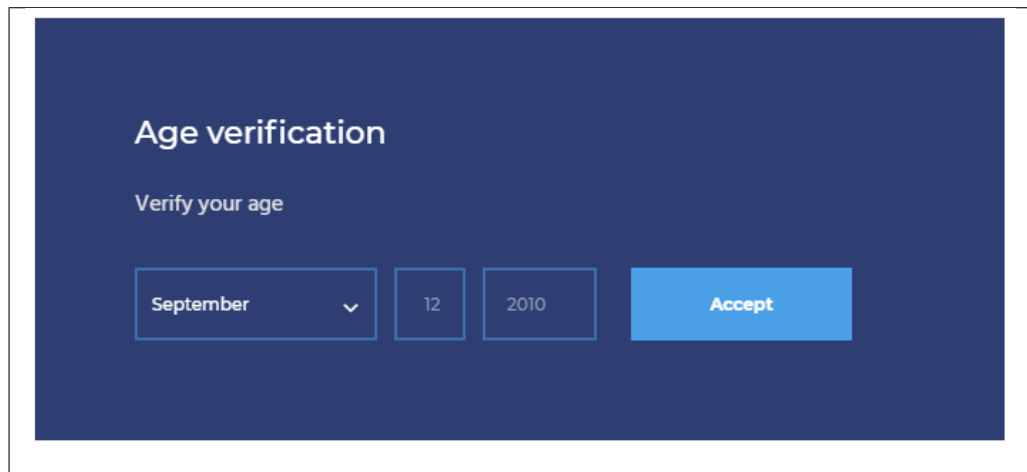

The image shows a light-themed age verification form. At the top, the text "Age verification" is displayed in a dark color. Below it, the instruction "Verify your age" is shown. The form consists of three input fields: a dropdown menu showing "September", a text field containing "12", and a text field containing "2010". To the right of these fields is a prominent blue button labeled "Accept".

– Classic Light

The image shows a light-themed age verification form, similar to the one above, but with a subtle drop shadow effect. It features the text "Age verification" and "Verify your age", followed by three input fields (month, day, year) and a blue "Accept" button.

– Oreo

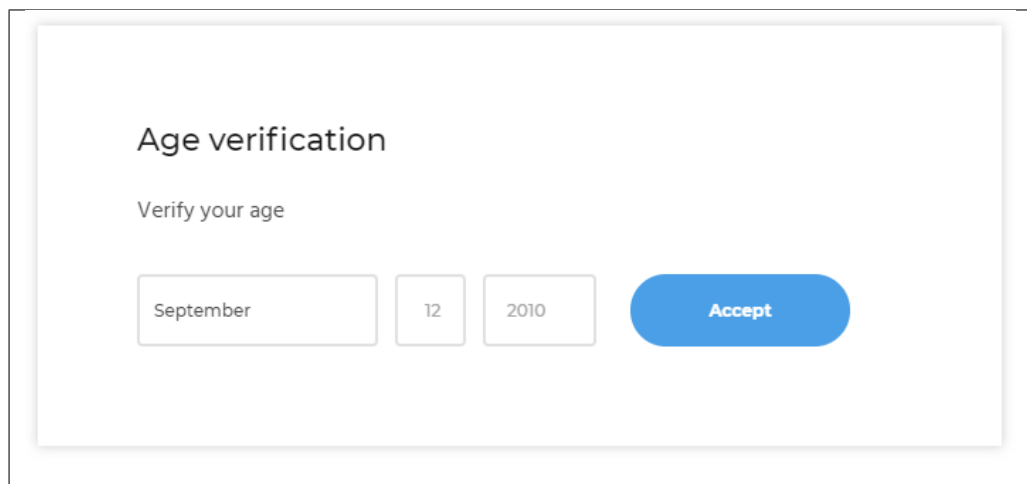

Age verification

Verify your age

September 12 2010 Accept

The Oreo theme features a dark blue background for the age verification form. The title 'Age verification' is in white. Below it, 'Verify your age' is also in white. The form consists of three input fields: a dropdown menu showing 'September' with a downward arrow, a text field with '12', and a text field with '2010'. To the right of these fields is a bright blue 'Accept' button with white text.

– Blue Shortbread

Age verification

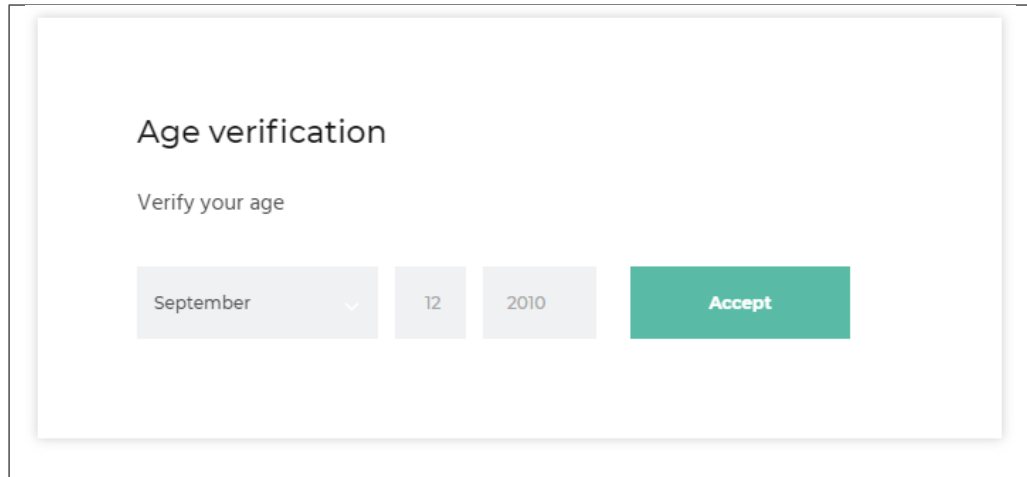

Verify your age

September 12 2010 Accept

The Blue Shortbread theme features a light gray background for the age verification form. The title 'Age verification' is in dark gray. Below it, 'Verify your age' is also in dark gray. The form consists of three input fields: a text field with 'September', a text field with '12', and a text field with '2010'. To the right of these fields is a blue 'Accept' button with white text.

– Light Mint

- Mint

The image shows a rectangular age verification popup with a mint green background. At the top, the text "Age verification" is displayed in white. Below it, "Verify your age" is also in white. The form contains three light green input fields: the first has a dropdown menu showing "September", the second contains the number "12", and the third contains the year "2010". To the right of these fields is a dark blue rounded button with the word "Accept" in white.

- None (example

The image shows a rectangular age verification popup with a teal background. At the top, the text "Age verification" is displayed in white. Below it, "Verify your age" is in a light red color. The form contains three dark grey input fields: the first has a dropdown menu showing "July", the second contains the number "14", and the third contains the year "2020". To the right of these fields is a red rounded button with the word "Accept" in yellow.

- **Box shape**- Shape of the buttons in the age verification popup.
- **Background color** - Background color of the age verification box.
- **Background image** – Background image which can be set as a part of the background
- **Text color** - Text color of the text in the button.

#### Custom style CSS

- **Custom style CSS** - Custom CSS style for the Age verification popup.

## 2.2.5 Terms and Conditions

Here you will set a page as the Terms and Conditions page, set conditions, and set the page where to redirect.

Terms and Conditions

Instructions

1. Place `[ultimate_gdpr_terms_accept]` shortcode on your existing Terms and Conditions page to add an accept button.  
2. Select Terms and Conditions page below, so users can be redirected there to give their consent.

Require logged in users to accept Terms and Conditions (redirect)

Enable Disabled

Require not logged in users/guests to accept Terms and Conditions (redirect)

Enable Disabled

Page with existing Terms and Conditions

Page to redirect to after Terms accepted

Last visited page

Shortcode Button Styling

User notification email subject: [Ultimate GDPR] Your data has been forgotten

User notification email message:

Add Media

Visual Text

Formats: Paragraph B I [List Icons]

[Ultimate GDPR] Your data has been forgotten

- **Admin email to send new request notifications to** - Where the email for the request is sent.
- **User notification email subject** - Title of the Email sent for the request.
- **User notification email message** - Content of the Email that is sent for the request.
- **Set custom URL to page containing Ultimate GDPR & CCPA shortcode for e-mail confirmations (or leave empty for autodetect)** - URL link to the page for e-mail confirmation.
- **[bbPress] Enter the existing user's email whom the posts will be reassigned to (or leave empty to delete them when forgetting)** - Email for whom the posts will be re assigned to.
- **Right To Be Forgotten requests list** - List of users that sent the request.

This is the front end form:

**PERSONAL DATA ACCESS** **FORGET ME** **DATA RECTIFICATION**

Below you can browse services which collect your personal data on this website. Check services you wish to be forgotten by. This will send a request to website admin. You will be notified by e-mail once this is done.

☐ **WP Comments**  
WordPress Comments are data entered by users in comments

☐ **WordPress Posts**  
WordPress posts author data

☐ **WP User Data**  
WordPress user data stored as user meta data in database

**Email:**

☐ I consent to my email being collected in order to process this request. See Privacy Policy page for more information.

**SUBMIT**

In the front end form, the user can choose which personal data on the site can be forgotten. With this, an email request will be sent to the website admin once the request is Submitted.

---

**Note:** The email that the user enters in the form is the email where the user will get his reply or notification for the request.

---

This is an sample Email for the request:

---

**Note:** To add the front end form on a page, create a page and add this shortcode : `[ultimate_gdpr_myaccount]`

---

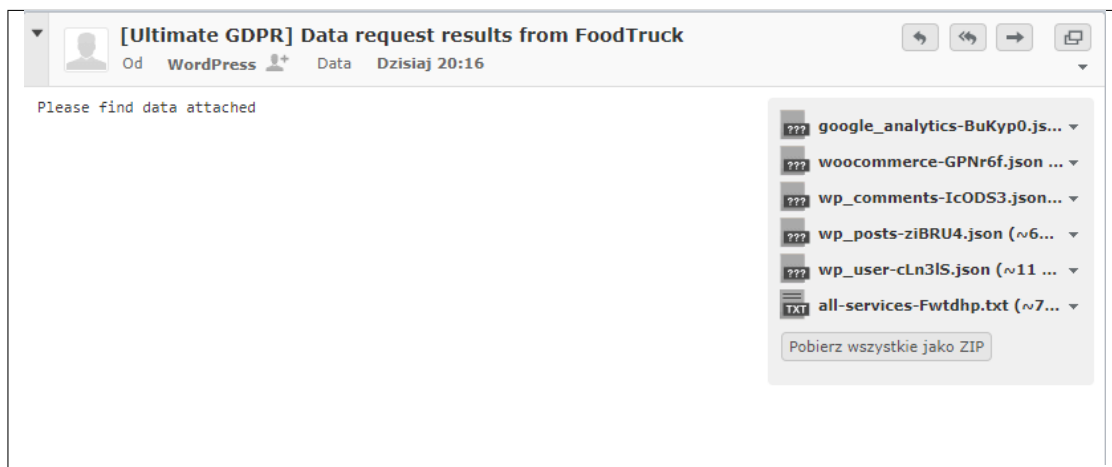

The screenshot shows a web form titled 'PERSONAL DATA ACCESS' with two alternative tabs: 'FORGET ME' and 'DATA RECTIFICATION'. Below the tabs, a message states: 'Below you can request having your personal data collected by this website sent to you in an e-mail.' There is an 'Email:' label followed by a text input field. Below the input field is a checkbox with the text: 'I consent to my email being collected in order to receive my requested data. See Privacy Policy page for more information.' At the bottom left of the form is a black 'SUBMIT' button.

---

**Note:** The email that the user enters in the form is the email where the user will get his reply or notification for the request.

---

This is an sample Email for the request:

---

**Note:** To add the front end form on a page, create a page and add this shortcode : `[ultimate_gdpr_myaccount]`

---

### 2.2.9 Data Breach

- **[Mailerlites] Inject Hide from Forget Me Form** - This function is not applicable for this plugin.

**Mailster:**

- **[Mailster] Name** - What is shown in the Forget Me Form as the Mailster's name.
- **[Mailster] Description** - What is shown in the page to describe the Mailster.
- **[Mailster] Inject consent checkbox to all forms** - Option to add consent check box in all pages with Mailster.
- **[Mailster] Inject consent checkbox as the first field instead of the last** - Option to add the consent checkbox at the first field in the Mailster.
- **[Mailster] Inject consent checkbox to unsubscribe forms** - Option to add the consent checkbox in all Mailster's unsubscribe forms.
- **[Mailster] Hide from Forget Me Form** - Hide from Forget Me Form -\*\* Option to hide it from Forget Me Form.

**Metorik Helper:**

- **[Metorik Helper] Inject consent checkbox to all forms** - Option to add consent check box in all pages with Metorik Helper.
- **[Metorik Helper] Inject Hide from Forget Me Form** - This function is not applicable for this plugin.

**Newsletter:**

- **[Newsletter] Inject consent checkbox to all forms** - Option to add consent check box in all pages with Newsletter.
- **[Newsletter] Inject consent checkbox as the first field instead of the last** - Option to add the consent checkbox at the first field in the Newsletter.
- **[Newsletter] Inject Hide from Forget Me Form** - This function is not applicable for this plugin.

### Ninja-Forms:

- **[Ninja-Forms] Name** - What is shown in the Forget Me Form as the Ninja-Forms' name.
- **[Ninja-Forms] Description** - What is shown in the page to describe the Ninja-Forms.
- **[Ninja-Forms] Inject consent checkbox to all forms** - Option to add consent check box in all pages with Ninja-Forms.
- **[Ninja-Forms] Inject Hide from Forget Me Form** - Hide from Forget Me Form -\*\* Option to hide it from Forget Me Form.

### Quform:

- **[Quform] Name** - What is shown in the Forget Me Form as the Quform's name.
- **[Quform] Description** - What is shown in the page to describe the Quform.
- **[Quform] Inject consent checkbox to all forms** - Option to add consent check box in all pages with Quform.
- **[Quform] Inject consent checkbox as the first field instead of the last** - Option to add the consent checkbox at the first field in the Quform.
- **[Quform] Inject Hide from Forget Me Form** - Hide from Forget Me Form -\*\* Option to hide it from Forget Me Form.

### Ultimate Member:

- **[Ultimate Member] Inject consent checkbox to all forms** - Option to add consent check box in all pages with Ultimate Member.
- **[Ninja-Forms] Inject Hide from Forget Me Form** - This function is not applicable for this plugin.

### Woocommerce:

- **[Woocommerce] Description** - What is shown in the page to describe the Woocommerce.
- **[Woocommerce] Inject consent checkbox to order fields** - Option to add consent check box in all pages with Woocommerce.
- **[Woocommerce] Inject consent checkbox to account forms** - Option to add consent checkbox in Woocommerce register form.
- **[Woocommerce] Inject consent checkbox to checkout** - Option to add consent checkbox in Woocommerce checkout page.
- **[Woocommerce] Additional checkout consent label** - Text added here will be shown in the additional consent checkbox.
- **[Woocommerce] Inject additional consent checkbox to checkout** - Option to add consent check box in checkout page (this consent isn't required to be accepted by the user).
- **[Woocommerce] Inject Hide from Forget Me Form** - This function is not applicable for this plugin.

**Wordfence:**

- **[Wordfence] Block Wordfence cookies when a user doesn't accept Functionality cookies**
- **[Wordfence] Inject Hide from Forget Me Form** - This function is not applicable for this plugin.

**WP Comments:**

- **[WP Comments] Name** - What is shown in the Forget Me Form as the WP Comments's name.
- **[WP Comments] Description** - What is shown in the page to describe the WP Comments.
- **[WP Comments] Inject consent checkbox to comments fields** - Option to add consent check box in all pages with WP Comments.
- **[WP Comments] Hide from Forget Me Form** - Option to hide it from Forget Me Form.

**wpForo:**

- **[wpForo] Name** - What is shown in the Forget Me Form as the wpForo's name.
- **[wpForo] Description** - What is shown in the page to describe the WP Comments.
- **[wpForo] Inject consent checkbox to all forms** - Option to add consent check box in all pages with wpForo.
- **[wpForo] Hide from Forget Me Form** - Option to hide it from Forget Me Form.

**WP Job Manager:**

- **[WP Job Manager] Name** - What is shown in the Forget Me Form as the WP Job Manager's name.
- **[WP Job Manager] Description** - What is shown in the page to describe the WP Job Manager.
- **[WP Job Manager] Hide from Forget Me Form** - Option to hide it from Forget Me Form.

**WordPress Posts:**

- **[WordPress Posts] Name** - What is shown in the Forget Me Form as the WordPress Posts's name.
- **[WordPress Posts] Description** - What is shown in the page to describe the WordPress Posts.
- **[WordPress Posts] Hide from Forget Me Form** - Option to hide it from Forget Me Form.

**WP User data:**

- **[WP User data] Name** - What is shown in the Forget Me Form as the WP User data's name.
- **[WP User data] Description** - What is shown in the page to describe the WP User data.
- **[WP User] Inject consent checkbox to User network signup form fields**
- **[WP User] Inject consent checkbox to User register form fields**
- **[WP User] Inject consent checkbox to lost password form fields**
- **[WP User] Hide from Forget Me Form** - Option to hide it from Forget Me Form.

### YITH Woocommerce Wishlist:

- **[YITH Woocommerce Wishlist] Name** - What is shown in the Forget Me Form as the YITH Woocommerce Wishlist's name.
- **[YITH Woocommerce Wishlist] Description** - What is shown in the page to describe YITH Woocommerce Wishlist.
- **[YITH Woocommerce Wishlist] Hide from Forget Me Form** - Option to hide it from Forget Me Form.

### Youtube:

- **[Youtube] Remove youtube iframes until Necessary cookies accepted**
- **[Youtube] Inject Hide from Forget Me Form** - This function is not applicable for this plugin.

---

**Note:** If you would like to add the checkbox for consent in a different place than the one provided by the GDPR & CCPA Plugin, click on this [link](#) for a sample on how to do it. The sample is using Contact Form 7 but you can do this with other forms.

---

This is how it would look on the page.

PERSONAL DATA ACCESS   **FORGET ME**   DATA RECTIFICATION

Below you can browse services which collect your personal data on this website. Check services you wish to be forgotten by. This will send a request to website admin. You will be notified by e-mail once this is done.

☐ **Events Manager**  
Events Manager gathers data entered by users in booking order forms

☐ **WP Comments**  
WordPress Comments are data entered by users in comments

☐ **WordPress Posts**  
WordPress posts author data

☐ **WP User Data**  
WordPress user data stored as user meta data in database

### 2.2.13 Pseudonymization

Here you can set which information are encrypted.

### Pseudonymization

#### Warning

This feature is experimental and may lead to irreversible data lost! After encryption, it may be impossible for anyone to decrypt your data.

#### Instructions

Pseudonymization feature allows you to encrypt some of the data stored in the database. That way, if anyone got access to your database, the user's data would be pseudonymized. Database contents are permanently encrypted and can be decrypted on the fly when accessed by users. You can also permanently decrypt all your contents.

How to use:

1. Make a backup
2. Select which data to encrypt
3. (Optionally) Select 'automatically encrypt new data' for continuous encryption of all incoming data
4. Click 'Save changes'
5. (Optionally) Click 'Encrypt selected' to encrypt all current data which has not been yet encrypted

Automatically encrypt new data

Automatically decrypt all data on the fly (if you have anything encrypted, this is recommended)

Select data to encrypt

[Woocommerce] Pseudonymize first and last name

[Woocommerce] Pseudonymize address information

[Woocommerce] Pseudonymize billing email

[WP User Data] Pseudonymize first and last name

[WP Simple Paypal Shopping Cart] Pseudonymize user order data

Press 'Save changes' before pressing encryption buttons if you changed any options

Save Changes

**Warning:** This feature is experimental and may lead to irreversible data lost! After encryption, it may be impossible for anyone to decrypt your data. Read Instructions first, before setting the encryption.

- **Automatically encrypt new data** - Option to automatically encrypt new data inputted in the site.
- **Automatically decrypt all data on the fly (if you have anything encrypted, this is recommended)** - Option to automatically decrypt all data inputted in the site to the database.
- **Select data to encrypt** - Select which data are encrypted in the site.
  - **[Woocommerce] Pseudonymize first and last name** - Option to encrypt the first and last name when using woocommerce.
  - **[Woocommerce] Pseudonymize address information** - Option to encrypt the address information when using woocommerce.
  - **[Woocommerce] Pseudonymize billing email** - Option to encrypt the billing email when using woocommerce.
  - **[WP User data] Pseudonymize first and last name** - Option to encrypt the first and last name when using

WP user data.

- **[WP Simple Paypal Shopping Cart] Pseudonymize user order data** - Option to encrypt the user order data when using WP Simple Paypal Shopping Cart.

### 2.2.14 Plugins

Here you can see which plugins are compatible with the GDPR & CCPA plugin.

Plugin	Collects user data	Compatible with Ultimate GDPR
Contact Form 7	Yes	Yes
Ultimate GDPR	Yes	Yes
WooCommerce	Yes	Yes
PolyLang	Probably	No
Custom Sidebars	Probably	No
WPL	Probably	No
Estate Plugin	Unknown	No
WPBakery Page Builder	Unknown	No
Loco Translate	Unknown	No
Max Mega Menu	Unknown	No
Slider Revolution	Unknown	No
Preloader	Unknown	No

## 2.3 Add to Page

These are samples on how to add the Ultimate GDPR & CCPA features and shortcodes.

### 2.3.1 Cookie Consent

**Note:** The plugin can check if the user viewing your site is from European Union by going to **Ultimate GDPR & CCPA > Cookie Consent** and activating/checking **Check if user is from European Union**.

Users that are not from the European Union will not be able to see Ultimate GDPR & CCPA features.

Cookie popup 'read more' button label (leave empty for default)

Cookie popup 'change settings' button label (leave empty for default)

Display cookie popup on all pages ☐

**Check if user is from European Union** ☐

## Other Functions

- **Set the Default Cookie Group**

When the **Change Settings** button is clicked, it will show the Advance cookie setting and the Default Cookie Group selected.

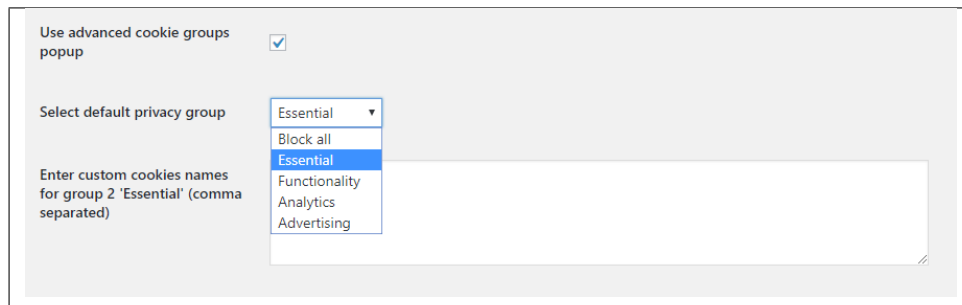

With the slider, you can enable or disable different types of cookies:

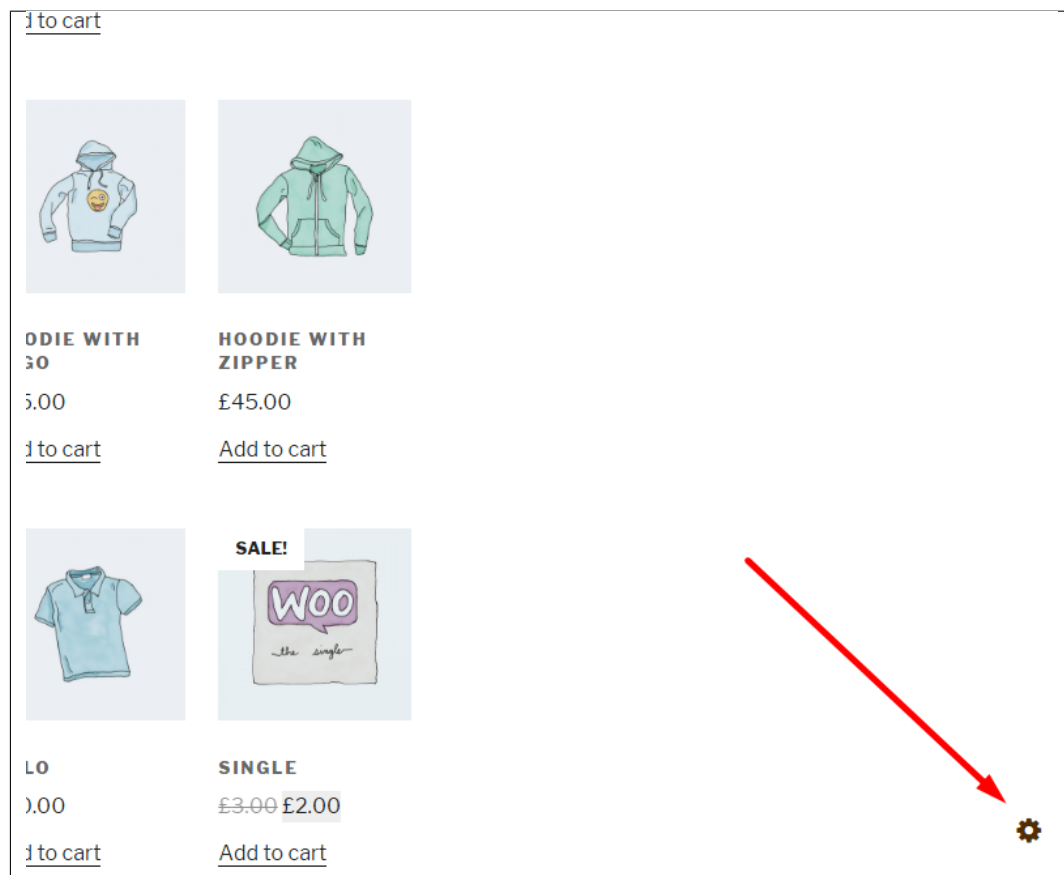

Essential Functionality Analytics Advertising

This website will: This website won't:

You can change the default cookie group in *Ultimate GDPR & CCPA > Cookie Consent > Cookie consent settings > Select default privacy group*

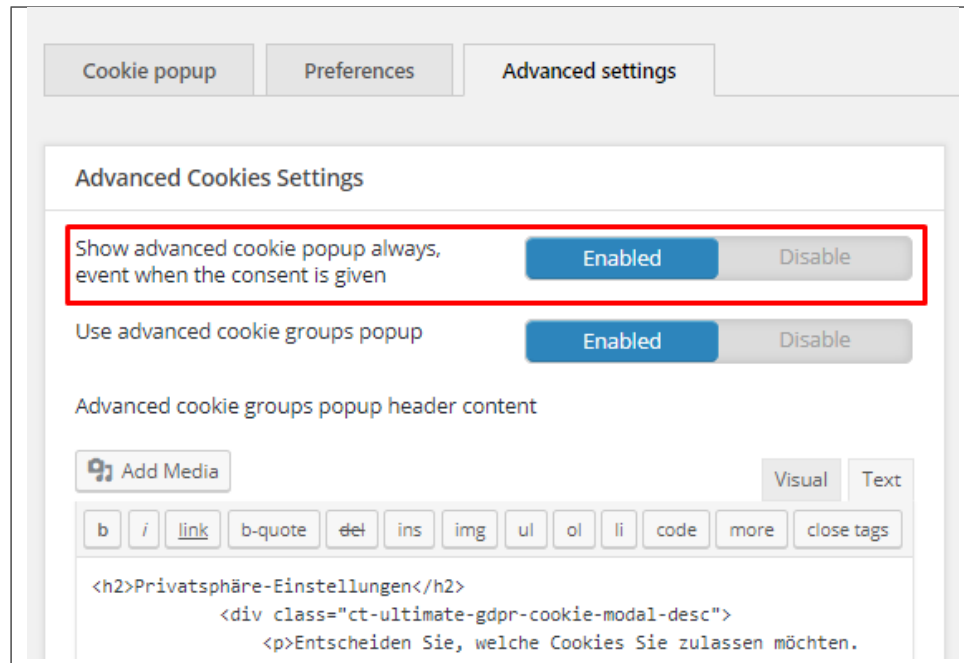

- **Show Privacy Settings Trigger**

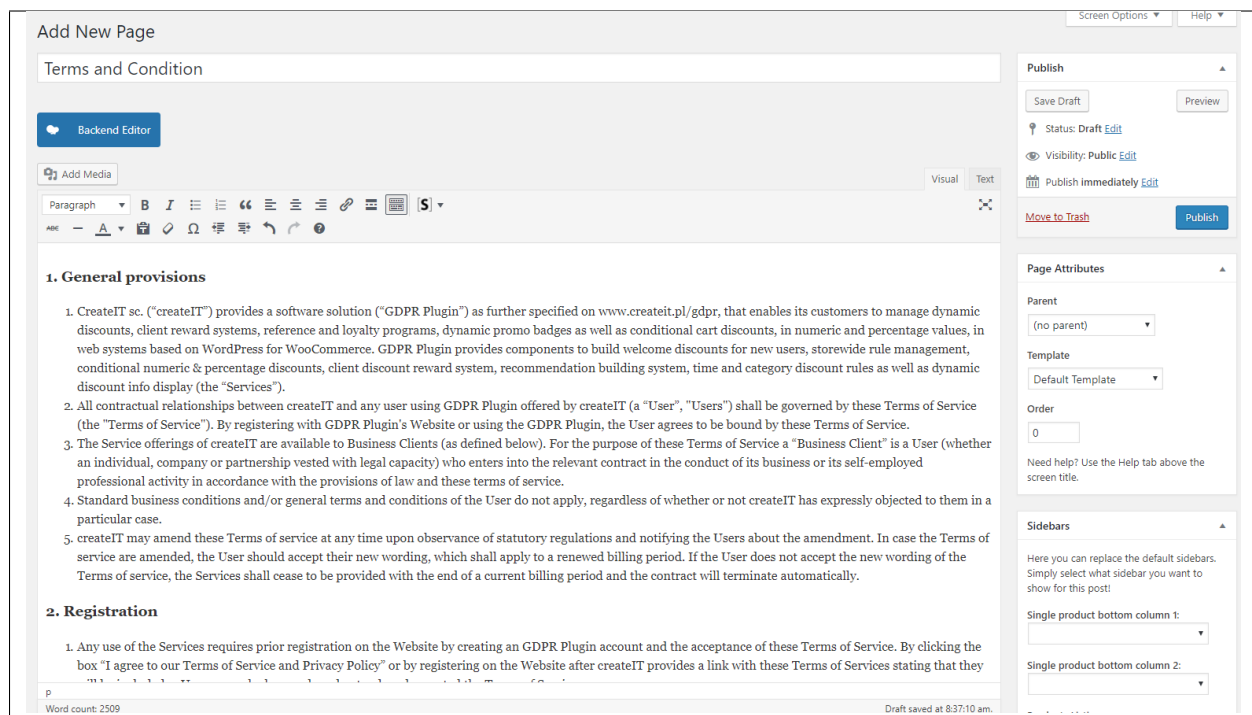

This Trigger will show the **Advance cookie Settings** even if it is already set. Users of the site can change the Advance cookie setting anytime they want by just clicking on the icon.

You can show this trigger when the **Show advanced cookie popup always, even when the consent is given** under *Ultimate GDPR & CCPA > Cookie Consent > Advance settings tab* is activated.

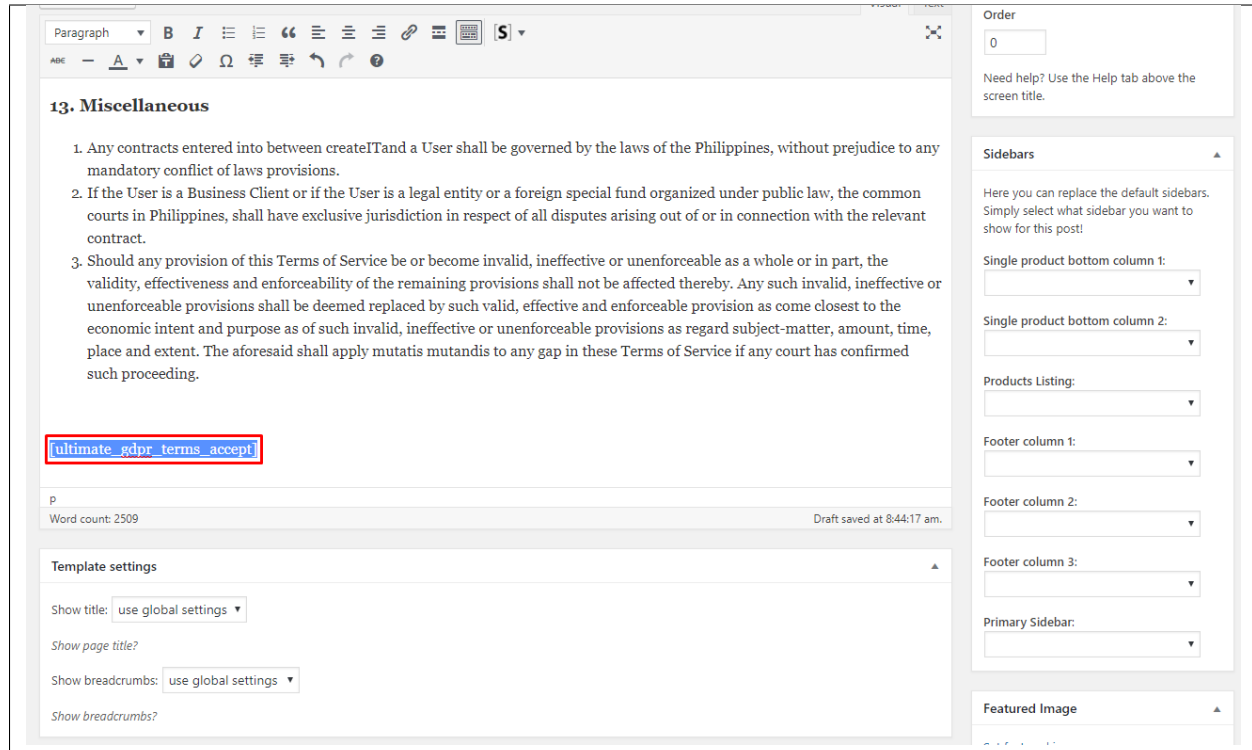

## 2.3.2 Terms and Conditions

To add terms and conditions on the site, create a page where all the terms and conditions are written.

Add the button to accept the terms and condition, add the shortcode: `[ultimate_gdpr_terms_accept]`

After publishing the page for the terms and conditions, in your dashboard go to **Ultimate GDPR & CCPA > Terms and Conditions**.

You will be redirected to the *Terms and Conditions* settings.

### Terms and Conditions

#### Instructions

1. Place `[ultimate_gdpr_terms_accept]` shortcode on your existing Terms and Conditions page to add an accept button.
2. Select Terms and Conditions page below, so users can be redirected there to give their consent.

Require logged in users to accept Terms and Conditions (redirect)

In *Page with existing Terms and Conditions*, choose the page that you made with the terms and conditions are written. Add the needed information and details. For more details on *Terms and Conditions*, click [here](#).

**Note:** Admin can download *consent logs* for admin to know what consent the user gave for Terms and Conditions. You can find the download button at the bottom of **Ultimate GDPR & CCPA > Terms and Conditions**.

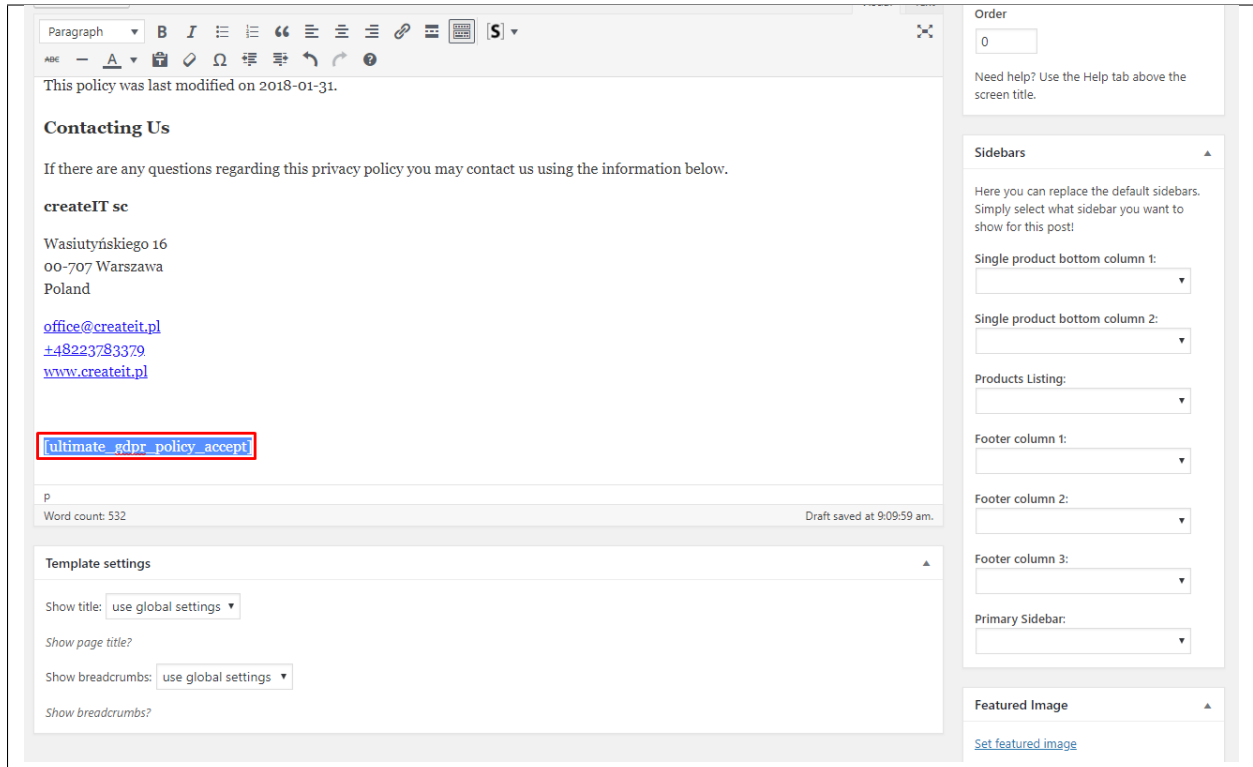

## 2.3.3 Privacy Policy

To add privacy policy on the site, create a page where all the privacy policy are written.

To add the button to accept the privacy policy, add the shortcode: `[ultimate_gdpr_policy_accept]`

After publishing the page for the privacy policy, in your dashboard go to **Ultimate GDPR & CCPA > Privacy Policy**. You will be redirected to the *Privacy Policy* settings.

### Privacy Policy

#### Instructions

1. Place [ultimate\_gdpr\_policy\_accept] shortcode on your existing Privacy Policy page to add an accept button.
2. Select Privacy Policy page below, so users can be redirected there to give their consent.

Require administrators to accept Privacy Policy (redirect)	<div>EnableDisabled</div>

Redirect to Privacy Policy first (if Terms and Conditions also redirect)	<div>EnableDisabled</div>
Convert the following text to Privacy Policy link in all services templates, eg. 'Privacy Policy'	<input type="text" value="Privacy Policy"/>
Do not block user agents (eg. bots) containing the following texts (comma separated)	<input type="text" value="bot, crawl, slurp, spider, mediapartners"/>

Press "Save changes" before downloading logs if you changed any options

Save Changes

Download consents log

In *Page with existing Privacy Policy*, choose the page that you made with the privacy policy are written.

Add the needed information and details. For more details on *Privacy Policy*, click [here](#).

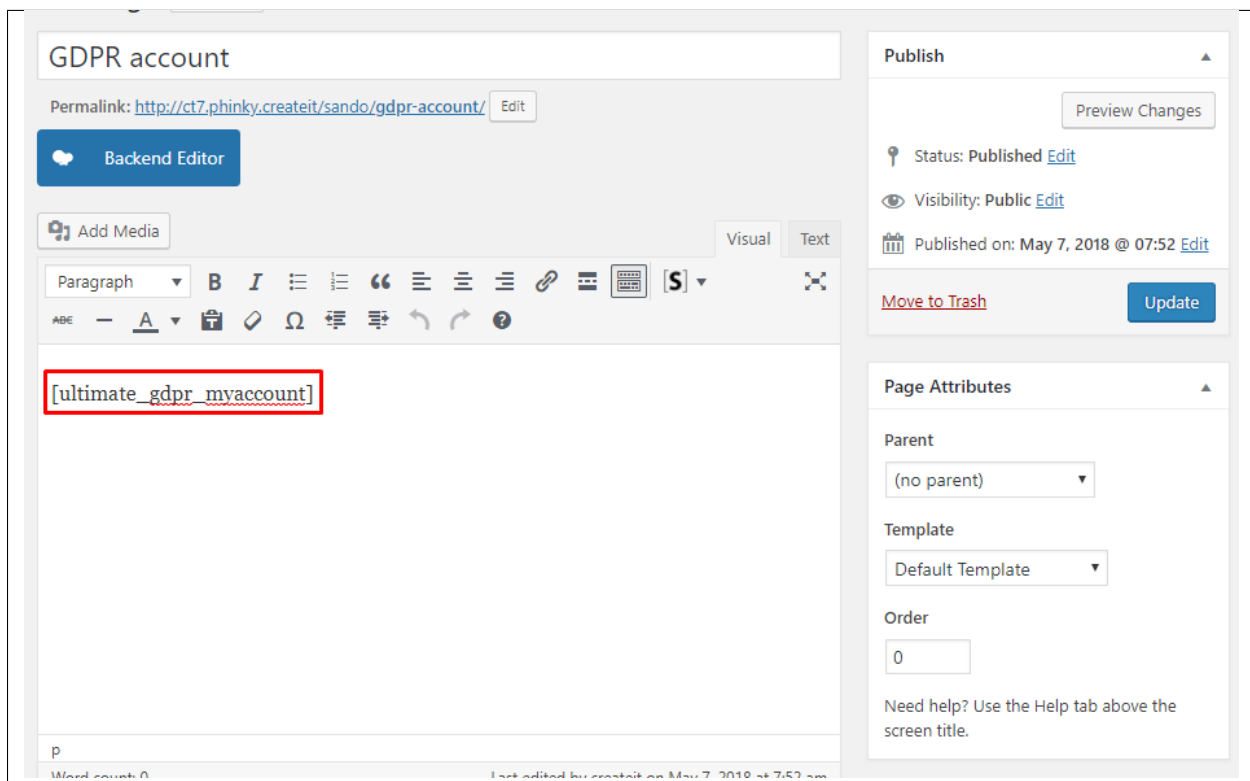

**Note:** Admin can download *consent logs* for admin to know what consent the user gave for Privacy Policy. You can find the download button at the bottom of **Ultimate GDPR & CCPA > Privacy Policy**.

### 2.3.4 Right To Be Forgotten

To add the *Right to be Forgotten* on your site, create a page where you want to show the *Forget Me* tab.

In the page you created, add the shortcode: `[ultimate_gdpr_myaccount]`

After publishing the page with the shortcode, in your dashboard go to **Ultimate GDPR & CCPA > Right To Be Forgotten**.

You will be redirected to the *Right to be forgotten settings*.

**Right To Be Forgotten** | Data Access | Data Breach | Data Rectification

**Forms skin**

Skin: Rounded form

**Right to be forgotten settings**

Automatically forget users who confirmed their mail:

Automatically send email about data removal to users who confirmed their email:

Chapter 2. How to

The screenshot displays the cookie consent interface. At the top, there are five icons: a green circle with a diagonal line (Block all), a plus sign, a green circle with a checkmark (Essential), a gear (Functionality), a bar chart (Analytics), and a double-headed arrow (Advertising). Below these icons are five radio buttons corresponding to the same labels. The 'Essential' radio button is selected. Below the radio buttons is a red-bordered box containing two columns of text. The left column is titled 'THIS WEBSITE WILL:' and lists six items with green checkmarks. The right column is titled 'THIS WEBSITE WON'T:' and lists eight items with orange X marks. At the bottom of the interface is a blue button labeled 'SAVE & CLOSE'.

Block all	Essential	Functionality	Analytics	Advertising
<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**THIS WEBSITE WILL:**

- ✓ Essential: Remember your cookie permission setting
- ✓ Essential: Allow session cookies
- ✓ Essential: Gather information you input into a contact forms, newsletter and other forms across all pages
- ✓ Essential: Keep track of what you input in shopping cart
- ✓ Essential: Authenticate that you are logged into your user account
- ✓ Essential: Remember language version you selected

**THIS WEBSITE WON'T:**

- ✗ Remember your login details
- ✗ Functionality: Remember social media settings
- ✗ Functionality: Remember selected region and country
- ✗ Analytics: Keep track of your visited pages and interaction taken
- ✗ Analytics: Keep track about your location and region based on your IP number
- ✗ Analytics: Keep track on the time spent on each page
- ✗ Analytics: Increase the data quality of the statistics functions
- ✗ Advertising: Tailor information and advertising to your interests based on e.g. the content you have visited before. (Currently we do not use targeting or targeting cookies.
- ✗ Advertising: Gather personally identifiable information such as name and location

SAVE & CLOSE

- To add/change the list under the cookie levels:
  - **List of features available for Essential level (semicolon separated)** - List here are the list that will show in the left side under *This Website Will* when **Essential** level is activated.
  - **List of features not available for Essential level (semicolon separated)** - List here are the list that will show in the right side under *This Website Won't* when **Essential** level is activated.
  - **List of features available for Functionality level (semicolon separated)** - List here are the list that will show in the left side under *This Website Will* when **Functionality** level is activated.
  - **List of features not available for Functionality level (semicolon separated)** - List here are the list that will show in the right side under *This Website Won't* when **Functionality** level is activated.
  - **List of features available for Analytics level (semicolon separated)** - List here are the list that will show in the left side under *This Website Will* when **Analytics** level is activated.
  - **List of features not available for Analytics level (semicolon separated)** - List here are the list that will show in the right side under *This Website Won't* when **Analytics** level is activated.
  - **List of features available for Advertising level (semicolon separated)** - List here are the list that will show in the left side under *This Website Will* when **Advertising** level is activated.
  - **List of features not available for Advertising level (semicolon separated)** - List here are the list that will show in the right side under *This Website Won't* when **Advertising** level is activated.

### 2.4.3 What Cookies are used on your website

---

**Note:** Functionality available since version 1.4

---

You can show a table with all cookies collected by your website with simple shortcode: `[render_cookies_list]`

Active cookies will be displayed in a table, like the following:

Cookie names	Type of cookie	First or Third party	Session or Persistent	Expiry Time	Purpose
__cfduid	Advertising		persistent	23 May 2019 12:06:07	
ss	Advertising		session		
tawkUUID	Advertising		persistent	19 Nov 2018 12:06:07	
NID	Advertising		persistent	22 Nov 2018 12:06:09	
__utma, __utmb, __utmc, __utmt, __utmz, __ga, __gat, __gid	Analytics	third_party			
act, wd, xs, datr, sb, presence, c_user, fr, pl, reg_ext_ref, reg_fb_gate, reg_fb_ref	Advertising	third_party			
km_al, km_lv, km_vs, __atuvs, __atuvc, uvc	Functionality	third_party			

---

**Note:** Your website should be publicly accessible to correctly detect all cookies that are used on it

---

### 2.4.4 Whitelist Cookies

When a scenario that the set default privacy group is 'Block All' and the user will select 'Block All' cookie, the user will see the cookie popup over and over since the user blocked saving cookies and there is no way for the system to know that the user already accepted the cookie consent.

Whitelist cookies are cookies that are allowed even if you choose to *Block all* cookies in the site.

You can add whitelisted cookies in **Ultimate GDPR & CCPA > Cookie Consent > Preferences**:

The screenshot shows the 'Advanced settings' tab of the Ultimate GDPR & CCPA Compliance Toolkit. The 'Cookie check' section is highlighted with a red box. It contains the following settings:

- Choose how often cookie check should be performed:** Weekly
- Choose default level of new cookies:** Essential
- Cookies whitelist (never block these cookies, comma separated):** PHPSESSID, wordpress, wp-settings-, \_cfduid, ct-ultimate-gdpr-cookie
- Block selected/all cookies until user consents:** Disabled (The 'Enabled' button is greyed out, and the 'Disabled' button is active.)
- Set consent expire time [s]:** 31536000

This way you can allow selected cookies to be accepted even if cookie setting is set to 'Block All'.

### 2.4.5 Display Advance Cookie Setting with link

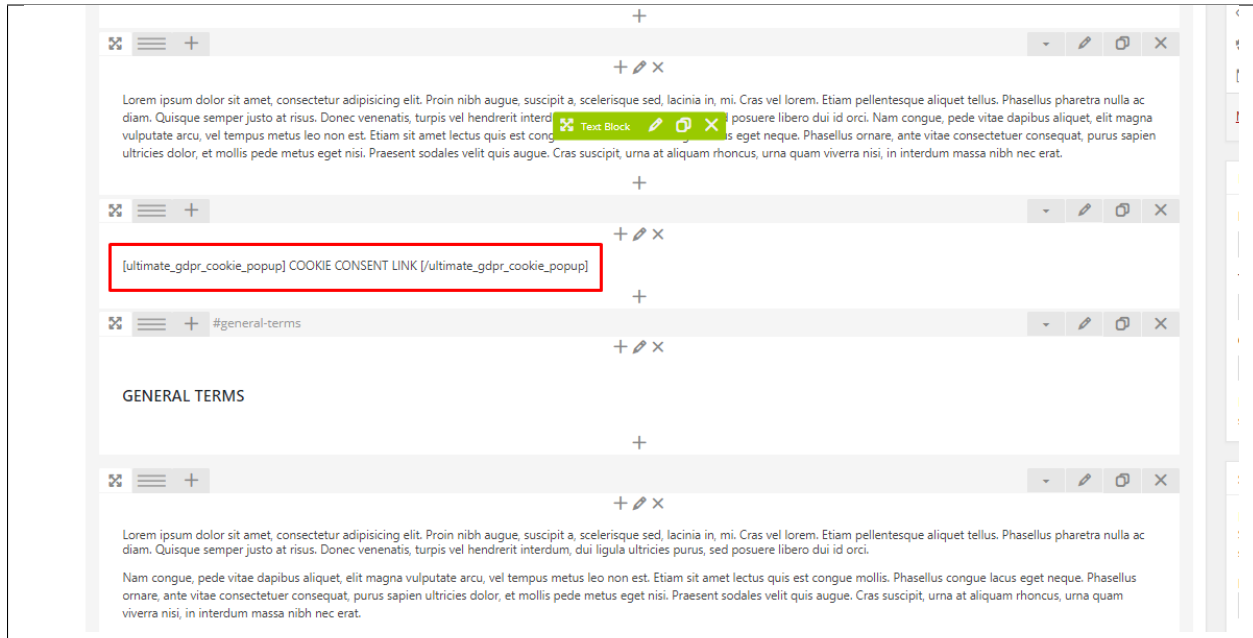

Option to open cookie modal using a link, which you can display/add in any page on the site.

To do this, you can use shortcode: `[ultimate_gdpr_cookie_popup]` & `[/ultimate_gdpr_cookie_popup]`

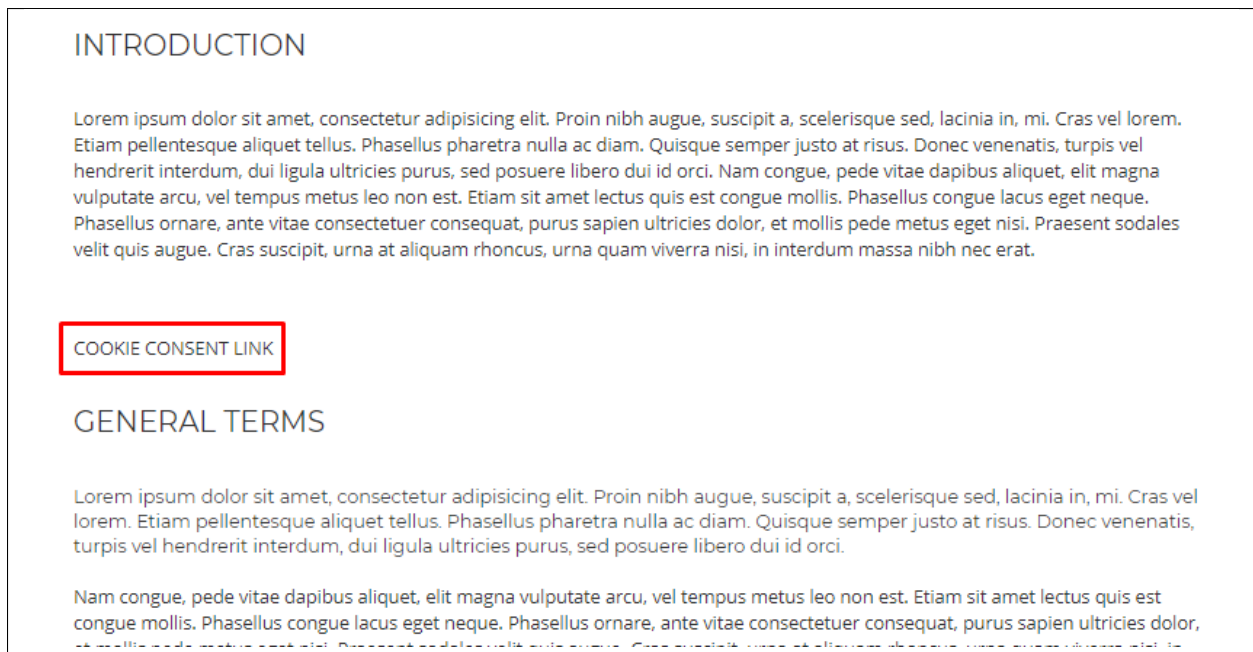

You can add these shortcodes in the page that you would like to add the link.

Sample format:

`[ultimate_gdpr_cookie_popup] COOKIE CONSENT LINK [ultimate_gdpr_cookie_popup]`

Front end:

## 2.5 Cookie Groups

**Note:** The Cookie Privacy Setting / Trigger will show when **Use advanced cookie groups popup** is activated in **Ultimate GDPR & CCPA > Cookie Consent > Advance settings tab**.

The Cookie Groups for Ultimate GDPR & CCPA are cookie levels, where you would need to pass level 1 to get to level 2. These levels have cookies that are set in them and when you pass to another level, these cookies will also remain.

This will allow tracking of only the necessary cookies or possible cookies.

- **Essential** - For cookies which are strictly necessary for your website to be able to operate or to provide user with a requested service
- **Functional** - These are cookies that are designed for purposes such as enhancing a website's functionality. These are either not strictly essential for the website or functionality which user has requested to work, or are cookies which serve non-essential purposes in addition to their essential purpose.
- **Analytics** - Analytical (or performance) cookies track and gather data about what a user does on a website.
- **Advertising** - Targeting (or advertising) cookies record information about users visit to and use of your website, for advertising purposes.

You can customize the cookie groups as you see fit. You can disable, rename, add/remove cookies, etc., the cookie group of your choice.

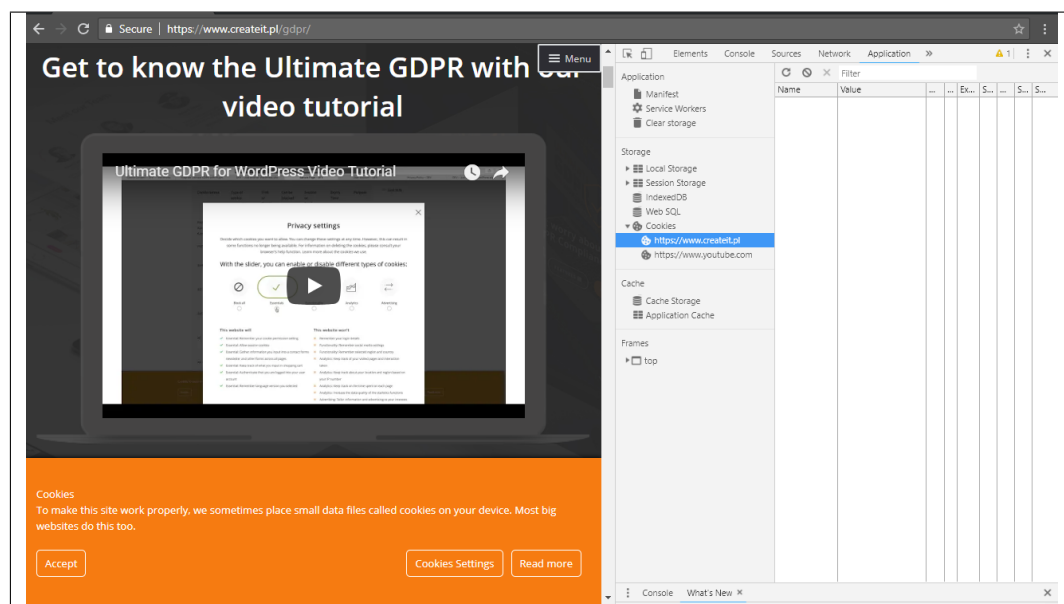

When a user opens the site for the FIRST time, the cookie group would depend on what the admin have set. These are the ways to set the default cookie group:

1. **Block Cookies Until User Gives Consent**

You can set this option in **Ultimate GDPR & CCPA > Cookie Consent > Preference tab**.

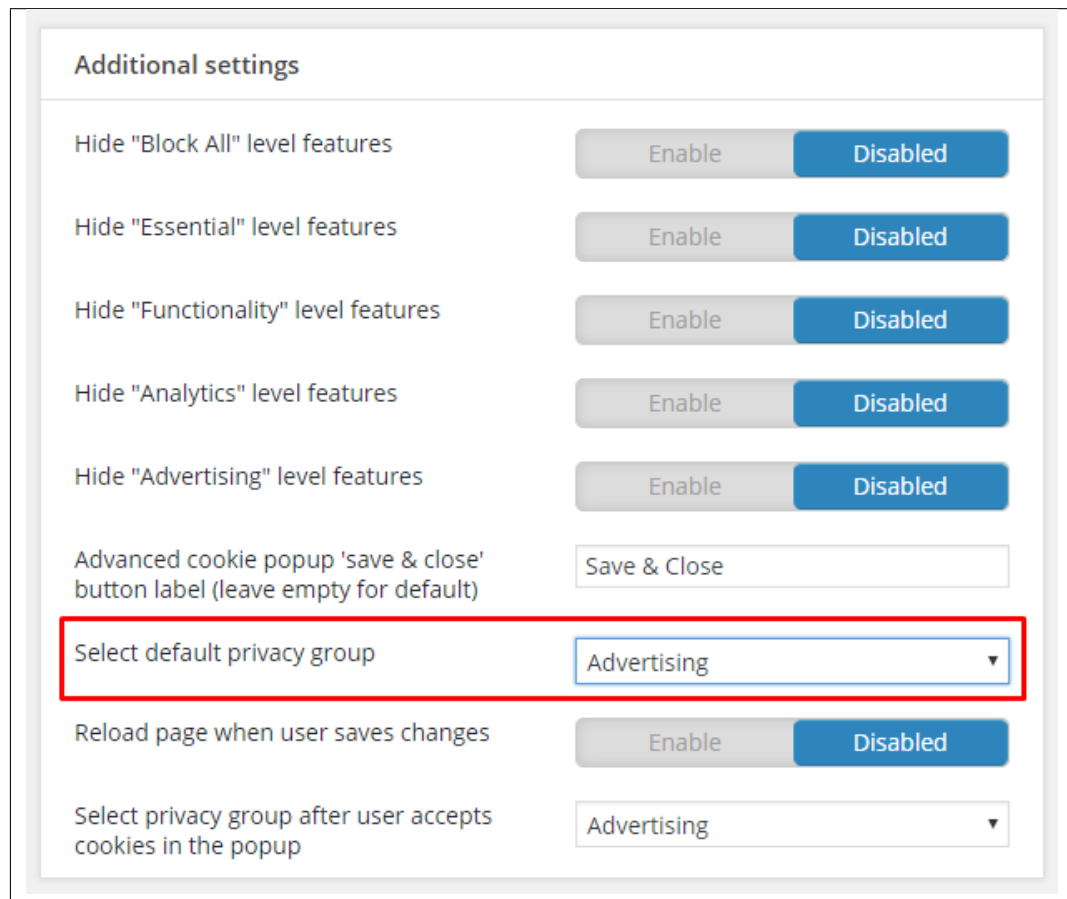

Sample:

## 2. Set a Default Cookies Group

You can set this option in **Ultimate GDPR & CCPA > Cookie Consent > Additional settings tab**.

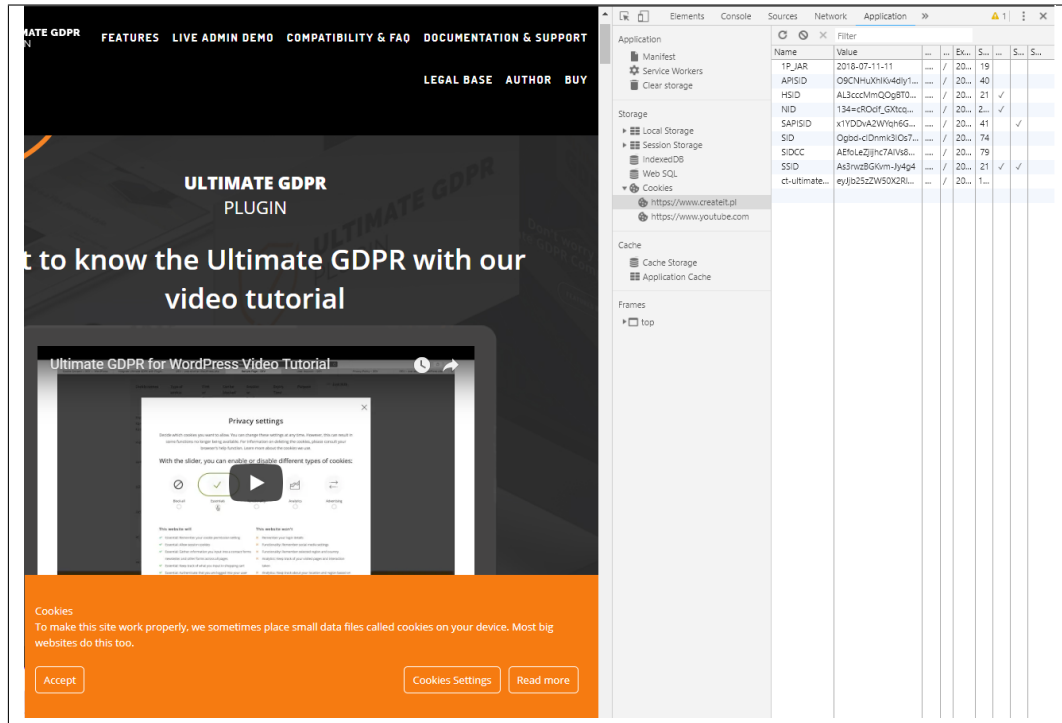

The screenshot shows the 'Additional settings' tab of the Ultimate GDPR & CCPA plugin. It contains several settings for cookie consent. The 'Select default privacy group' dropdown is highlighted with a red box and is set to 'Advertising'. Other settings include 'Hide "Block All" level features', 'Hide "Essential" level features', 'Hide "Functionality" level features', 'Hide "Analytics" level features', 'Hide "Advertising" level features', 'Advanced cookie popup "save & close" button label (leave empty for default)', 'Reload page when user saves changes', and 'Select privacy group after user accepts cookies in the popup'.

Setting	Value
Hide "Block All" level features	Disabled
Hide "Essential" level features	Disabled
Hide "Functionality" level features	Disabled
Hide "Analytics" level features	Disabled
Hide "Advertising" level features	Disabled
Advanced cookie popup 'save & close' button label (leave empty for default)	Save & Close
Select default privacy group	Advertising
Reload page when user saves changes	Disabled
Select privacy group after user accepts cookies in the popup	Advertising

This will block the cookie group set by the admin.

Sample: **Default Cookie Group is Advertising**

**Note:** When a user has already used your site, the cookie group that the user has set before will be remembered unless the cache has been cleared on the users side.

This is used to limit the cookies that are in the site to gather details about the user.

Read these parts of the documentation for:

- [Cookie Group Panel](#) - Customize cookie group's look.
- [Services Manager](#) - Add/remove cookies in a group.

## 2.6 Use Services Manager

This is where the cookies that are detected are saved. You can change the cookies's details here. You can also make a customized cookie to be blocked/accepted in your site.

To detect cookies that are used in your site, click the **Scan for cookies** button at the bottom of **Ultimate GDPR & CCPA > Cookie Consent > Cookie consent settings**.

**Note:** To have the **Block All** cookies functionality working, you must first detect all cookies and save them in the Services Manager.

The cookies that are detected is then shown in the **Ultimate GDPR & CCPA > Cookie Consent > Services Manager**.

In **Ultimate GDPR & CCPA > Cookie Consent > Services Manager** you will see:

Enter title here

ID

Service name

Script names

Please input comma separated names of cookie creating scripts

Cookie names

Please input comma separated cookie names

Type of cookie

Essential

First or Third party?

Can be blocked?

Session or Persistent?

Expiry Time

Purpose

Do you want to activate this service?

- **Title** - Used only for admin user to navigate through services.
- **ID** - Identifier for the cookie script.
- **Service name** - Name of the service which will be displayed in table created using `[render_cookies_list]` short code.
- **Script names** - Comma separated names of java-script scripts which are to be blocked, to prevent creation of unwanted cookies.

---

**Note:** Plugin searches html content of `<script>`, `<noscript>` and `<iframe>` tags. If plugin finds any of “script names” it removes entire content of given tag.

---

- **Cookie names** - Comma separated names of cookies which are to be blocked. It's important use actual name of cookie, not name of service. For example – to block google analytics user must input “\_ga” instead of “Google Analytics”.
- **Type of cookie** - Drop-down allowing user to pick which category should the cookie be in. This allows user to agree for chosen cookie group.
- **First or Third party ?** - First party cookies are cookies created by website itself, the rest are 3rd party.
- **Can be blocked ?** - When user creates new service, you should test if blocking works as intended.

By default all cookies we do not recognise that is detected by *Scan for cookie* option have this field set to false.

This field is used only to display information in table created using `[render_cookies_list]` shortcode.

- **Session or Persistent ?** - If cookie is deleted when session ends, or if it has set expiry date.  
This field is used only to display information in table created using `[render_cookies_list]` shortcode.
- **Expiry Time** - Fill only if cookie is Persistent. Input how long cookie is stored and use seconds.
- **Purpose** - Purpose of the cookie. This field is used only to display information in table created using `[render_cookies_list]` shortcode.
- **Do you want to activate this service?** - Option to activate or deactivate.

---

**Note:** Only services which are active, are being blocked. Unchecking this checkbox makes the plugin ignore this service.

---

### 2.6.1 How to add Third Party Cookies

When a third party cookie is not detected by the cookie scanner, you can add the third party cookies manually.

To add third party cookies, you can add the Cookie name of the cookies that you would like to block in **Ultimate GDPR & CCPA > Services Manager** under **Cookie Names**.

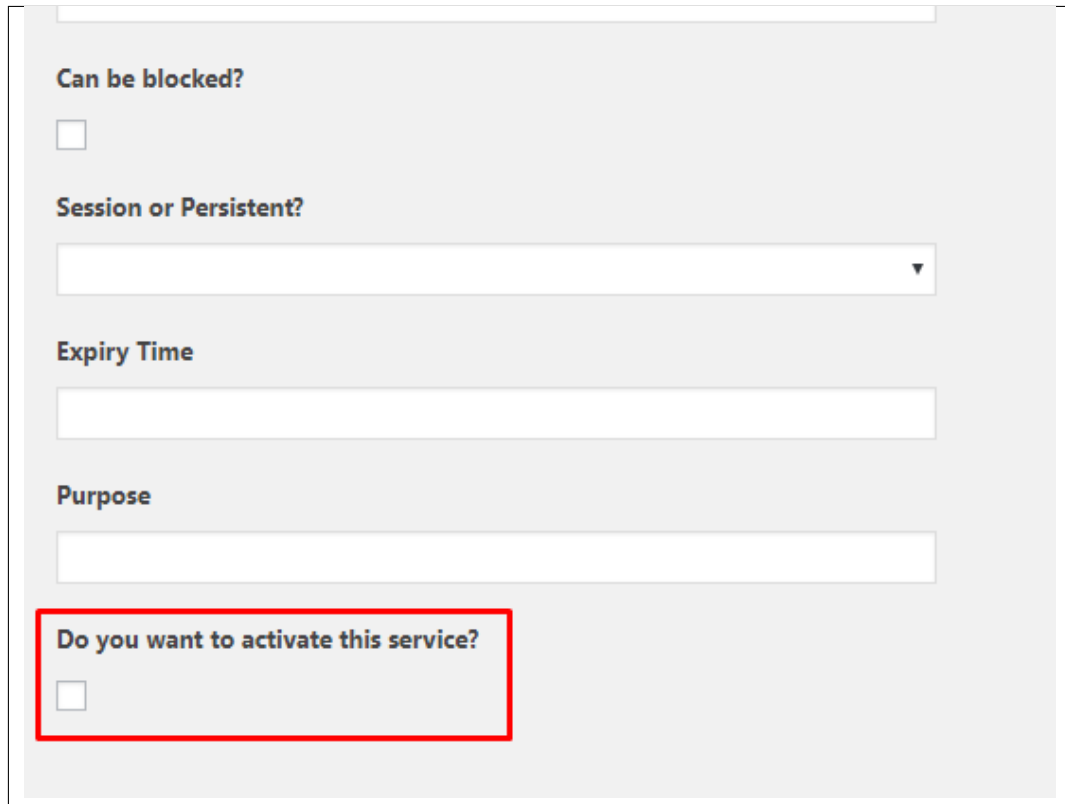

Sample third party setup:

Tawk
ID
1527167662
Service name
.tawk.to
Script names
Please input comma separated names of cookie creating scripts
.tawk.to
Cookie names
Please input comma separated cookie names
Tawk_5a7a0298d7591465c7076ef7, TawkConnectionTime
Type of cookie
Functionality
First or Third party?
Third party
Can be blocked?
<input type="checkbox"/>
Session or Persistent?
Persistent
Expiry Time
1542716231
Purpose
Do you want to activate this service?
<input checked="" type="checkbox"/>

## 2.6.2 Tracking Users Anonymously (Google Analytics)

To use this feature correctly, these are some pointers:

- In the **Ultimate GDPR & CCPA > Services Manager**, uncheck the *Do you want to activate this service?* so that Google Analytics won't be blocked.

The screenshot shows a configuration interface for Google Analytics. It includes several sections: 'Can be blocked?' with an unchecked checkbox, 'Session or Persistent?' with a dropdown menu, 'Expiry Time' with a text input field, and 'Purpose' with a text input field. At the bottom, the question 'Do you want to activate this service?' is followed by an unchecked checkbox, which is highlighted by a red rectangular border.

- The Google Analytics Tracking ID should be added in **Ultimate GDPR & CCPA > Cookie popup** for the feature to work since Google Analytics will be blocked as long as the consent isn't given.

Home Page  
GDPR  
FAQ

### Google Analytics Tracking ID

Google Analytics Tracking ID (disable tracking for this ID when cookies consent not given), eg. UA-118586768-1

Enable Google Analytics anonymized IP tracking ([read more](#)) ?

Enable Disabled

- Enable the option for anonymization in **Ultimate GDPR & CCPA > Cookie popup**. This option will allow you to track anonymously without collecting any user data in compliance with GDPR & CCPA.

GDPR  
FAQ

### Google Analytics Tracking ID

Google Analytics Tracking ID (disable tracking for this ID when cookies consent not given), eg. UA-118586768-1

☒ Enable Google Analytics anonymized IP tracking ([read more](#)) ?

Enable Disabled

### What does Tracking Users Anonymously exactly mean?

After following the instruction above, IP of all users visiting the website will be altered before sending the tracking data to Google. This will make impossible for search engines to directly assign tracking data to an exact IP Address making this action GDPR & CCPA compliance even if the user didn't accept cookie consent.

For more advanced information for this functionality access [this link](#).

### 2.6.3 If you want to block a specific cookie

To find a script to block, view page source, search for '<script>', '<noscript>' and '<iframe>' tags. Then, to block a tag, copy any of its content fragment, eg.

In the Service Name field, you should add the script that needs to be block in the site. For example:

**for script:**

```
<script type='text/javascript' src='http://ct11.pinky.createit/  
↳boilerplate/wp-includes/js/jquery/jquery.js?ver=1.12.4'></script>
```

- you can copy: 'jquery.js'

**for tag:**

```
<noscript>var x=start_tracking();</noscript>
```

- you can copy: 'start\_tracking()'

**for iframe:**

```
<iframe width="200" height="113" src="https://www.youtube.com/embed/  
↳xxxxx?feature=oembed" frameborder="0" allow="autoplay; encrypted-  
↳media" allowfullscreen></iframe>
```

- you can copy: 'youtube.com' or 'encrypted-media' or any other part of the tag content

---

**Note:** It's best to copy as large and unique tags content as possible, to avoid blocking other, non related tags by accident. By default, if particular services cookies are detected, these scripts contents are set to be blocked

---

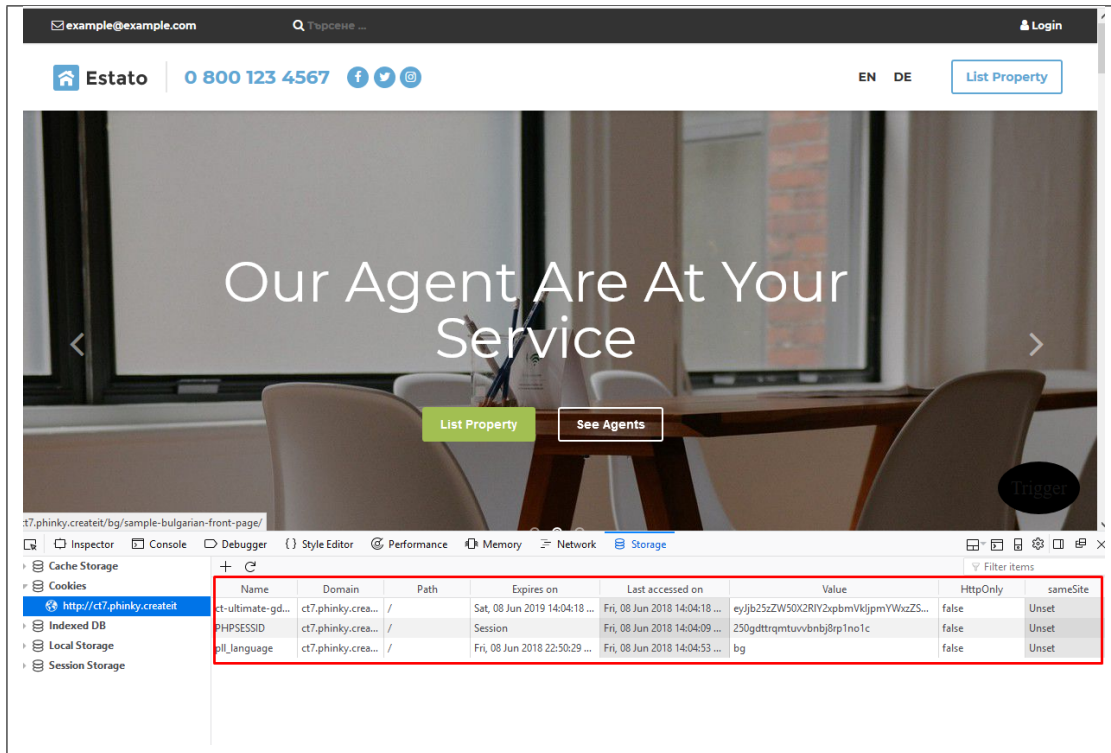

```
Addthis:  
addthis_widget  
  
Google Analytics  
google-analytics.com/analytics.js
```

```
Facebook Pixel:  
"pixel-cat.",  
"fbq('init'",  
"www.facebook.com/tr?id",  
"/pixelyoursite/"
```

### 2.6.4 How to check for cookies

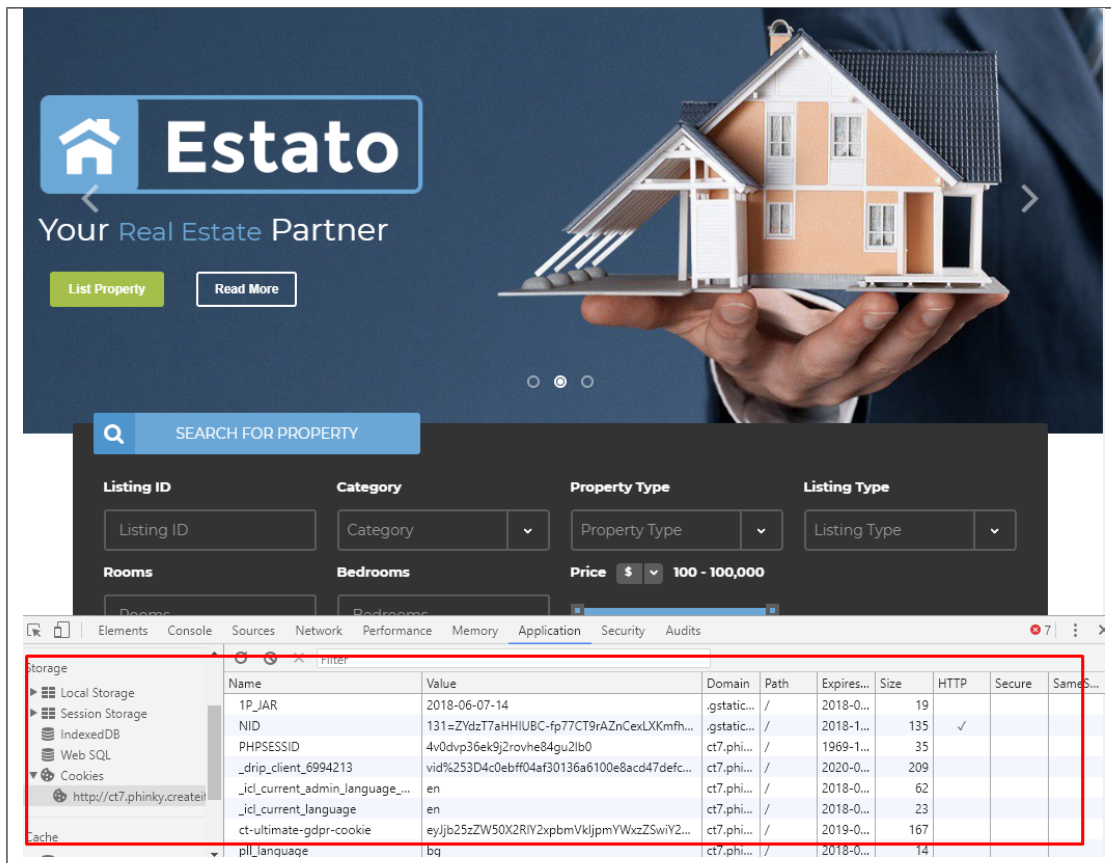

#### Mozilla Firefox

In Firefox, press F12 and navigate to Storage tab. There a list of cookies with all necessary information should be displayed.

## Google Chrome

In Google Chrome, press F12 and navigate to Application tab. Click on the drop down arrow beside Cookies below Storage. The list of cookies with all necessary information should be displayed.

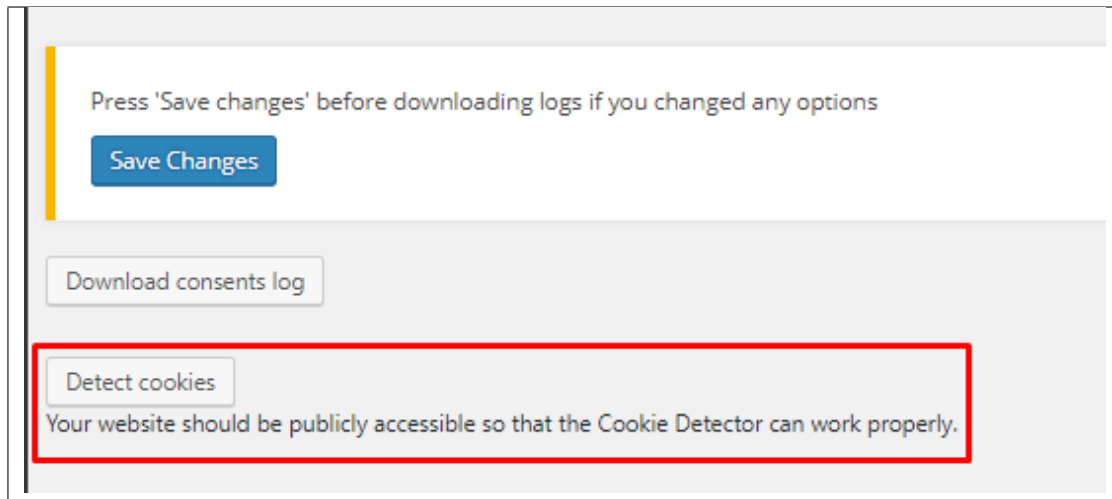

## Plugin

Cookies can also be detected using plugin's built in mechanism called "Scan for cookies". Cookie detection can be done using one button in wp-admin.

Navigate to **Ultimate GDPR & CCPA > Cookie Consent**. On the bottom of the page click on **DScan for cookies** button.

Please be patient, since this process might take a while. If no cookies were found please wait for around one hour and try again. In case this does not help please contact our support.

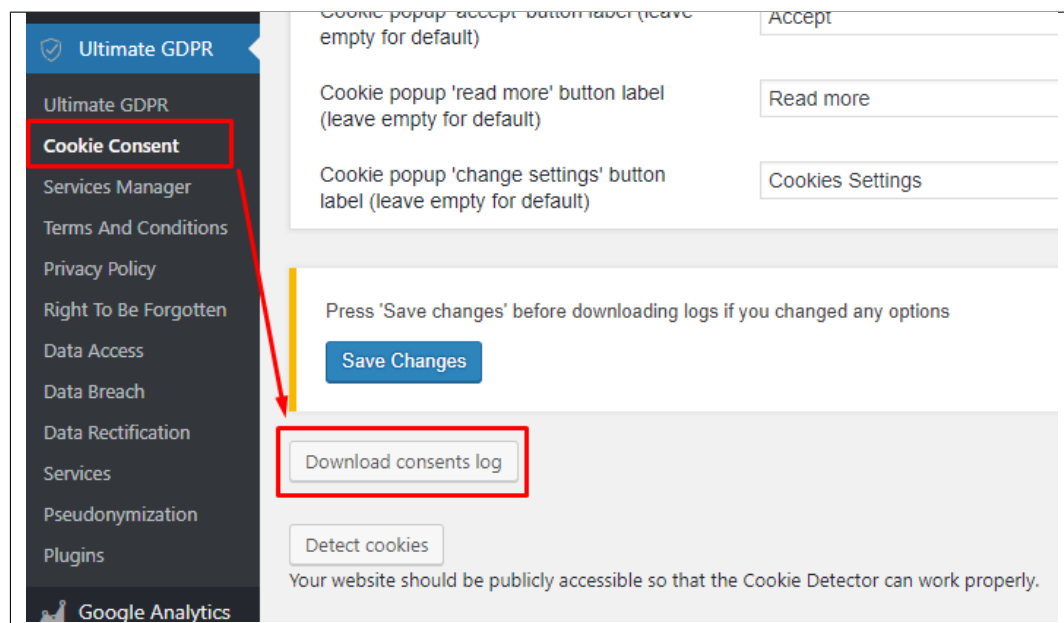

## 2.7 Consent Log's Storage

This feature will store the consents from the users of your site. Currently, we support logs for *Cookie Consent*, *Privacy Policy Consent*, *Terms and Conditions Consent* and *Services Consent Checkboxes*.

You can download the consent logs using the following:

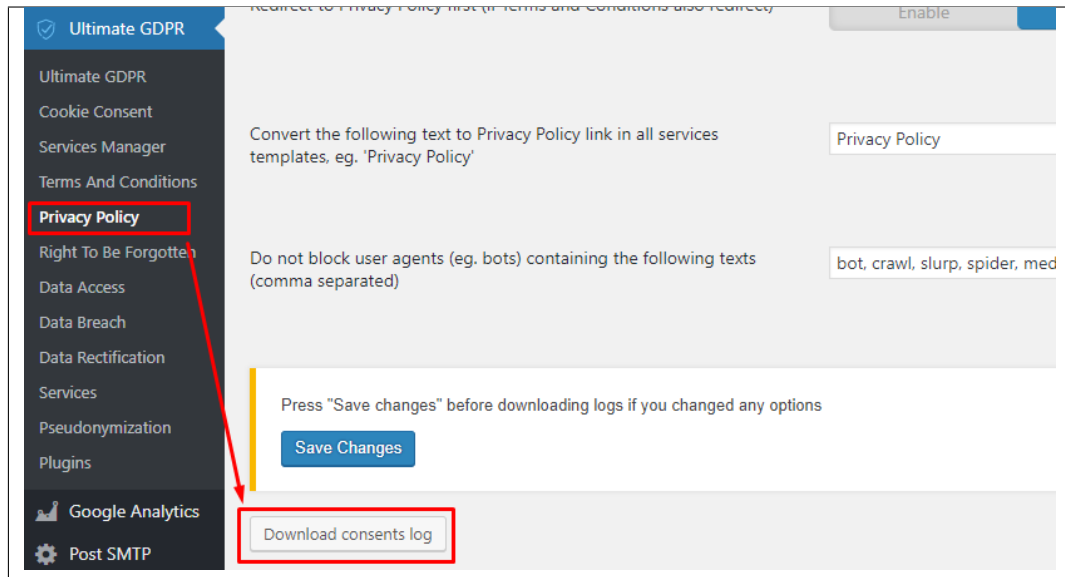

- **Cookie Consent**

*Ultimate GDPR & CCPA > Cookie Consent*

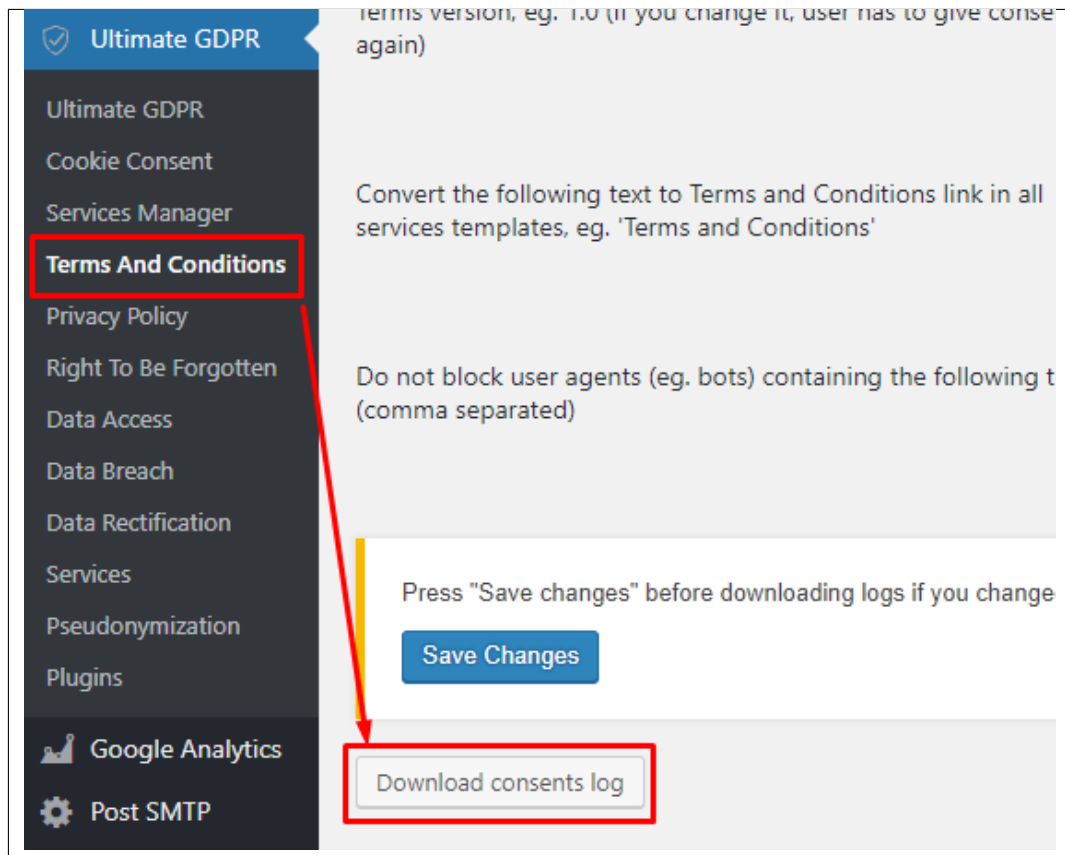

- **Privacy Policy Consent**

*Ultimate GDPR & CCPA > Privacy Policy*

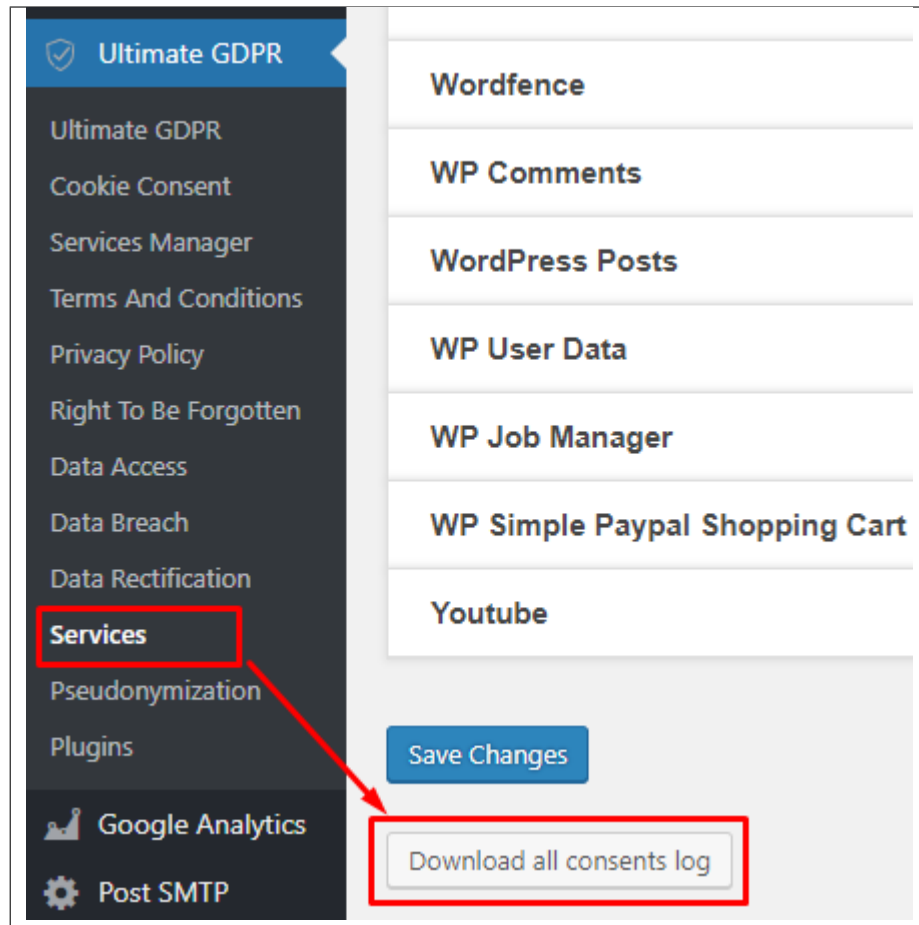

- **Terms and Conditions Consent**

*Ultimate GDPR & CCPA > Terms and Conditions*

- **Services Consent Checkboxes**

*Ultimate GDPR & CCPA > Services*

### 2.7.1 Logged Users

Users of your website that are logged in with whom accepted any of the consent that are supported will be registered in the log for that service.

Sample log for Terms and Conditions:

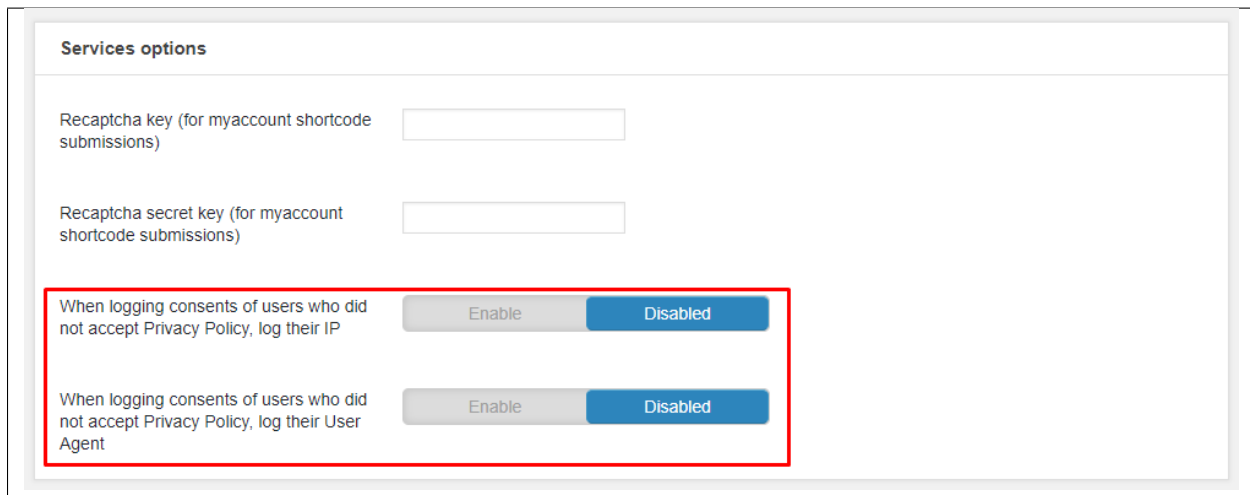

The user id, email address, and time of consent, of the user will show in the log.

## 2.7.2 Non-logged In Users

Users that are not logged in that accepted any of the consent that are supported will be registered in the log for that service.

There are two ways that the consent is registered:

**Note:** You can enable both options.

**Services options**

Recaptcha key (for myaccount shortcode submissions)

Recaptcha secret key (for myaccount shortcode submissions)

When logging consents of users who did not accept Privacy Policy, log their IP

When logging consents of users who did not accept Privacy Policy, log their User Agent

### 1. Logged by User IP

This feature will work when “*When logging consents of users who did not accept Privacy Policy, log their IP*” is activated.

The IP of the user will be shown with the user id and time of consent.

- Sample log for Terms and Conditions:

```
ct-ultimate-gdpr-cookie-logs (2) - Notepad
File Edit Format View Help
id: 1type: ct-ultimate-gdpr-cookieuser_id: 0user_ip: 192.168.200.84user_agent: Mozilla/5.0
(Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/67.0.3396.99
Safari/537.36time: 1531204289data:
{"consent_declined":false,"consent_expire_time":1559726120,"consent_level":3,"consent_time":1531204289}
```

### 2. Logged by User Agent

This feature will work when “*When logging consents of users who did not accept Privacy Policy, log their User Agent*” is activated.

The browser and computer details of the user will be shown with the user id and time of consent.

- Sample log for Terms and Conditions:

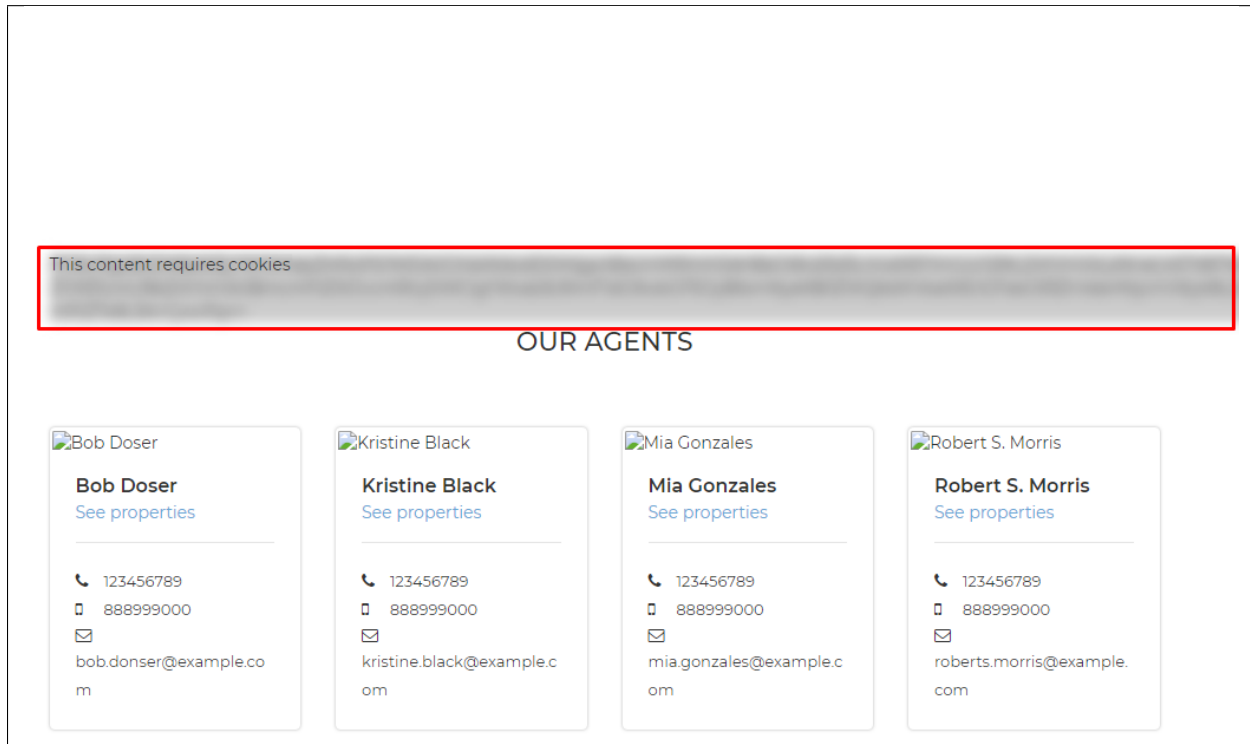

```
ct-ultimate-gdpr-cookie-logs (2) - Notepad
File Edit Format View Help
id: 1type: ct-ultimate-gdpr-cookieuser_id: 0user_ip: 192.168.200.84user_agent: Mozilla/5.0
(Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/67.0.3396.99
Safari/537.36time: 1531204289data:
{"consent_declined":false,"consent_expire_time":1559726120,"consent_level":3,"consent_time":1531204289}
```

## 2.8 Content Protection

This feature is used by using this shortcode: **[ultimate\_gdpr\_protection level=4]** & **[/ultimate\_gdpr\_protection]**

This feature will hide any content inside the shortcode unless the cookie group chosen by the user of the site will meet the requirements of the shortcode.

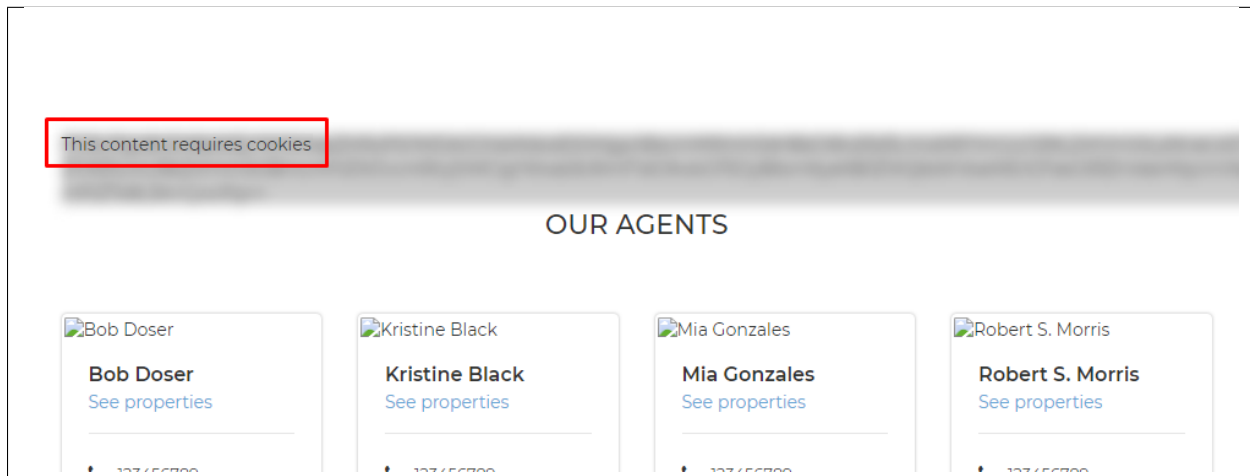

To add the shortcode in the page, follow this format:

**[ultimate\_gdpr\_protection level=4]CONTENT[/ultimate\_gdpr\_protection]**

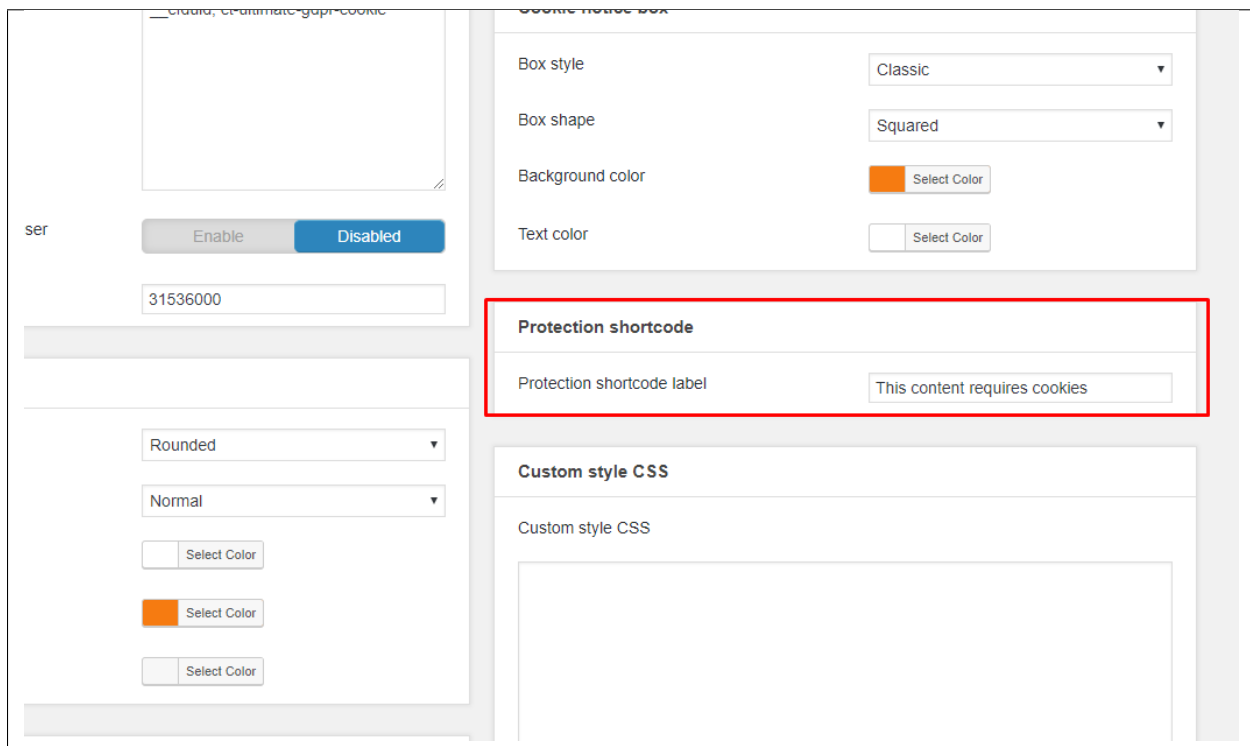

**Note:** The level in **[ultimate\_gdpr\_protection level=4]** is the cookie group condition that needs to be met for the blur to clear.

Level	Cookie Group
1	Essentials
2	Functionality
3	Analytics
4	Advertising

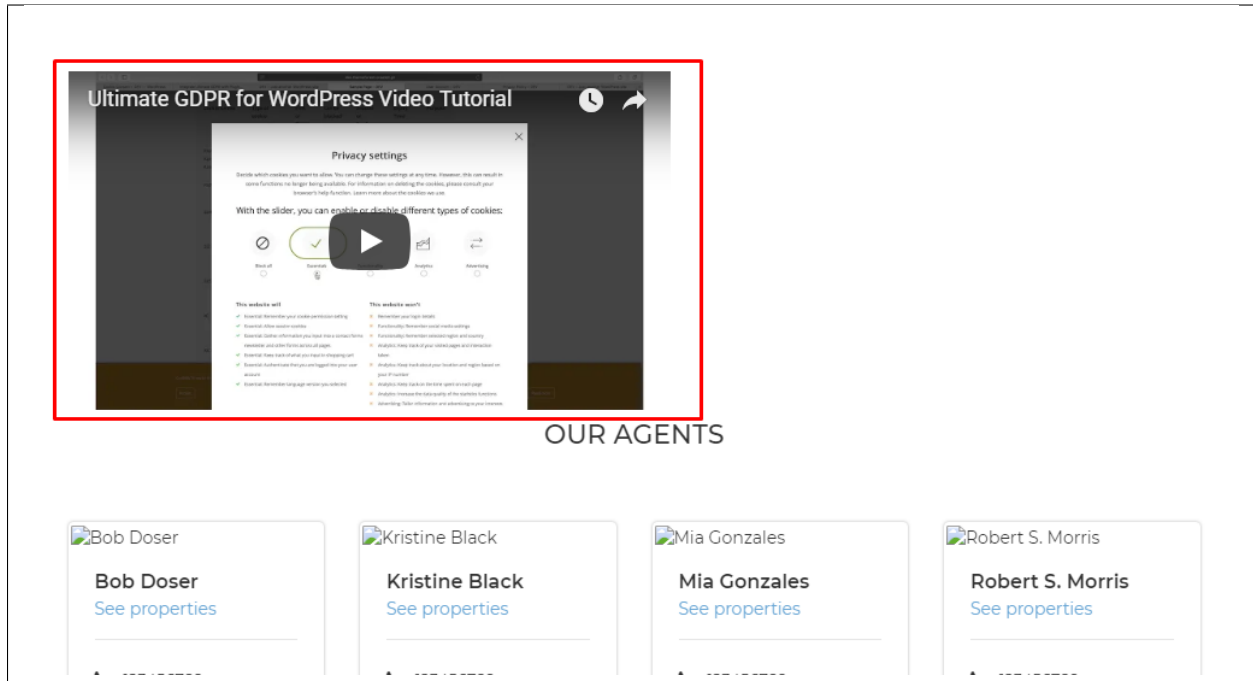

A label/notice will be shown in front of the blurred area.

You can customize the label/notice in **Ultimate GDPR & CCPA > Cookie Consent > Preference tab**, under *Protection shortcode*.

Sample when condition is meet

## 2.9 Customize

### 2.9.1 Cookie Consent

Cookie consent can be customized in **Ultimate GDPR & CCPA > Cookie Consent > Preference Tab** under the *Cookie notice box*.

**Cookie notice box**

Box style: Modern

Box shape: Rounded

Background color: [Teal swatch] Select Color

Background image: [Placeholder image] Choose file No file chosen

Update Remove

Text color: [Black swatch] Select Color

You can choose the box style of the cookie consent on what style you want.

- **Classic**

- **Classic Blue**

- **Modern**

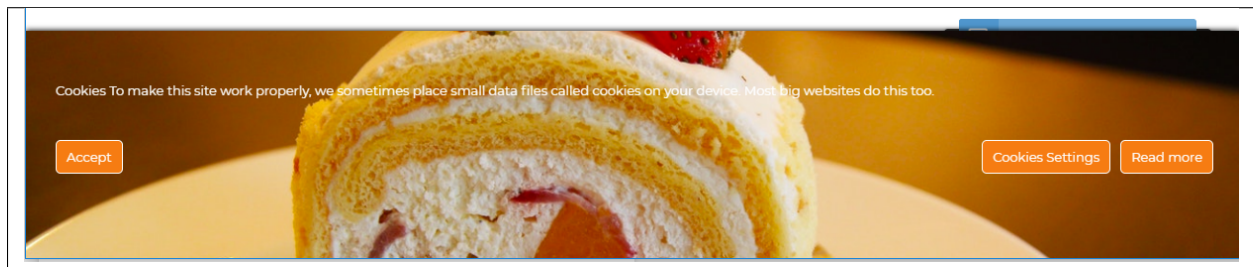

---

**Note:** Background color is only applicable to Classic or Modern Box Styles.

---

You can also use an image as the background for the cookie notice.

You can choose the text color of the text in the cookie consent.

## 2.9.2 Terms and Conditions and Privacy Policy

## Buttons

Privacy Policy

Instructions

- Place `[ultimate_gdpr_policy_accept]` shortcode on your existing Privacy Policy page to add an accept button.
- Select Privacy Policy page below, so users can be redirected there to give their consent.

Require administrators to accept Privacy Policy (redirect)

Enable

Disabled

Require logged in users to accept Privacy Policy (redirect)

Enable

Disabled

Require not logged in users/guests to accept Privacy Policy (redirect)

Enable

Disabled

WordPress Privacy Policy page

[Click here to create](#)

Page with existing Privacy Policy

Privacy Policy Custom URL

Open Privacy Policy in a new Tab

Enabled

Disable

Page to redirect to after Privacy Policy accepted

Shortcode Button Styling

Theme Default

Theme Default

Cookie box buttons

Set consent expire time [s]

Privacy Policy version, eg. 1.0 (if you change it, user has to give consent again)

To customize the buttons for Terms and Conditions and Privacy Policy, you have 2 options: **Theme Default** or **Cookie box buttons**

- **Theme Default**

This is the default button design that your WP theme is using. It will give you a uniform look to your site.

- **Cookie box buttons**

This option is using the same button design as the Cookie consent. Which you can change in **Ultimate GDPR & CCPA > Cookie Consent > Preference Tab**.

The screenshot shows a 'Buttons styles' panel with the following settings:

- Button shape:** A dropdown menu set to 'Rounded'.
- Button size:** A dropdown menu set to 'Normal'.
- Button text color:** A text input field with a 'Select Color' button.
- Button background color:** A blue color swatch with a 'Select Color' button.
- Button border color:** A text input field with a 'Select Color' button.

---

**Note:** When you change the look in the Preference Tab, it will not just change the buttons for Terms and Conditions and Privacy Policy. It will affect the look of the buttons for Cookie consent.

---

## Bot Detection

Detect whether a bot (Google bot) or a human enters the site and enforce the Terms and Conditions and Privacy Policy.

You can add the bot name in:

- **Terms and Conditions** - Ultimate GDPR & CCPA > Terms and Conditions > Do not block user agents (eg. bots) containing the following texts (comma separated)
- **Privacy Policy** - Ultimate GDPR & CCPA > Privacy Policy > Do not block user agents (eg. bots) containing the following texts (comma separated)

---

**Note:** You can see the bot database [here](#)

---

## 2.9.3 Right to be Forgotten

**Note:** This feature will show the plugins that are integrated in Ultimate GDPR that gather data from the users.

---

### Changing the Text in Forgotten Form

PERSONAL DATA ACCESS   **FORGET ME**   DATA RECTIFICATION

Below, you can browse services which collects your personal data on this website. Check services you wish to be forgotten by. This will send a request to the website admin. You will be notified by e-mail once this is done."

- ☐ **WooCommerce**  
WooCommerce gathers data entered by users in shop orders
- ☐ **WP Comments**  
WordPress Comments are data entered by users in comments
- ☐ **WordPress Posts**  
WordPress posts author data
- ☐ **WP User Data**  
WordPress user data stored as user meta data in database

Email:

☐ I consent to have my email collected in order to process this request. See Privacy Policy page for more information.

**SUBMIT**

You can change the Name and Description that will be shown in the Forget Me tab of the GDPR shortcode.

To customize the text in the form for Right to be Forgotten, go to **Ultimate GDPR & CCPA > Services**.

Look for the service that you would like to change.

**Note:** For this example, we'll use WooCommerce.

---

WooCommerce

[WooCommerce] Name: WooCommerce Sample

[WooCommerce] Description: Sample Description

[WooCommerce] Inject consent checkbox to order fields:

[WooCommerce] Inject consent checkbox to account forms:

[WooCommerce] Inject consent checkbox to checkout:

Add the Changes that you want, then click on the *Save Changes* button.

It should reflect in the form:

PERSONAL DATA ACCESS

FORGET ME

DATA RECTIFICATION

Below, you can browse services which collects your personal data on this website. Check services you wish to be forgotten by. This will send a request to the website admin. You will be notified by e-mail once this is done."

☐ WooCommerce Sample

Sample Description

☐ WP Comments

WordPress Comments are data entered by users in comments

☐ WordPress Posts

WordPress posts author data

☐ WP User Data

WordPress user data stored as user meta data in database

Email:

☐ I consent to have my email collected in order to process this request. See Privacy Policy page for more information.

SUBMIT

## Modify Right to be Forgotten Form

There are 2 ways to remove an option in the *Right to be Forgotten* form.

PERSONAL DATA ACCESS
FORGET ME
DATA RECTIFICATION

Below, you can browse services which collects your personal data on this website. Check services you wish to be forgotten by. This will send a request to the website admin. You will be notified by e-mail once this is done."

☐ **WooCommerce**  
WooCommerce gathers data entered by users in shop orders

☐ **WP Comments**  
WordPress Comments are data entered by users in comments

☐ **WordPress Posts**  
WordPress posts author data

☐ **WP User Data**  
WordPress user data stored as user meta data in database

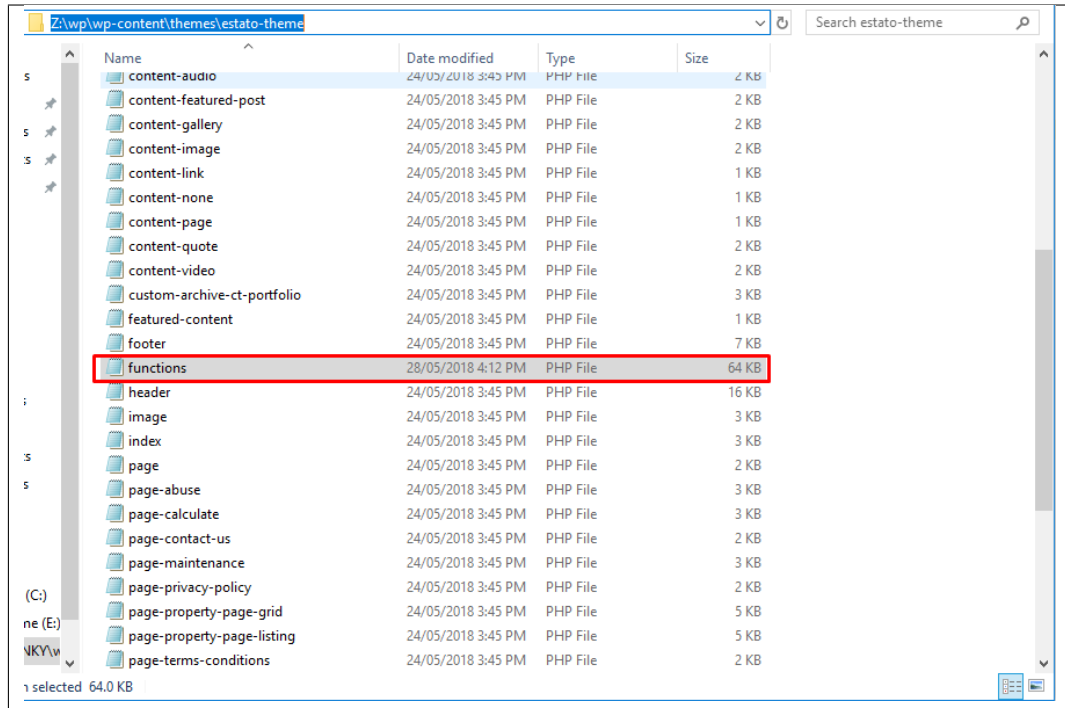

Email:

☐ I consent to have my email collected in order to process this request. See Privacy Policy page for more information.

**SUBMIT**

**Note:** This example will remove the WP Comment from the *Right to be Forgotten* form.

1. Adding a filter in the functions.php of the theme that is used

Add this filter in the file:

```
add_filter( 'ct_ultimate_gdpr_model_services_default', 'my_services' );
function my_services( $services ) {

    foreach( $services as $key => $val ) {
        if ( $val == 'CT_Ultimate_GDPR_Service_WP_Comments' ) {
            unset( $services[ $key ] );
        }
    }
    return $services;
}
```

## 2. Overwrite the Shortcode's template

Create a Php file in your theme with a file name: shortcode-myaccount.php

Then add this code in the file:

```

<?php

/** @var CT_Ultimate_GDPR_Service_Abstract $service */
foreach ( $options['services'] as $service ):

    if ( $service->get_id() == 'wp_comments' ) :
        continue;
    endif;

    ?>
    <div class="ct-ultimate-gdpr-service-options">
    <div class="ct-ultimate-gdpr-service-option">
    <input type="checkbox" name="ct-ultimate-gdpr-service-forget[]"
    value="<?php echo esc_attr( $service->get_id() ); ?>"
    </div>
    <div class="ct-ultimate-gdpr-service-details">
    <div class="ct-ultimate-gdpr-service-title"><?php echo esc_html( $service->
    ↪get_name() ); ?></div>
    <div class="ct-ultimate-gdpr-service-description"><?php echo esc_html(
    ↪$service->get_description() ); ?></div>
    </div>
    </div>

    <?php endforeach; ?>

```

## 2.10 Export/Import Options

Starting from Ultimate GDPR & CCPA v1.6.3, you can export or import the current *plugin settings* or the *services* from Service Manager of your Ultimate GDPR & CCPA Plugin.

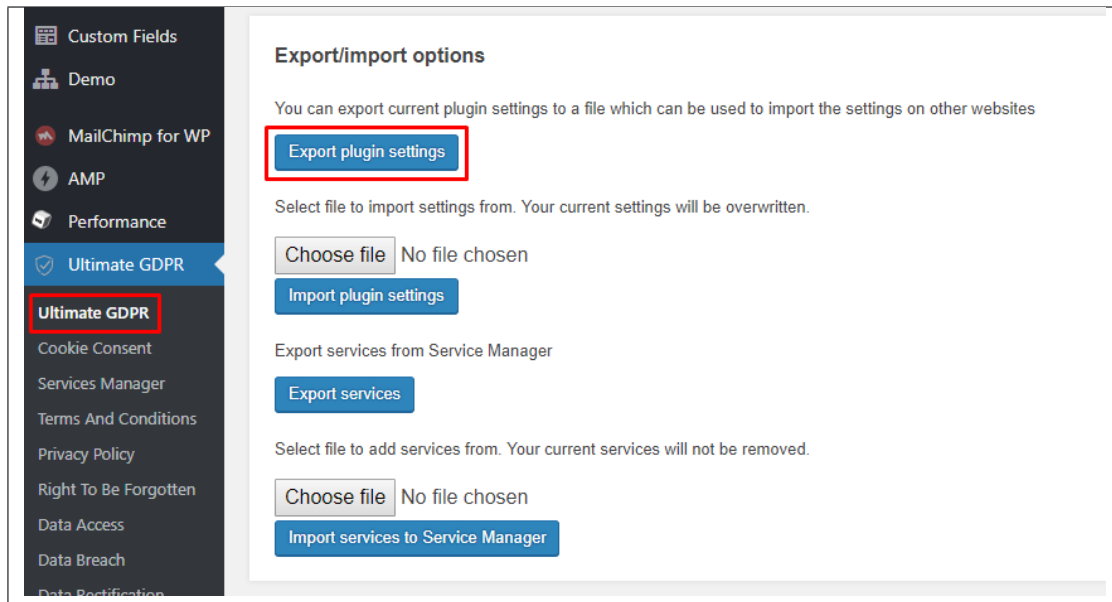

This will give you an efficient and fast way to copy your current GDPR settings to another site that has Ultimate GDPR & CCPA Plugin installed.

### 2.10.1 GDPR & CCPA Plugin Settings

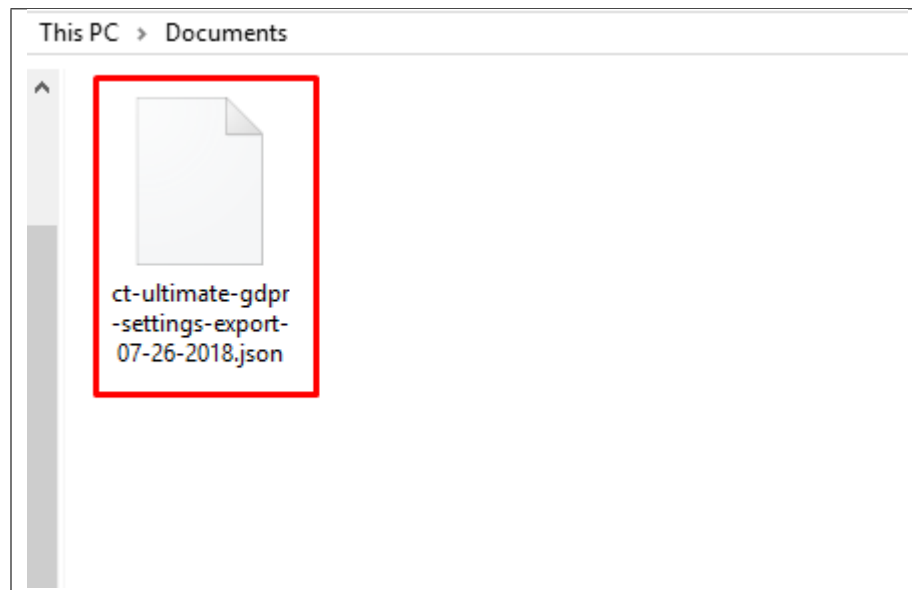

#### Export

To export the GDPR & CCPA Plugin Settings, follow these steps:

- In your dashboard, go to **Ultimate GDPR & CCPA > Ultimate GDPR & CCPA > Introduction tab**.
- Look for the **Export/import options** section of the page.
- Under Export/import options, you will see the **Export plugin settings** button.

- Click on the button and a .json file will be downloaded.
- This contains the settings from your Ultimate GDPR & CCPA Plugin. This can be used to import the settings.

## Import

To import the GDPR & CCPA Plugin Settings from a .json file from another GDPR & CCPA Plugin, follow these steps:

- In your dashboard, go to **Ultimate GDPR & CCPA > Ultimate GDPR & CCPA > Introduction tab**.
- Look for the **Export/import options** section of the page.
- Under Export/import options, you will see the **Choose file** button below the *Export plugin settings* button.

**Export/import options**

You can export current plugin settings to a file which can be used to import the settings on other websites

Export plugin settings

Select file to import settings from. Your current settings will be overwritten.

Choose file No file chosen

Import plugin settings

Export services from Service Manager

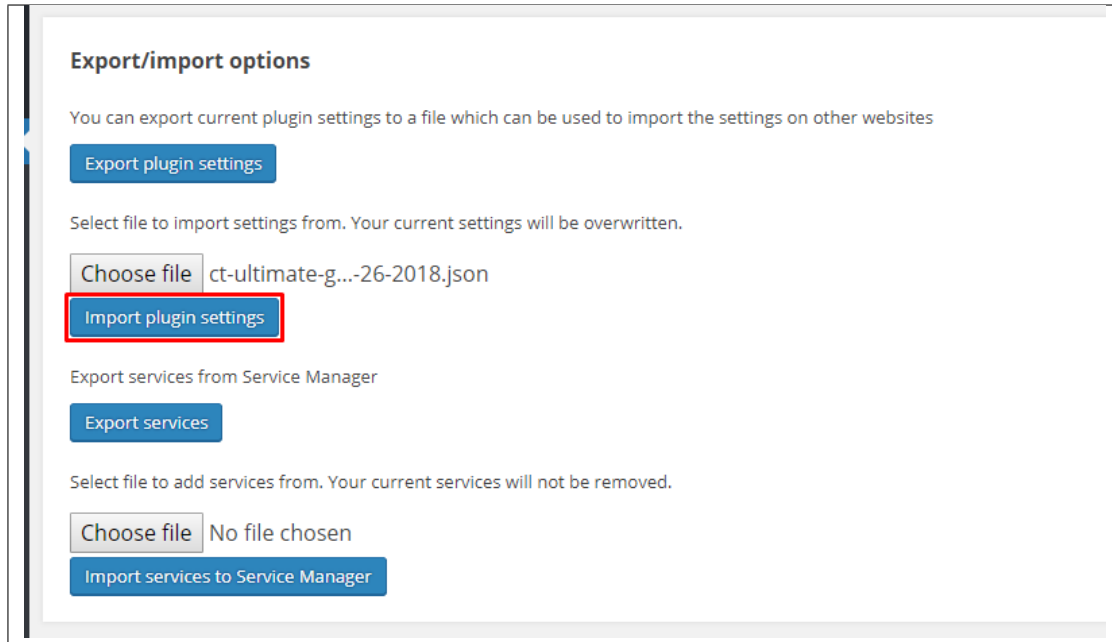

Export services

Select file to add services from. Your current services will not be removed.

Choose file No file chosen

Import services to Service Manager

- Click on the button and you will be asked to choose the .json file for the GDPR & CCPA Plugin.
- Once you have chosen a file, below the *Choose file* button you will see the **Import plugin settings** button.
- Click on the **Import plugin settings** button, this will import all the details in the .json file.

**Export/import options**

You can export current plugin settings to a file which can be used to import the settings on other websites

[Export plugin settings](#)

Select file to import settings from. Your current settings will be overwritten.

- You will see the changes in **Ultimate GDPR & CCPA > Services Manager**.

## INTEGRATION FOR ADDITIONAL PLUGINS

### 3.1 Integrate Ultimate GDPR & CCPA with Plugin

These are some of the hooks to declare for collecting data and compatibility.

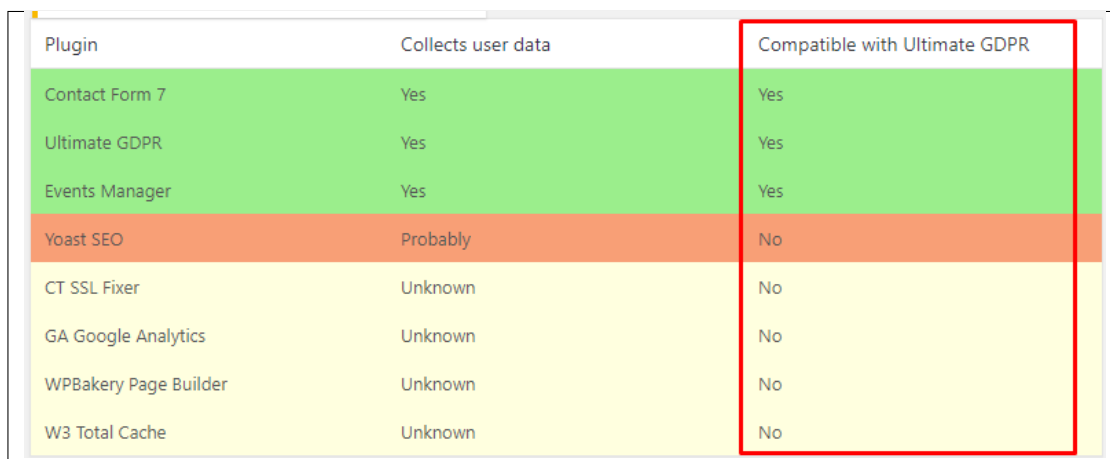

---

**Note:** PLUGIN\_NAME is the name of your plugin as in 'active\_plugins' wordpress option.

---

`ct_ultimate_gdpr_controller_plugins_compatible_PLUGIN_NAME`

This is used to declare whether or not the plugin is compatible with Ultimate GDPR & CCPA. The result will be shown in *Ultimate GDPR & CCPA > Plugins*.

Plugin	Collects user data	Compatible with Ultimate GDPR
Contact Form 7	Yes	Yes
Ultimate GDPR	Yes	Yes
Events Manager	Yes	Yes
Yoast SEO	Probably	No
CT SSL Fixer	Unknown	No
GA Google Analytics	Unknown	No
WPBakery Page Builder	Unknown	No
W3 Total Cache	Unknown	No

Example: **Woocommerce Ultimate Discount plugin:**

`ct-woocommerce-ultimate-discount/ctUltimateDiscount.php`

**Declare Compatible**

```
add_filter( "ct_ultimate_gdpr_controller_plugins_compatible_ct-
↳woocommerce-ultimate-discount/ctUltimateDiscount.php", '__return_true
↳' );
```

#### Declare Not Compatible

```
add_filter( "ct_ultimate_gdpr_controller_plugins_compatible_ct-
↳woocommerce-ultimate-discount/ctUltimateDiscount.php", '__return_
↳false' );
```

#### Declare Partly Compatible

```
add_filter( "ct_ultimate_gdpr_controller_plugins_compatible_ct-
↳woocommerce-ultimate-discount/ctUltimateDiscount.php", is_compatible_
↳);
function is_compatible() {
return CT_Ultimate_GDPR_Controller_Plugins::PLUGIN_COMPATIBLE_PARTLY;
}
```

#### ct\_ultimate\_gdpr\_controller\_plugins\_collects\_data\_PLUGIN\_NAME

This is used to declare whether or not the plugin collects any user data. The result will be shown in *Ultimate GDPR & CCPA > Plugins*.

Plugin	Collects user data	Compatible with Ultimate GDPR
Contact Form 7	Yes	Yes
Ultimate GDPR	Yes	Yes
Events Manager	Yes	Yes
Yeast SEO	Probably	No
CT SSL Fixer	Unknown	No
GA Google Analytics	Unknown	No
WPBakery Page Builder	Unknown	No
W3 Total Cache	Unknown	No

Example: **Woocommerce Ultimate Discount plugin:**

ct-woocommerce-ultimate-discount/ctUltimateDiscount.php

**Declare to collect**

```
add_filter( "ct_ultimate_gdpr_controller_plugins_collects_data_ct-
↳woocommerce-ultimate-discount/ctUltimateDiscount.php", '__return_true
↳' );
```

**Declare to not collect**

```
add_filter( "ct_ultimate_gdpr_controller_plugins_collects_data_ct-
↳woocommerce-ultimate-discount/ctUltimateDiscount.php", '__return_
↳false' );
```

**3.1.1 Extend Functionality of Ultimate GDPR & CCPA for Plugin**

You may extend functionality of Ultimate GDPR & CCPA by implementing services features for your plugin:

1. *Extend php class CT\_Ultimate\_GDPR\_Service\_Abstract or implement the CT\_Ultimate\_GDPR\_Service\_Interface interface*

**Example:**

```
class CT_Ultimate_GDPR_Service_Contact_Form_7 extends
CT_Ultimate_GDPR_Service_Abstract {
}
```

2. *Implement required methods (some actions can be left empty)*
3. *Add an object of your service to the array of services to be registered in Ultimate GDPR & CCPA:*

```
apply_filters( 'ct_ultimate_gdpr_load_services', array(), $options, $this->
↳services );
```

or, if you extended CT\_Ultimate\_GDPR\_Service\_Abstract, it will autoregister when instantiated.

4. *To add options to admin, utilize WordPress Options API function 'add\_settings\_field' on 'current\_screen' hook. This is hook automatically in abstract class by the 'add\_option\_fields' function.*

**3.1.2 Adding New Controller to the Plugin**

There is also a possibility of adding new controller (and therefore new menu page) to the plugin:

1. *Either extend php class CT\_Ultimate\_GDPR\_Controller\_Abstract or implement the CT\_Ultimate\_GDPR\_Controller\_Interface interface*

**Example:**

```
class CT_Ultimate_GDPR_Controller_Forgotten extends
CT_Ultimate_GDPR_Controller_Abstract {
}
```

2. Implement required methods (some actions can be left empty)
3. Add an object of your controller to the array of controllers to be registered in Ultimate GDPR & CCPA:

```
apply_filters( 'ct_ultimate_gdpr_controllers', array() );
```

4. To add a menu page, you can utilize 'add\_menu\_page' function if you extended the abstract class.
5. To add options to admin, please utilize WordPress Options API function 'add\_settings\_field'

## 3.2 WP Super Cache Integration

By integrating WP Super Cache with Ultimate GDPR & CCPA, it will allow to save custom cookies.

### Installation instruction for WP Super Cache

1. Create **wp-super-cache-plugins** folder in **wp-content/plugins/** and add [This file](#) (remember to unzip it).
2. To make it work, do the following:
  - Open **wp-content/wp-cache-config.php** and change the line under **\$wp\_cache\_plugins\_dir**:

From:

```
$wp_cache_plugins_dir = WPCACHEHOME . 'plugins';
```

To:

```
$wp_cache_plugins_dir = WP_CONTENT_DIR . "/plugins/wp-super-cache-
↳ plugins/";;
```

- In result, on Plugins page of WP Super Cache settings (/wp-admin/options-general.php?page=wpsupercache&tab=plugins) you will have only one plugin: this plugin, called Ultimate GDPR - WP Super Cache integration
3. Follow the instruction on the page **/wp-admin/options-general.php?page=wpsupercache&tab=plugins**.

## 3.3 Other Integration

### 3.3.1 Adding Fields to wp\_admin

- **add\_option\_fields()** - Function used to add fields to wp\_admin. A good example of usage is in class *service-context-form.php* or *service-bbpress.php*

### 3.3.2 Plugin with Forms

- **front\_action()** - If plugin has forms (for example contact form) you should add a function which injects consent checkbox which allows processing of data. You should add checkbox template to plugin's hooks.

Do not forget about validation for this field. You can use *service-bbpress.php::front\_action()* as an example.

### 3.3.3 If plugin stores any user data

If plugin stores any user data you should implement following functions:

- **collect()** - collects data stored by plugin
- **is\_forgettable()** - must return true
- **forget()** - handle removing data stored for given user
- **breach\_recipients\_filter()** - usually gets all users whose data is stored by plugin

### 3.3.4 If plugin creates cookies

- If plugin creates cookies you should list them like in *service-google-analytics.php::cookies\_to\_block\_filter()*.

It's a good idea to copy this function and update cookie names and *CT\_Ultimate\_GDPR\_Model\_Group::LEVEL\_*

### 3.3.5 If plugin adds cookies

- If plugin adds cookies using js functions, use **script\_blacklist\_filter()**.

It's similar to *cookies\_to\_block\_filter()*. Instead of cookie names, use some unique string which appears in the code.

## COMMON ISSUES

### 4.1 Incompatible with the Theme

There are thousands of plugins that are compatible with WordPress. Ultimate GDPR & CCPA is coded to be compatible with themes that are using WordPress Coding Standards, but some themes and plugins do not follow this standards and may cause issues with compatibility.

These are some steps to troubleshoot if there's error/s when Ultimate GDPR & CCPA is activated:

---

**Note:** Create a Backup for your site before doing these steps to prevent any issue with your site.

---

#### Check for Theme Conflicts

- Change into a default WordPress theme and check if the issue still persist.
- If the issue doesn't persist, the issue is caused by the theme.
- If the issue still persist, please proceed with **Check for Plugin Conflicts**.

### 4.2 Incompatible with Plugins

With the thousands of plugins that are available, one or more plugins have a chance to conflict with Ultimate GDPR & CCPA. We're doing our best to integrate plugins user's are using that are in conflict with Ultimate GDPR & CCPA.

To know which plugin is causing the conflict, follow this instructions:

#### Check for Plugin Conflicts

- Disable all the plugins except for Ultimate GDPR & CCPA. Check if the issue is there, if not proceed with these instruction.
- Activate plugins one at a time. After activating a plugin, check if the issue is there.
- If the issue is not there, deactivate the plugin again and activate another plugin. Repeat this process until the issue is recreated.
- If the issue is there, then this issue is due to this plugin.
- Check the plugin's settings if there is a setting that is making the conflict with Ultimate GDPR & CCPA.

For premium plugin integration, share test access to website with the mentioned plugin for faster integration.

You can also manually integrate plugins by following these [instructions](#).

### 4.3 Cookie Consent always visible

There are many factors that may affect the cookie consent from always showing.

These are some of the reasons why this happens:

- In most cases this is due to a caching plugin / caching module enabled in the server. Currently we have integration on most popular cache plugin (like WP Rocket Plugin). If you are using a caching plugin that is not integrated, the solution might be:
  1. Go to the Caching Plugin's settings and search for the option to "allow cookies".
  2. Add "ct-ultimate-gdpr-cookie" to allow GDPR cookies.
- Option in **Ultimate GDPR & CCPA > Cookie Consent > Advanced settings** - 'Show advanced cookie popup always, even when the consent is given' is enabled. This will show the trigger for the Cookie Advance Settings.
- Your server is running with old PHP version (<PHP 5.6) which causing the script to fail. Upgrading the server's PHP version will make the site secure and advanced.
  - To check what the PHP Version of the server, read this page: [LINK](#)
  - To update the PHP Version of the server, read this page: [LINK](#)
- There are javascript errors on your site (caused by other plugins/theme) which are causing the conflict.

### 4.4 Issues with 3rd Party Plugin

#### 4.4.1 After Accepting Cookie consent, popup is still visible

This issue might be due to a Cache plugin that is used in the site. To resolve this issue, please exclude the '**ct-ultimate-gdpr-cookie**' cookie from cache in the Caching plugin. Most of the Caching plugins have this option available, if you have problems finding it in the plugin, please contact the support of the Cache plugin.

#### WP Rocket Plugin

##### Accept cookies

- For issues where user have set to accept cookies but user still gets notice on every/selected pages, please check your Ultimate GDPR & CCPA version. This issue should be resolve from Ultimate GDPR & CCPA version 1.6.1 onwards.

---

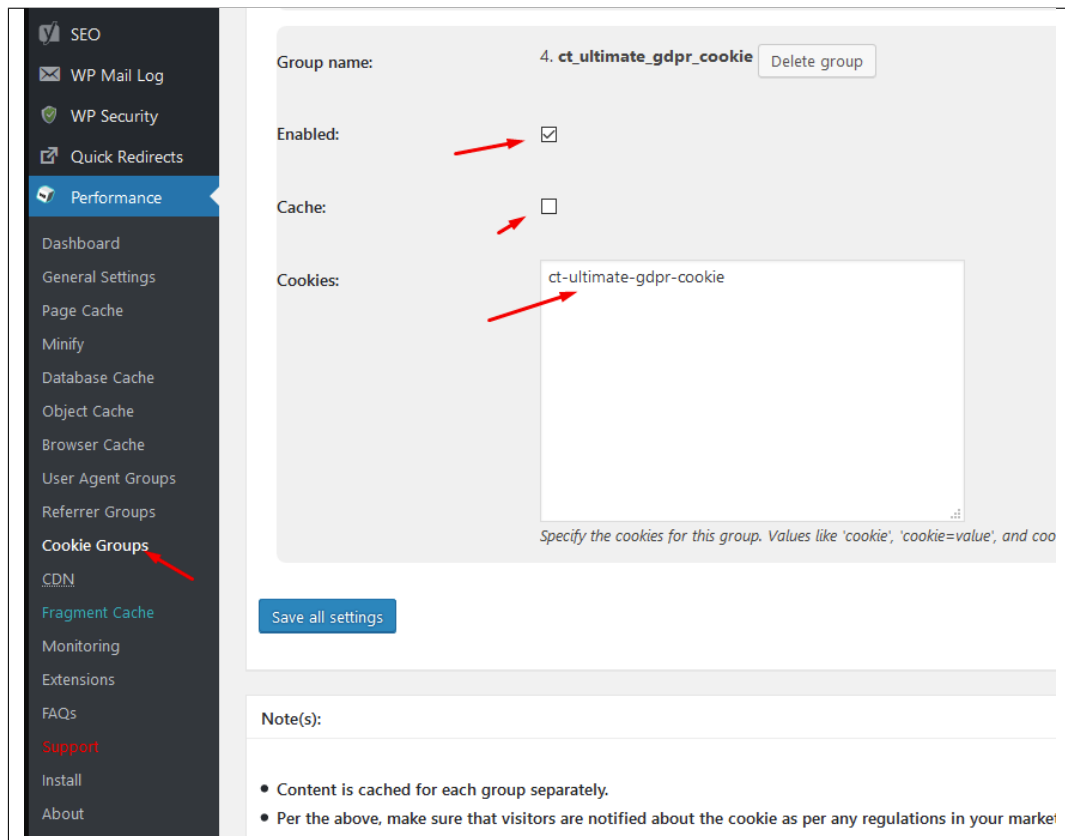

**Note:** For full compatibility with the WP Rocket (which require saving the WP Rocket's configurations files) make sure to either save WP Rocket options or save Ultimate GDPR & CCPA options (any) while Ultimate GDPR & CCPA plugin is active.

---

## Cookie Consent is not Saved

### W3 Total Cache

- Using W3 Total Cache plugin to enable caching.
- Go to **Cookie Groups** of W3 Total Cache and look for `ct_ultimate_gdpr_cookie`. Click on Enabled, uncheck Cache, and add **ct-ultimate-gdpr-cookie** in Cookies.

## 4.5 Fatal Error Fix

For issues with this error:

**Error:** Fatal error: Cannot redeclare tgmpa() (previously declared in home/siteURL/public\_html/wp-content/plugins/ct-ultimate-gdpr/vendor/optimus-prime-plugin-update/class-tgm-plugin-activation.php:2127) in home/siteURL/public\_html/wp-content/themes/personal\_folder/inc/plugins/class-tgm-plugin-activation.php on line 2118

Fatal error: Cannot redeclare tgmpa() (previously declared in home/siteURL/public\_html/wp-content/plugins/ct-ultimate-gdpr/vendor/optimus-prime-plugin-update/class-tgm-plugin-activation.php:2127) in home/siteURL/public\_html/wp-content/themes/personal\_folder/inc/plugins/class-tgm-plugin-activation.php on line 2118

A plugin to resolve this issue is created. To get this plugin, click on: [Ultimate GDPR & CCPA Fix](#)  
Install and activate this plugin.

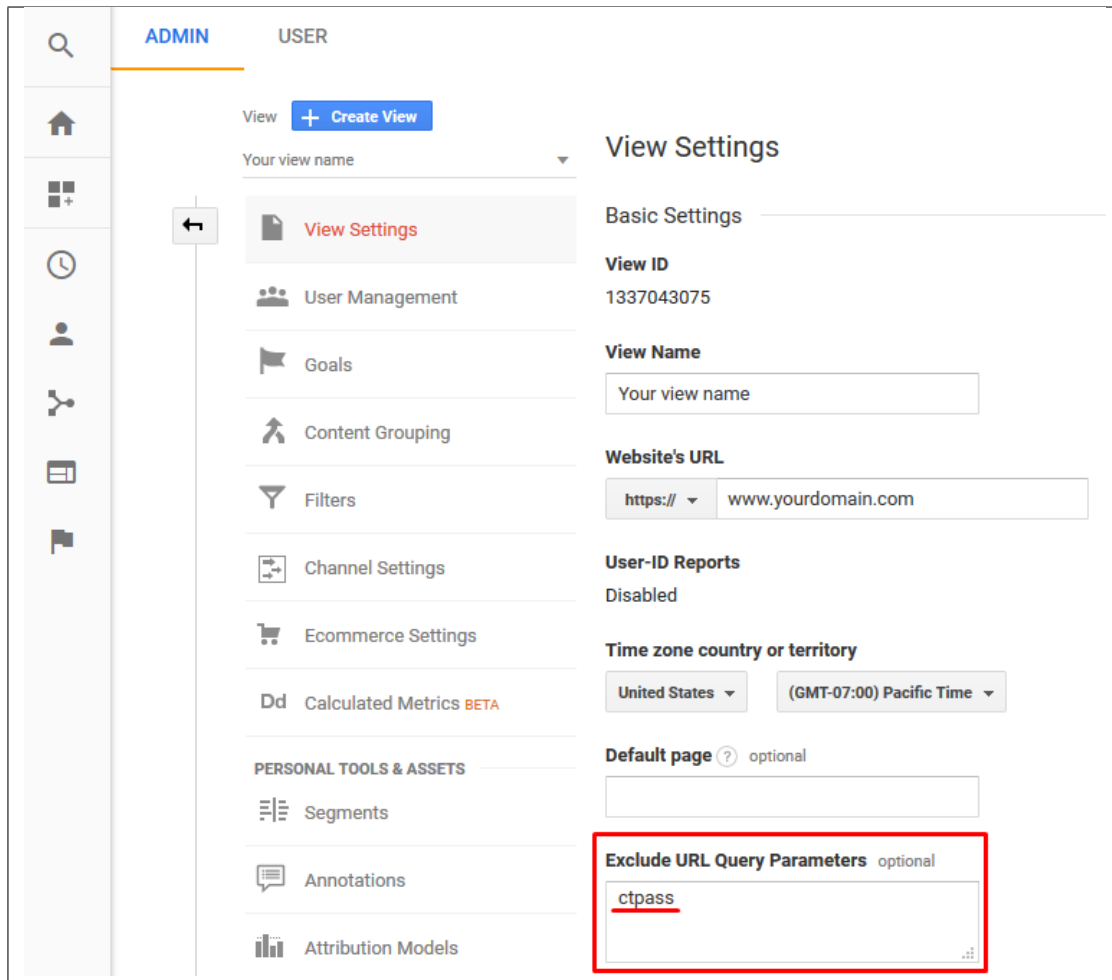

## 4.6 Cookie Scanner

### 4.6.1 Google Analytics

To exclude cookie scanner traffic from your Google Analytics, you can use **Exclude URL Query Parameters** option for your Google Analytics.

To do that:

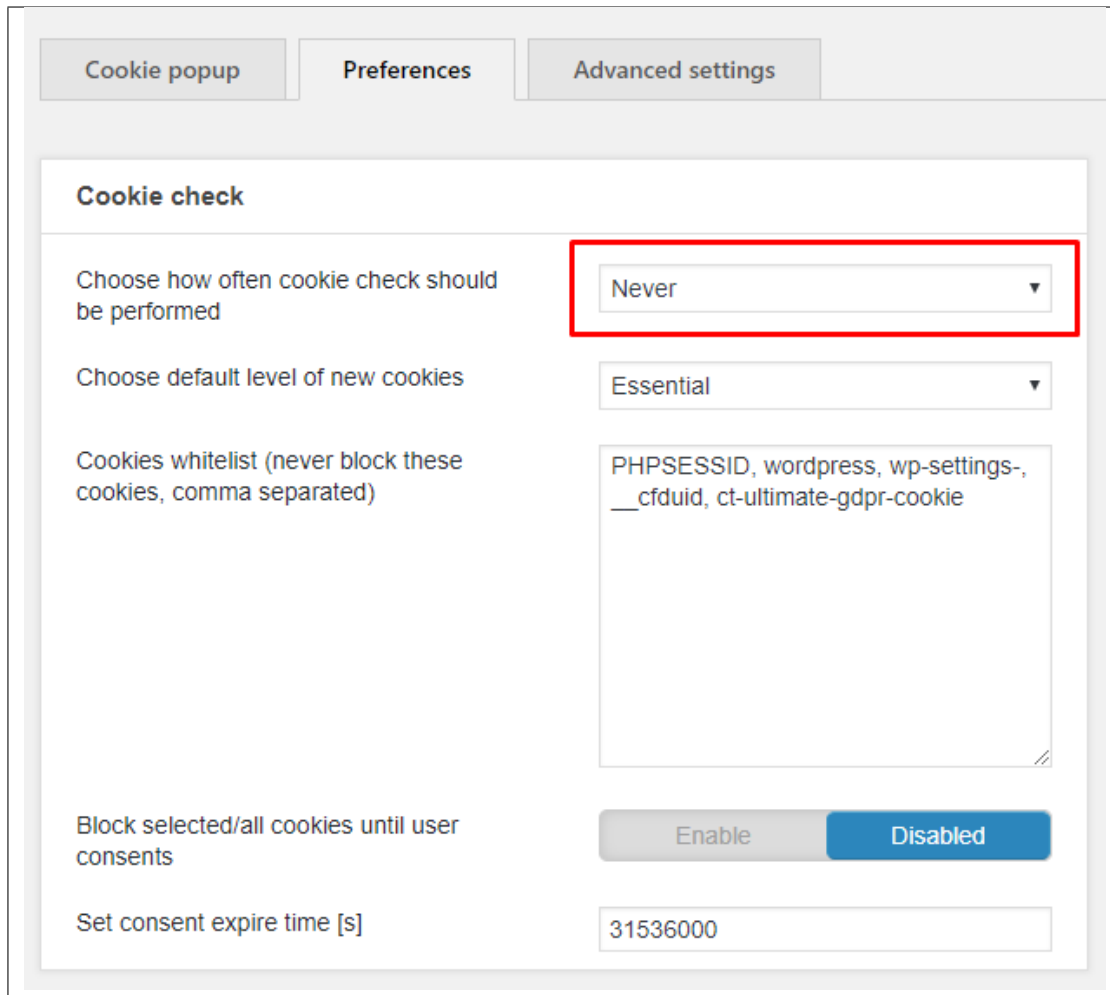

1. Log in to [Google Analytics](#) and go to **Admin > View > View Settings**.
2. In field “Exclude URL Query Parameters” add “ctpass” (without quotes).

#### 4.6.2 Plugin created gdpr-dummy@createit.pl account

The [gdpr-dummy@createit.pl](mailto:gdpr-dummy@createit.pl) is a dummy account which allows from (1.6.6) version of the plugin to gather all the cookies that are on the website using 'Scan for cookies' option. The purpose of the dummy account is to activate the cookies which normally would only show when some action is made on the pages (for example added product to cart.)

This account should be removed after the scan of the site is done. If you don't want it to be constantly created, on path **Ultimate GDPR & CCPA > Cookie Consent - Preferences** change the "Choose how often cookie scans should be performed" to **Never**. It will stop the plugin from creating this account constantly.

The screenshot shows the 'Cookie check' settings panel. It has three tabs: 'Cookie popup', 'Preferences', and 'Advanced settings'. The 'Cookie check' section contains the following options:

- Choose how often cookie check should be performed:** A dropdown menu with 'Never' selected. This option is highlighted with a red rectangular box.
- Choose default level of new cookies:** A dropdown menu with 'Essential' selected.
- Cookies whitelist (never block these cookies, comma separated):** A text area containing 'PHPSESSID, wordpress, wp-settings-, \_\_cfduid, ct-ultimate-gdpr-cookie'.
- Block selected/all cookies until user consents:** Two buttons, 'Enable' and 'Disabled'. The 'Disabled' button is highlighted in blue.
- Set consent expire time [s]:** A text input field containing '31536000'.

## 4.7 Advanced Custom Fields (ACF) Conflict

Plugins and themes which uses ACF may conflict with Ultimate GDPR & CCPA plugin.

To resolve this issue, you can add this plugin, [Ultimate GDPR ACF Fix](#), to your site.

A new version of Slider Revolution is available.

<input type="checkbox"/>	<b>Ultimate GDPR</b> <a href="#">Deactivate</a>   <a href="#">Translate</a>	Complete General Data Protection Regulation compliance toolkit plugin for WordPress. Version 1.6.3   By CreateIT
<input type="checkbox"/>	<b>Ultimate GDPR ACF Fix</b> <a href="#">Deactivate</a>   <a href="#">Translate</a>	Do not filter default ACF paths Version 1.0   By CreateIT
<input type="checkbox"/>	<b>WooCommerce</b> <a href="#">Settings</a>   <a href="#">Deactivate</a>   <a href="#">Translate</a>	An eCommerce toolkit that helps you sell anything. Beautifully. Version 3.4.3   By Automattic   <a href="#">View details</a>   <a href="#">Docs</a>   <a href="#">API docs</a>   <a href="#">Premium support</a>
<input type="checkbox"/>	<b>WooSidebars</b> <a href="#">Activate</a>   <a href="#">Translate</a>	Replace widget areas in your theme for specific pages, archives and other sections of WordPress. Version 1.4.5   By WooCommerce   <a href="#">View details</a>

This will resolve the conflict with Ultimate GDPR & CCPA's use of ACF with the plugin or premium theme that also uses ACF.

**Themes using ACF**

- MyListing Theme

**Plugins using ACF**

- WooCommerce Attach Me!

## 4.8 Missing information about available update

If the information about the available update is missing from your plugin section or you wish to always be sure you are using the latest version of the Ultimate GDPR & CCPA plugin please add:

**`add_filter( 'auto_update_plugin', '__return_true' );`**

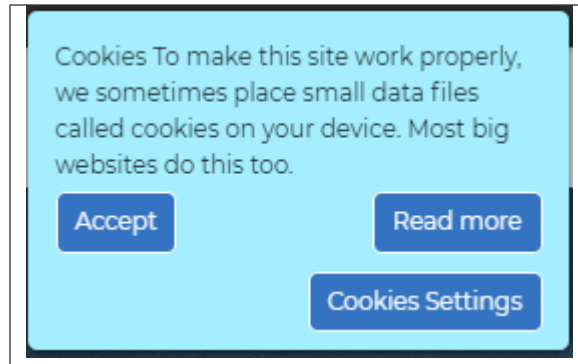

to **functions.php** file, which will allow all the pages used by the site to auto-update instead of having to click the 'update link'.

## PLUGIN TRANSLATION

### 5.1 Translate GDPR & CCPA Plugin

#### 5.1.1 How to translate cookie popup

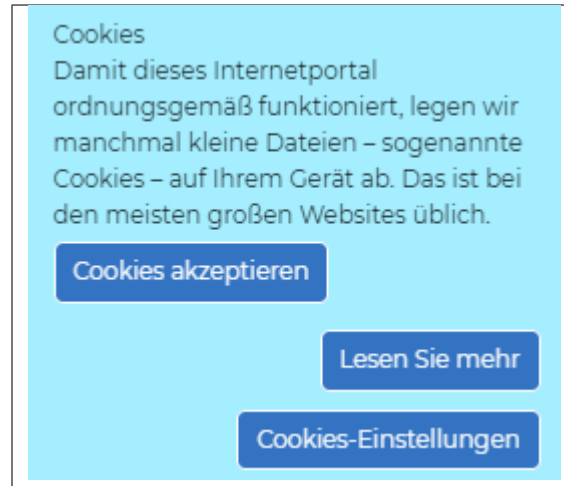

To translate the cookie popup of the Ultimate GDPR & CCPA plugin, you can use the PO and MO files in the plugin to translate it. Click [here](#) for instructions how.

You can also use plugins to translate it, like [WordPress Multilingual Plugin \(WPML Plugin\)](#) or [Loco Translate](#).

---

**Note:** **Fill in with default content for selected language (remember to save changes)**, translates the default contents in the Cookie Popup Content of the plugin. These will generate the translations of the default contents, if you have changed any of the text content it will not be translated.

These are the parts that will be translated:

### 5.1.2 How to translate Advance cookie settings

## PRIVACY SETTINGS

Decide which cookies you want to allow. You can change these settings at any time. However, this can result in some functions no longer being available. For information on deleting the cookies, please consult your browser's help function.

[Learn more about the cookies we use.](#)

WITH THE SLIDER, YOU CAN ENABLE OR DISABLE DIFFERENT TYPES OF COOKIES:

Block all

☐

Essentials

☒

Functionality

☒

Analytics

☐

Advertising

☐

**THIS WEBSITE WILL**

- ✓ Essential: Remember your cookie permission setting
- ✓ Essential: Allow session cookies
- ✓ Essential: Gather information you input into a contact forms newsletter and other forms across all pages
- ✓ Essential: Keep track of what you input in shopping cart
- ✓ Essential: Authenticate that you are logged into your user account
- ✓ Essential: Remember language version you selected
- ✓ Functionality: Remember social media settings
- Functionality: Remember selected region and country

**THIS WEBSITE WON'T**

- ✗ Analytics: Keep track of your visited pages and interaction taken
- ✗ Analytics: Keep track about your location and region based on your IP number
- ✗ Analytics: Keep track on the time spent on each page
- ✗ Analytics: Increase the data quality of the statistics functions
- ✗ Advertising: Tailor information and advertising to your interests based on e.g. the content you have visited before. (Currently we do not use targeting or targeting cookies)
- ✗ Advertising: Gather personally identifiable information such as name and location

**SAVE & CLOSE**

To translate the Advance cookie settings of the Ultimate GDPR & CCPA plugin, if you're using the default content go to **Ultimate GDPR & CCPA > Cookie Consent > Cookie popup tab**.

In Cookie popup content, choose the language you want to use in **Fill in with default content for selected language (remember to save changes)**.

Load the language and you will see that the text areas for the contents have the default content translated. Click **Save**

**Changes** to save.

You can also use plugins to translate it, like [WordPress Multilingual Plugin \(WPML Plugin\)](#) or [Loco Translate](#).

**Note:** When using this option all the changes have added/changed in the text content will revert to the default content of the language you have chosen. To prevent the reversion, use this method then make the changes.

### 5.1.3 How to translate forms

MOJE OSOBNÍ ÚDAJE   **ZAPOMEŇTE NA MNE**   OPRAVA DAT

Níže se můžete podívat na služby, které sbírají vaše osobní data na této stránce. Zaškrtněte služby, u kterých chcete být zapomenuti. Odešle se požadavek administrátorovi stránky. O dokončení budete upozorněni e-mailem."

- ☐ **WooCommerce**  
WooCommerce gathers data entered by users in shop orders
- ☐ **WP Comments**  
WordPress Comments are data entered by users in comments
- ☐ **WordPress Posts**  
WordPress posts author data
- ☐ **WP User Data**  
WordPress user data stored as user meta data in database

Email:

☐ Pro zpracování tohoto požadavku souhlasím s poskytnutím mého e-mailu. Více informací naleznete na stránce s ochranou osobních údajů.

**ODESLAT**

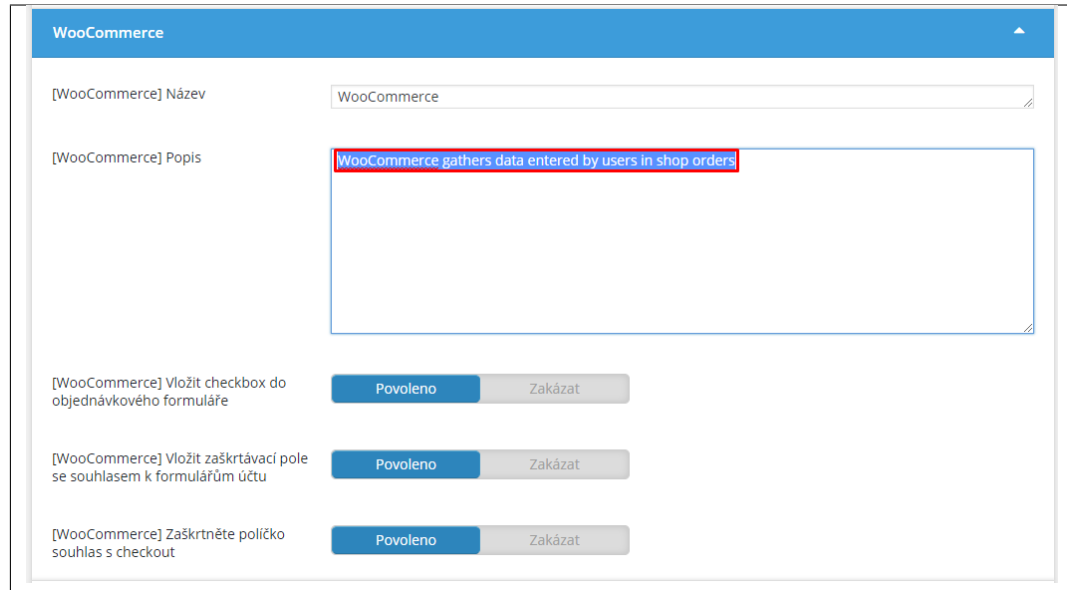

There are 2 ways to translate the form: **Translate Default Text** or **Translate Manually**

- **Translate Default Text**

To translate the forms of the Ultimate GDPR & CCPA plugin, you can use the PO and MO files in the plugin to translate it. Click [here](#) for instructions how.

To use the translation of the default text in the forms, go to **Ultimate GDPR & CCPA > Services**.

Delete the text inside the textbox for description on the service that you want to be translated.

WooCommerce

[WooCommerce] Název: WooCommerce

[WooCommerce] Popis: WooCommerce gathers data entered by users in shop orders

[WooCommerce] Vložit checkbox do objednávkového formuláře: ☒ Povoleno ☐ Zakázat

[WooCommerce] Vložit zaškrtnuté pole se souhlasem k formulářům účtu: ☒ Povoleno ☐ Zakázat

[WooCommerce] Zaškrtněte políčko souhlas s checkout: ☒ Povoleno ☐ Zakázat

- **Translate Manually**

To translate the forms manually, go to **Ultimate GDPR & CCPA > Services**. Go to the service that you want to be translated.

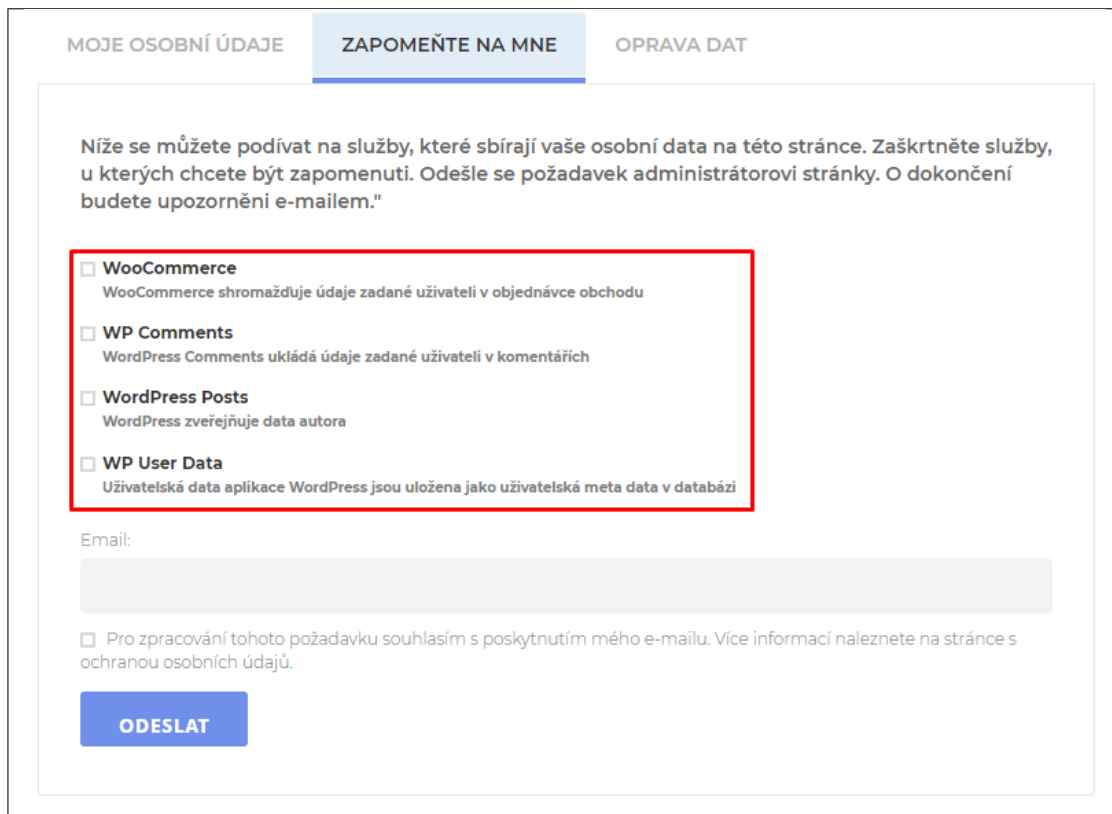

For example, WooCommerce:

Add the translation in the textbox for description.

You can also use plugins to translate it, like [WordPress Multilingual Plugin \(WPML Plugin\)](#) or [Loco Translate](#).

## 5.2 Multilingual website

For Multilingual websites, you can use plugins to translate GDPR & CCPA to 2 or more languages.

### 5.2.1 WordPress Multilingual Plugin (WPML Plugin)

To use this option, you need to have installed WordPress Multilingual Plugin (WPML Plugin), which you can buy [here](#).

---

**Note:** This plugin isn't part of the GDPR & CCPA Plugin bundle, to use this function you must have the WPML Plugin.

---

Follow how to translate using [WordPress Multilingual Plugin \(WPML Plugin\)](#).

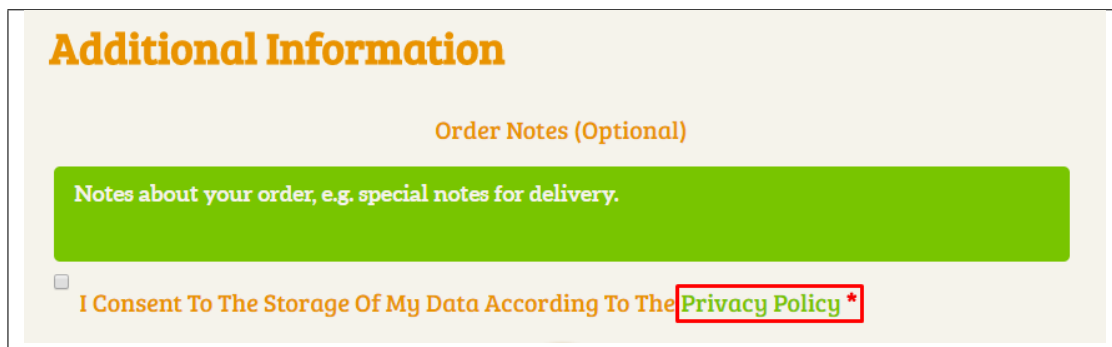

### 5.2.2 Loco Translate

Loco Translate is a free plugin for translation, which you can download [here](#).

Loco Translate will use the PO and MO file to translate the plugin.

Follow how to translate using [Loco Translate](#).

### 5.2.3 How to translate “Privacy Policy” text in the consent checkbox

The screenshot shows a form with a title "Additional Information" in orange. Below the title is a section labeled "Order Notes (Optional)" in orange. Under this label is a green rectangular box containing the text "Notes about your order, e.g. special notes for delivery." Below the green box is a checkbox with a small square icon. To the right of the checkbox is the text "I Consent To The Storage Of My Data According To The Privacy Policy \*". The words "Privacy Policy" are highlighted with a red rectangular border.

For multilingual sites, the Privacy Policy link in the consent checkbox needs to be manually translated in **Ultimate GDPR & CCPA > Privacy Policy** under *Convert the following text to Privacy Policy link in all services templates, eg. 'Privacy Policy'*.

Page to redirect to after Privacy Policy accepted: Last visited page

Shortcode Button Styling: Theme Default

Set consent expire time [s]: 31536000

Privacy Policy version, eg. 1.0 (if you change it, user has to give consent again): 1.0

Redirect to Privacy Policy first (if Terms and Conditions also redirect):

Convert the following text to Privacy Policy link in all services templates, eg. "Privacy Policy": Privacy Policy

Do not block user agents (eg. bots) containing the following texts (comma separated): bot, crawl, slurp, spider, mediapartners

Press "Save changes" before downloading logs if you changed any options

Thank you for creating with WordPress.

Version 4.9.7

Add the translations, separated by a comma, for every language that is used in the site.

Convert the following text to Privacy Policy link in all services templates, eg. "Privacy Policy": Privacy Policy, Datenschutzerklärung, Politique de confidentialité, Política de privacidad

Sample in Spanish:

Sample without translation set:

**Additional Information**

**Notas Del Pedido (Opcional)**

Notas sobre tu pedido, por ejemplo, notas especiales para la entrega.

☐ Consiento El Almacenamiento De Mis Datos De Acuerdo Con La Política De Privacidad \*

Sample with translation:

### Additional Information

Notas Del Pedido (Opcional)

Notas sobre tu pedido, por ejemplo, notas especiales para la entrega.

☐ Consiento El Almacenamiento De Mis Datos De Acuerdo Con La [Política De Privacidad \\*](#)

#### 5.2.4 How to translate Enter custom subheader for 'Unsubscribe' tab in 'my account' shortcode

AGE VERIFICATION PERSONAL DATA ACCESS FORGET ME DATA RECTIFICATION UNSUBSCRIBE

Removal of your data will not limit in any way the system functionalities

Below, you can browse services which sign up users to newsletters. Check services which newsletters you wish to be unsubscribed from. The subscription will stop immediately.

☐ **Do not sell my information**  
Request not to sell personal information

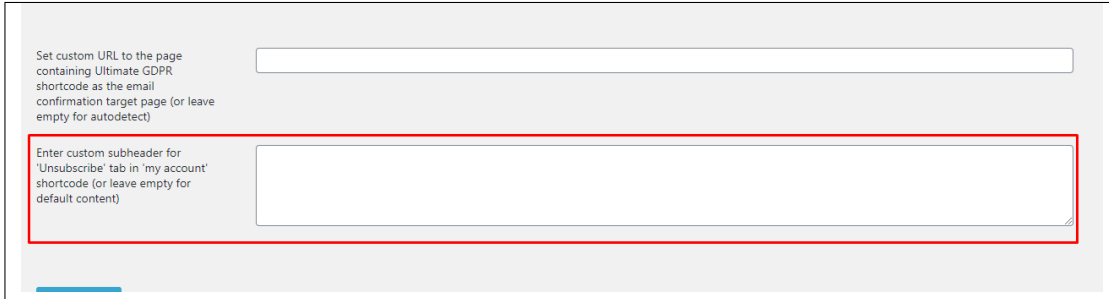

Email:

☐ I consent to have my email collected in order to process this request. See [Privacy Policy](#) page for more information.

**SUBMIT**

## Single language website

If the site uses only one language version and it is not English, the only way to use the phrase in the correct language is to enter it directly to the textarea available on path **\*Ultimate GDPR & CCPA > Unsubscribe > Enter custom subheader** for 'Unsubscribe' tab in 'my account' shortcode (or leave empty for default content)

## Multilingual website

To translate this phrase for a multilingual page please follow [WordPress Multilingual Plugin \(WPML Plugin\)](#).

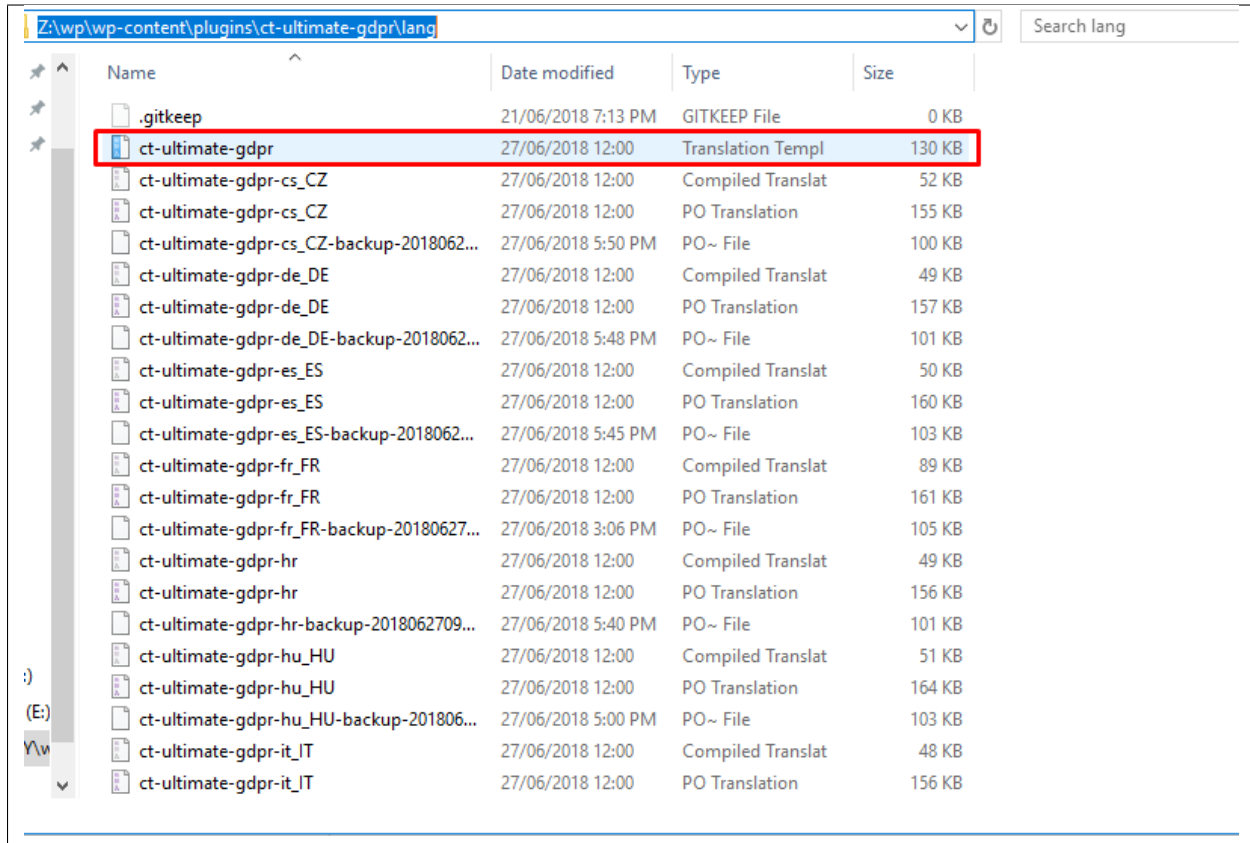

## 5.3 Translate Using POT file

To translate the plugin, it will need a POT (Portable Object Template) file to work.

POT is generated from plugin files and contain all phrases from the plugin that can be translated to a different language.

---

**Note:** The POT file for this plugin is **ct-ultimate-gdpr.pot**, and the path to it is **/wp-content/plugins/ct-ultimate-gdpr/lang/**

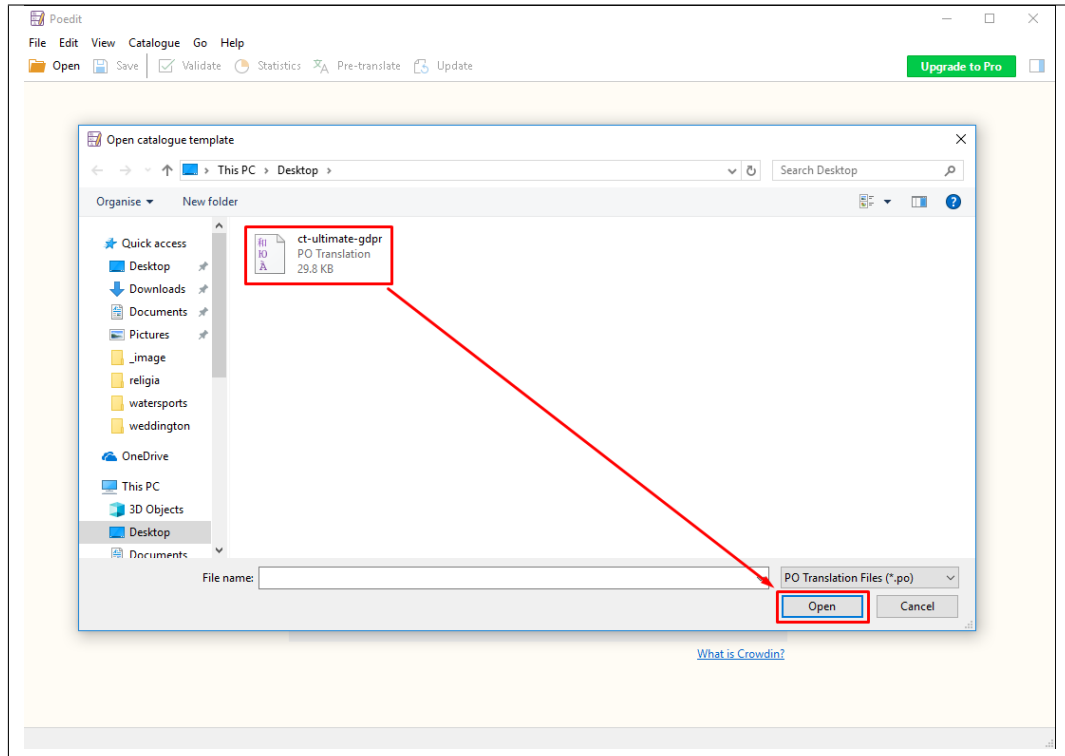

The translation editor will create PO (Portable Object) and MO (Machine Object) file from the plugin POT file. The only file we are able to edit is the PO file.

In the PO file, we are saving both English and the translations for this phrases. All translations you created are added there. Saving the changes there will also update the MO file that is used by the plugin.

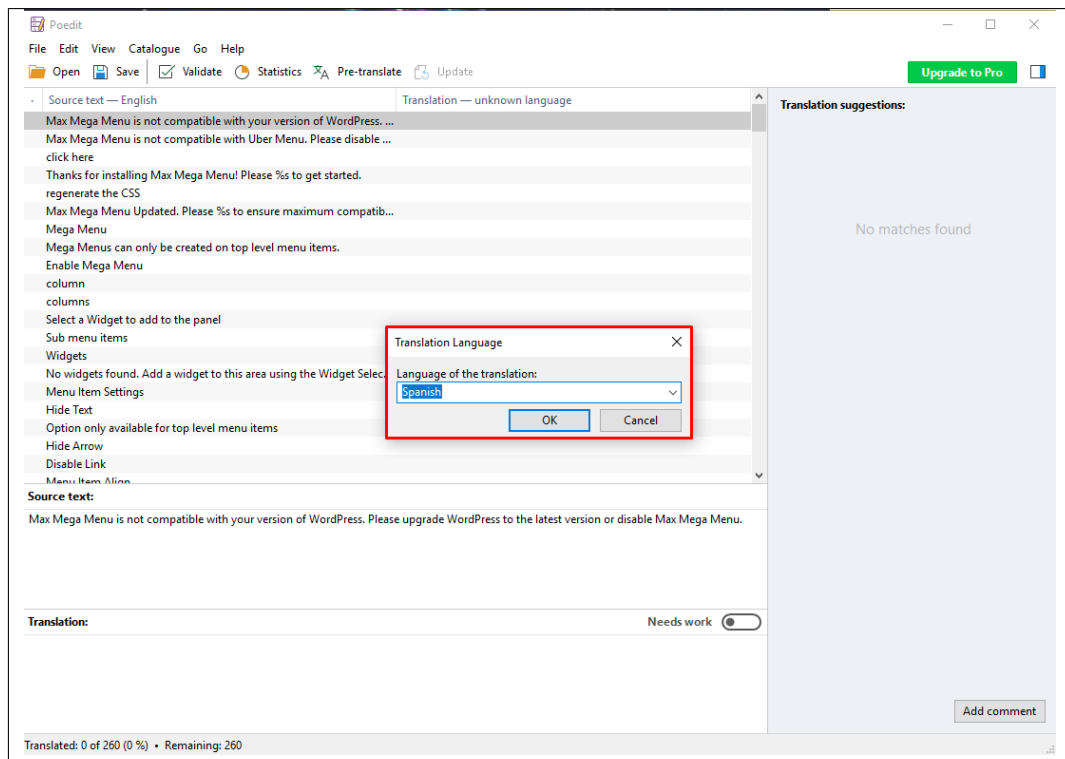

### 5.3.1 How to translate plugin using Poedit

**Note:** To ensure that plugin will work correctly, don't translate the string **Ultimate GDPR & CCPA plugin**.

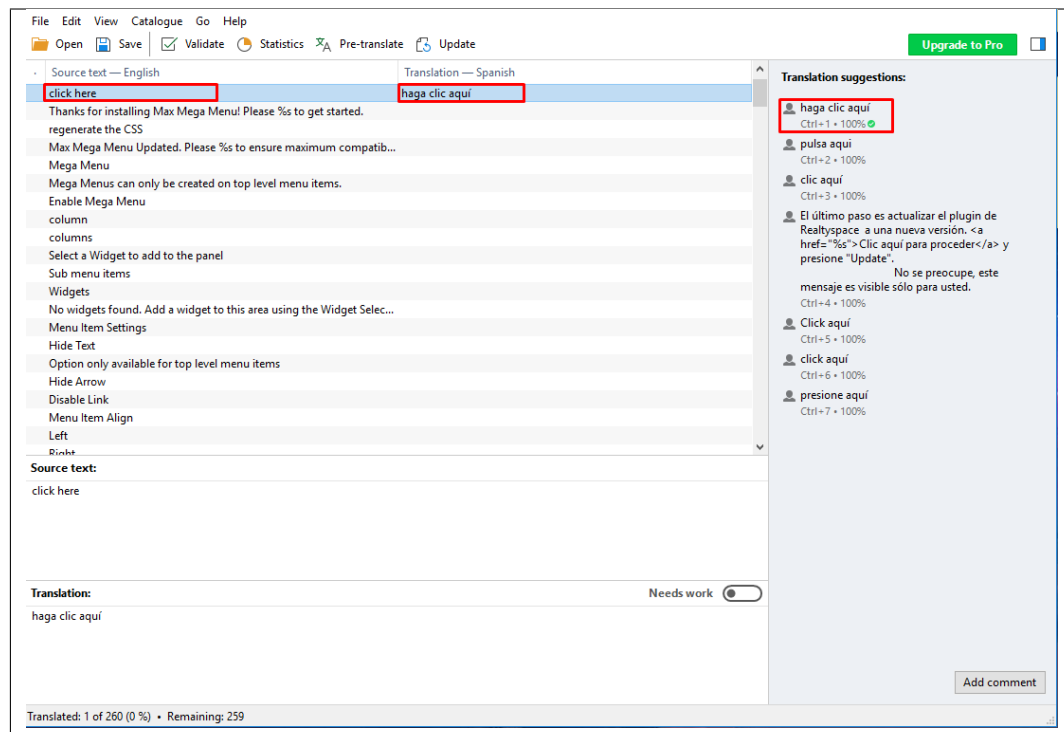

- Install a translation editor like [Poedit](#).
- Copy the **ct-ultimate-gdpr.pot** file from `/wp-content/plugins/ct-ultimate-gdpr/lang/`. Paste it on the desktop of your computer.
- Open the Poedit application and click on *Create new translation* option.
- Choose the PO file to translate.

- You will be asked what language to translate the file into, choose the language as to what you need.

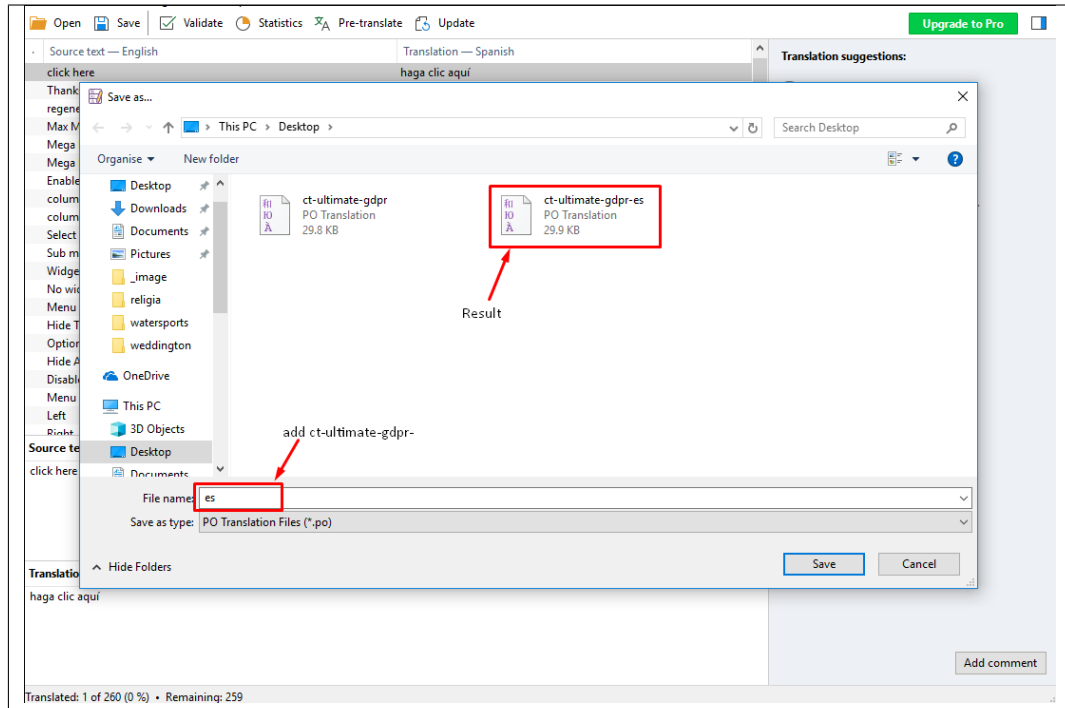

- You will see at the Poedit application that at the left side are the **Source Text** (English words) and at the right side are the **Translations**.
- When you click on a word from the source text, at the very right side you will see **Translation Suggestions** for the word that was clicked.
- You can add your translation at the **Translation:** area at the bottom or click on the best of the suggested translations of the word.

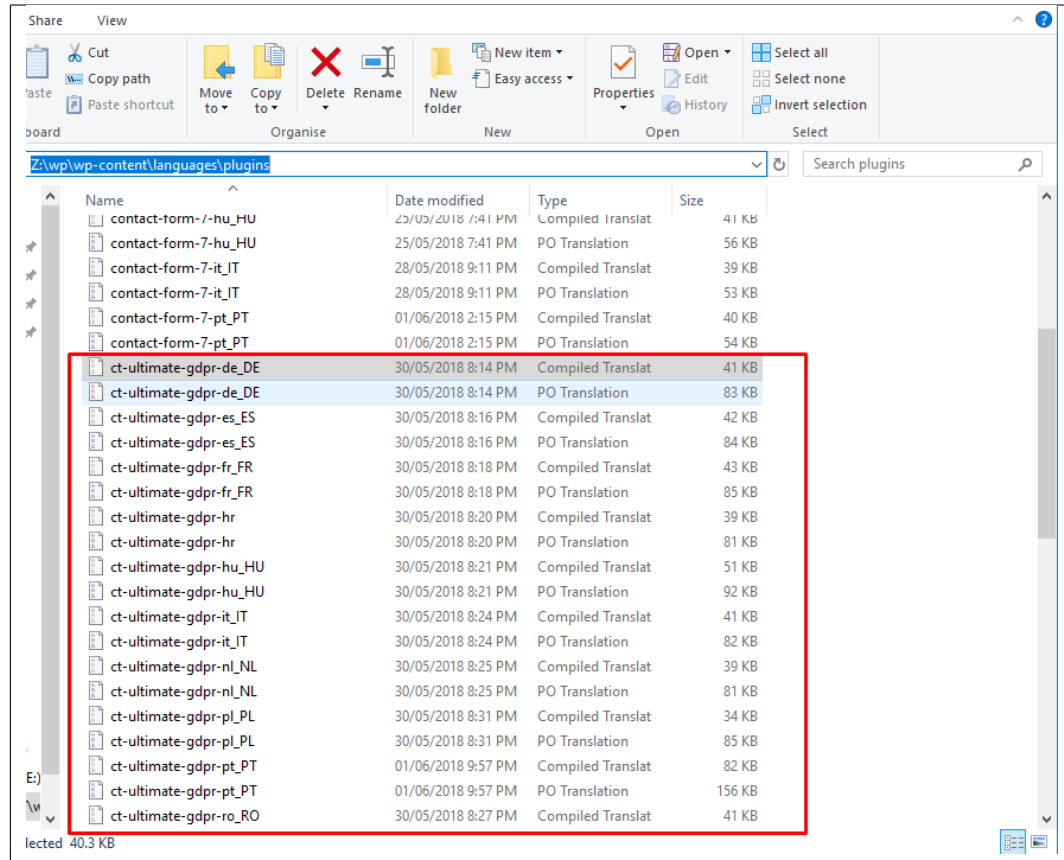

- Click on a word from the source text one by one and translate.
- Once done translating the words in the Source text, save the file.
- When saving a file, “ct-ultimate-gdpr-” should be added to the default file name.

- Once saved, it will create a PO and MO file.
- Copy the PO and MO file to the WordPress language directory located at `/wp-content/languages/plugins/`.

- In your WP, activate the GDPR & CCPA plugin. Once activated, navigate your dashboard to **Settings > General**.
- You will see the General Settings of your site. To activate the translation, look for the Site Language and select the one that you like.

The screenshot shows the WordPress 'General' settings page. The 'Site Language' dropdown menu is highlighted with a red rectangular box and is currently set to 'Español'. Below this, the 'Timezone' is set to 'UTC+0'. A note indicates to choose either a city in the same timezone or a UTC offset. The 'Universal time (UTC)' is shown as '2018-04-13 05:57:46'. The 'Date Format' section has five radio button options: 'April 13, 2018' (selected), '2018-04-13', '04/13/2018', '13/04/2018', and 'Custom:'. Each option has a corresponding format preview. The 'Time Format' section has five radio button options: '5:57 am' (selected), '5:57 AM', '05:57', and 'Custom:'. Each option has a corresponding format preview. A link for 'Documentation on date and time formatting' is provided. The 'Week Starts On' dropdown is set to 'Monday'. A blue 'Save Changes' button is located at the bottom left of the settings area.

- After selecting the site language, click the Save Changes button and a loading icon will show. Once the loading icon disappear, the translation should be done.

For more information on how to translate a plugin using Poedit, click this [link](#).

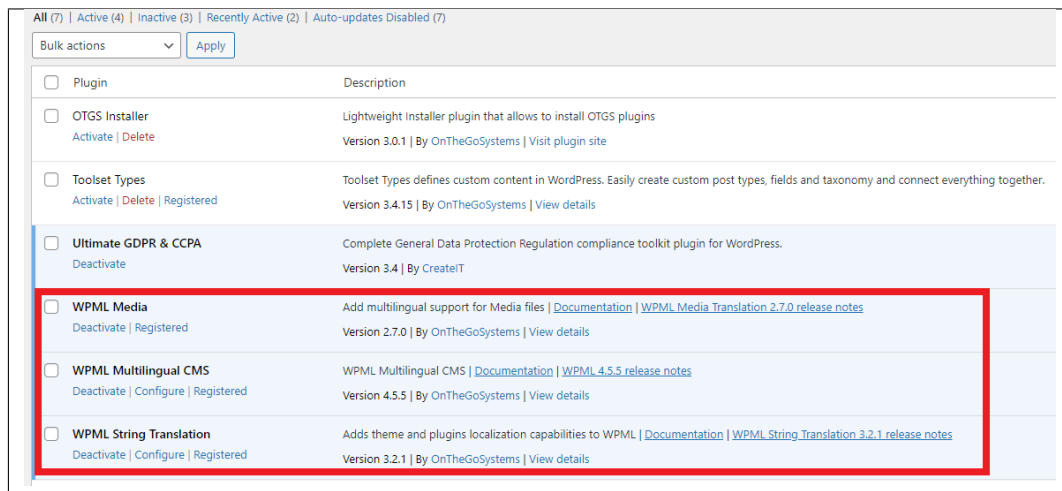

## 5.4 Translate Using WPML Plugin

To use this option, you need to have installed WordPress Multilingual Plugin (WPML Plugin), which you can buy [here](#).

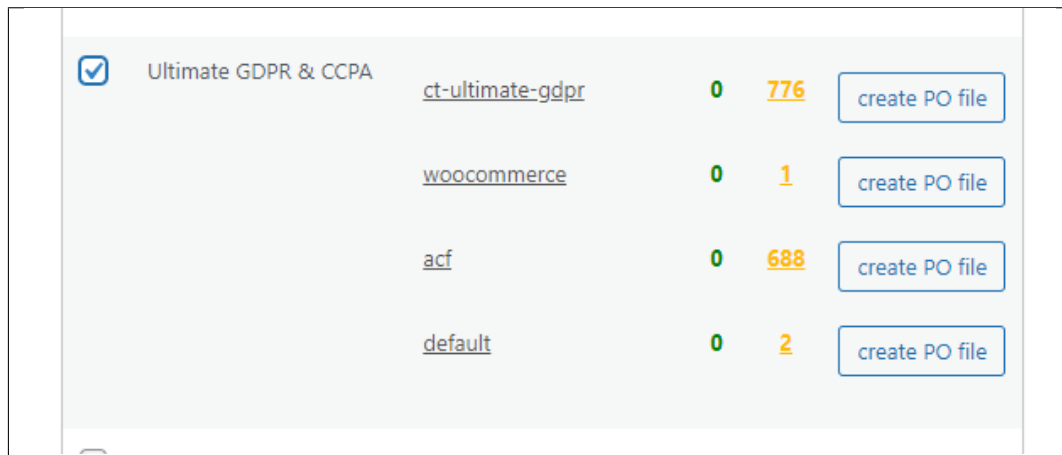

**Note:** This plugin isn't part of the GDPR & CCPA Plugin bundle, to use this function you must have the WPML Plugin.

To be able to fully integrate the translation functionality of WPML plugin:

- Install the WPML Plugin in your site. Once installed, activate these plugins:

- You will be asked to setup the WPML Plugin after you have installed it.
- Go to *WPML > Theme and plugins localization*, scroll down and look for **Ultimate GDPR & CCPA** under *Strings in the plugins*. Click the checkbox at the side and click on **Scan selected plugins for strings** button at the bottom of the page.

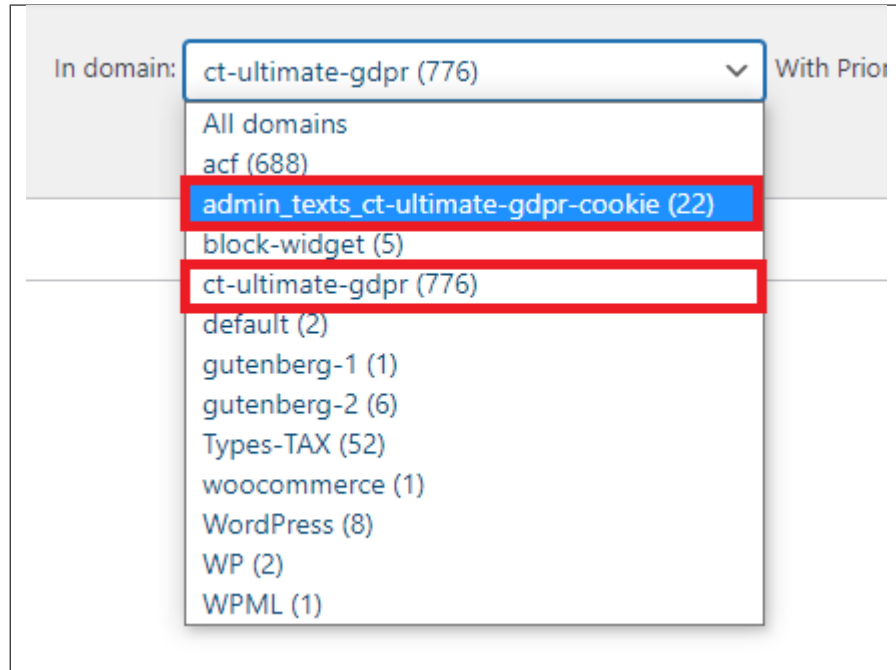

- This should scan all the string in the plugin.

- Go to *WPML > String Translation*, click on the drop-down box for *In domain* and look for the domain for Ultimate GDPR & CCPA.

---

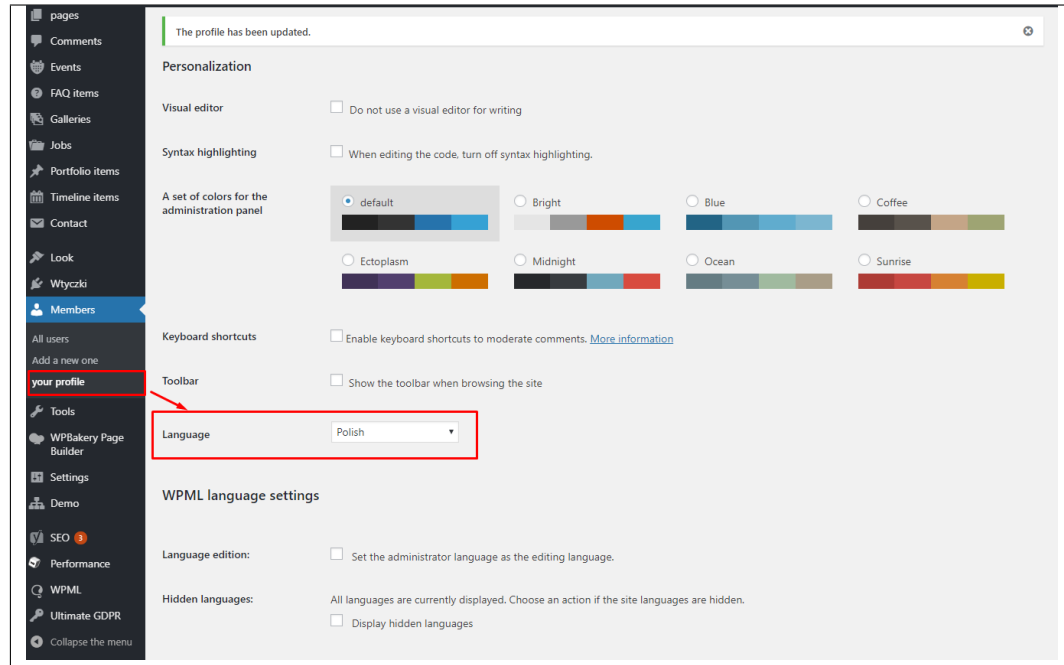

**Note:** The strings in Ultimate GDPR & CCPA are separated by parts.

- **admin\_texts\_ct-ultimate-gdpr-cookie** - The strings in the cookie advance settings.
- **ct-ultimate-gdpr** - Other string use by the plugin.

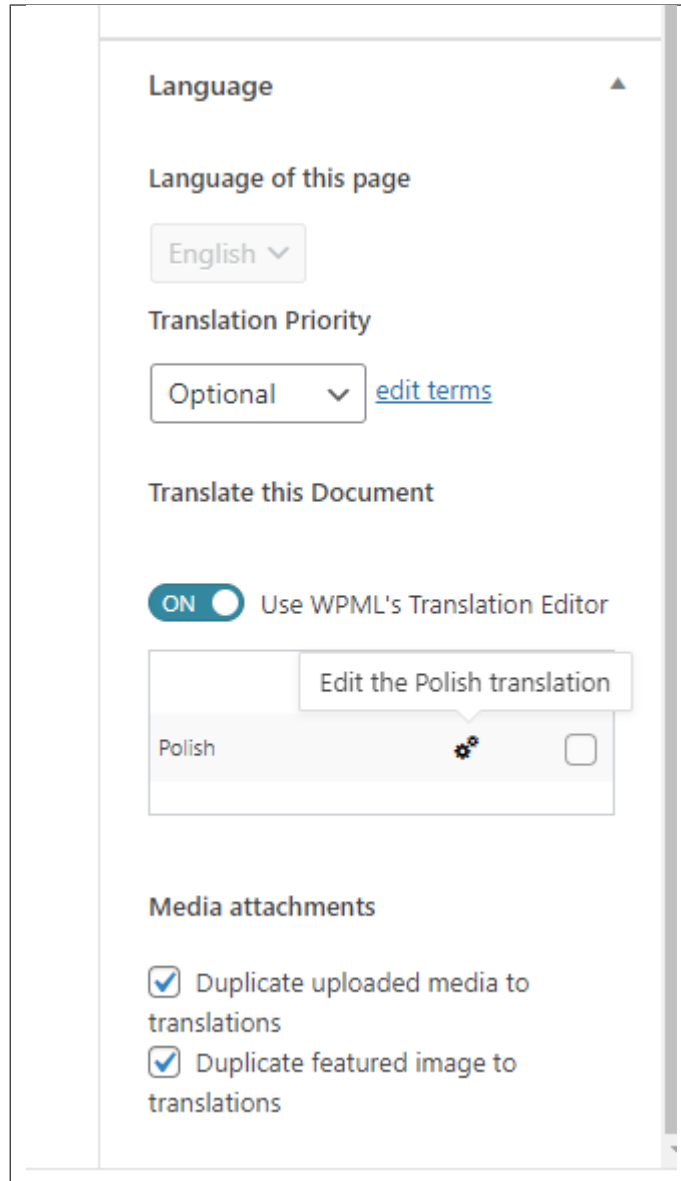

- 
- Choose a string to translate, click + and add the translation of the string by language.

- Go to *Pages* and create a new page for the translated pages. For the popup, once you have translated the strings, it should automatically translate.
- If you already have pages created, click on the page created. Look for the *Language* section of the page. Click on the plus sign or gear sign for the language you would like translate. This will open a page to create a translated version of the page of the language.

- Go to *Appearance > Menu* and create a new menu for the pages.
- If you already have menus created, choose a menu to add to the translated language site. Click on *Synchronize menus between languages*, Click on the *Sync* button.

Menu structure

PERSONAL DATA ACCESS [FORGET ME](#)

Email:

☐ I consent to my email being collected in order to receive my requested data. See Privacy Policy page for more information.

[SUBMIT](#)

### Sample Polish

DOSTĘP DO DANYCH OSOBOWYCH [FORGET ME](#)

Email:

☐ Wyrażam zgodę na odebranie mojej wiadomości e-mail w celu otrzymania żądanych danych. Zobacz stronę Polityki prywatności, aby uzyskać więcej informacji.

[ZATWIERDŹ](#)

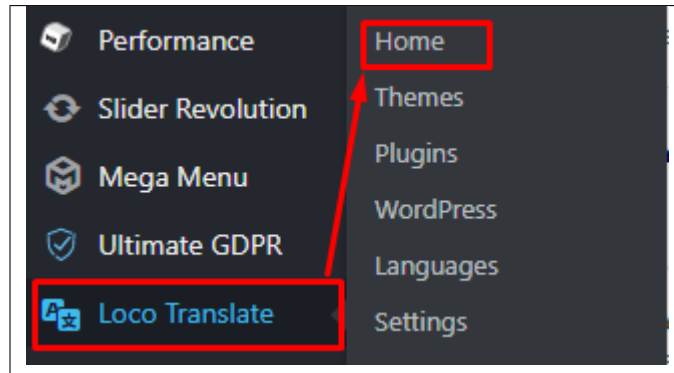

## 5.5 Translating using Loco Translate

Loco Translate is a free plugin for translation, which you can download [here](#).

Loco Translate will use the PO and MO file to translate the plugin.

To translate using Loco Translate Plugin, install and activate the plugin.

Click **Home** to view all the translatable plugins and themes.

Choose **Ultimate GDPR & CCPA** under Bundle name then you will be redirected to a page with all the available translations. You can create or edit a translation.

**Active theme:**

Bundle name	Text domain	Last modified	Sets
<a href="#">Estado Theme</a>	estado-theme	May 24, 2018 7:45 am	1

[See all themes »](#)

**Running plugins:**

These plugins have recently loaded translation files into the admin area:

Click on a word/phrase that you would like to translate and add the translation below the *Source Text* under *Language Translation*.

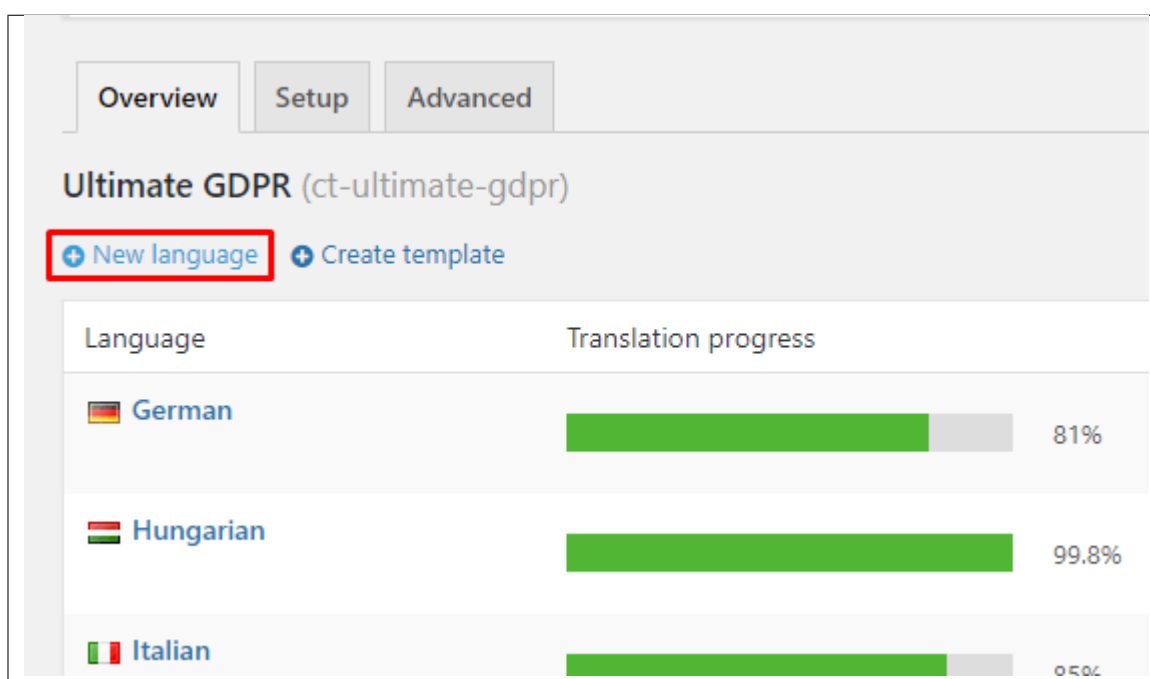

You will see a star icon indication beside the translated word/phrase that you have added/edited the translation.

Once you are done adding/editing the words/phrases in the translation, click on the the **Save** button to save the file.

## 5.5.2 Create New Translation

To create a new translation, you click on the **New Language** link below the Ultimate GDPR & CCPA word.

You will be redirected to an option for the template of the PO file. You can opt to *Create Template* or *Skip template*. Creating a template will make this the default template for all your translations of Ultimate GDPR & CCPA in Loco Translate.

**Note:** The created template will be updated by clicking the **Edit template** link beside new language and click on the **Sync** button. If there is a new/updated version of the template, this will sync with the template that is in the plugin folder.

Creating a new translation, you will be redirected to *Initializing new translations in "ct-ultimate-gdpr"* where you can choose what language you would like to make a translation and choose a location where you would like to save the file made.

**Initializing new translations in "ct-ultimate-gdpr"**

## COMPATIBLE PLUGINS

### 6.1 Compatible with GDPR & CCPA

#### 6.1.1 Unintegrated Plugins

Plugins that are not integrated with Ultimate GDPR & CCPA may not function as expected or may create a conflict.

We do strive to integrate plugins that our users use. We're constantly add new features, assuring compatibility with major plugins ang themes.

#### 6.1.2 Integrated Plugins

Plugins that are integrated have full compatibility with Ultimate GDPR & CCPA.

The following plugins are officially integrated:

- **Advanced Custom Fields**
- **bbPress**
- **BeaverBuilder**
- **BuddyPress plugin**
- **Caldera Forms**
- **CleanTalk Plugin**
- **Contact Form7**
- **Disqus Conditional Load**
- **Facebook Pixel**
- **Flamingo Plugin**
- **Flatsome UX Builder**
- **Formidable Forms**
- **GA Google Analytics**
- **Google AdSense**
- **Google Ads**
- **Google Analytics**
- **Gravity Forms**

- **Klaviyo**
- **LiteSpeed Cache**
- **MailPoet Newsletters plugin**
- **Mailchimp for WordPress**
- **Mailster - Email Newsletter Pluign**
- **Metorik Helper**
- **Ninja Forms**
- **PixelYourSite Pro**
- **Polylang**
- **Quform WordPress Builder Plugin**
- **W3 Total Cache**
- **WP Fastest Cache**
- **WP Job Manager**
- **WP Rocket**
- **WP SUPER CACHE**
- **WPBakery Page Builder for WordPress**
- **WPML - The WordPress Multilingual Plugin**
- **WordPress Simple PayPal Shopping Cart**
- **Wordfence Security**
- **wpForo**
- **Yoast SEO**

There are thousands of plugins for WordPress, we can't possibly include all the compatible ones in this list.

Don't worry if you are using plugins not listed above. With our 30-day money back guarantee, you can try the plugin risk-free and get a full refund if it doesn't work with something else on your site.

## SHORTCODES

### 7.1 Plugin Shortcodes

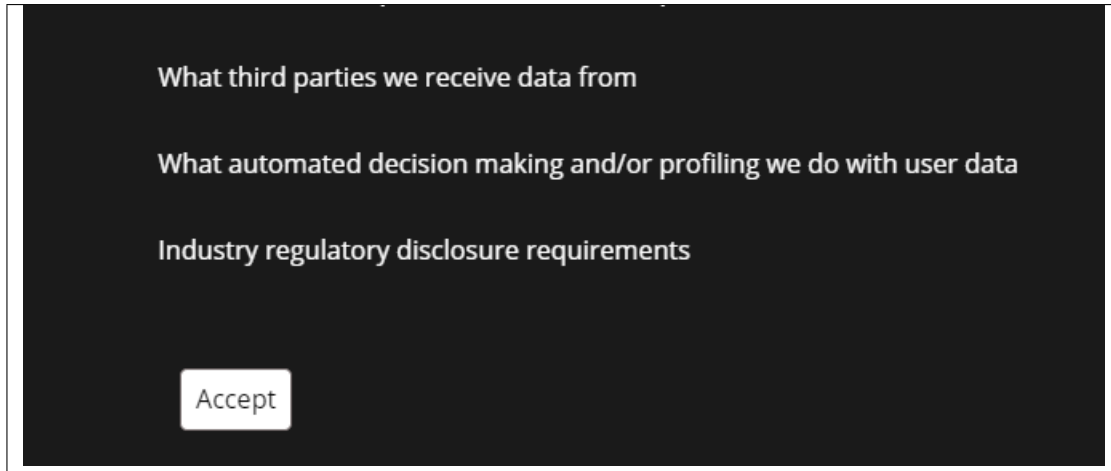

#### 7.1.1 [ultimate\_gdpr\_myaccount]

This shortcode will let you display Age Verification, Personal Data Access, Right to be Forgotten, Data Rectification tabs and Unsubscribe.

The screenshot displays a user interface for the [ultimate\_gdpr\_myaccount] plugin. At the top, there are five tabs: 'AGE VERIFICATION', 'PERSONAL DATA ACCESS' (which is selected and highlighted with a blue underline), 'FORGET ME', 'DATA RECTIFICATION', and 'UNSUBSCRIBE'. Below the tabs, a text box contains the message: 'Below, you can request for your personal data that's collected by this website sent to you in an email.' Underneath this message is a label 'Email:' followed by a large, empty text input field. Below the input field is a checkbox with the text: 'I consent to have my email collected in order to receive my requested data. See [Privacy Policy](#) page for more information.' At the bottom of the form is a blue button labeled 'SUBMIT'.

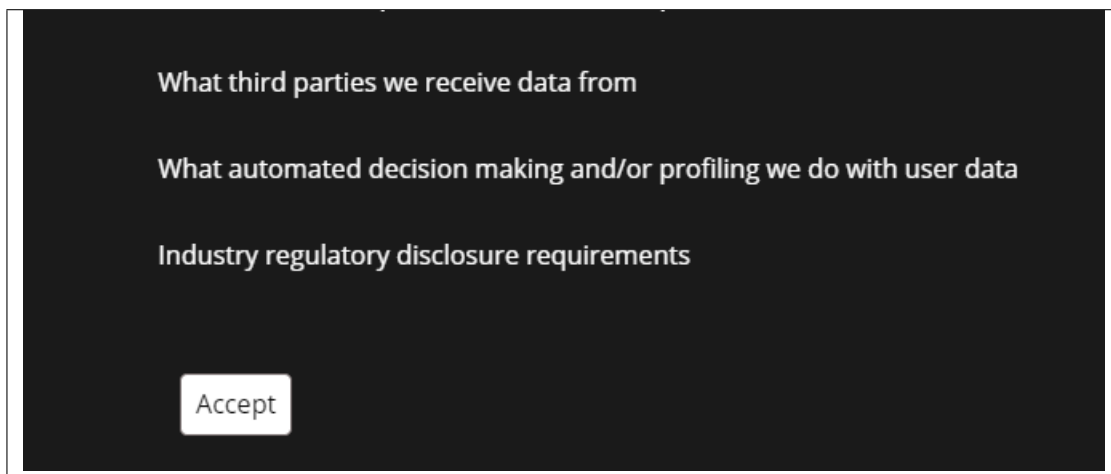

### 7.1.2 [ultimate\_gdpr\_terms\_accept]

This shortcode will let you add a button to accept the Terms and Conditions that is in the page. The options for this shortcode could be changed in **Ultimate GDPR & CCPA > Terms and Conditions**.

### 7.1.3 [ultimate\_gdpr\_policy\_accept]

This shortcode will let you add a button to accept the Privacy Policy that is in the page. The options for this shortcode could be changed in **Ultimate GDPR & CCPA > Privacy Policy**.

### 7.1.4 [render\_cookies\_list]

This shortcode will let you show the cookies that are saved in Services Manager.

Cookie names	Type of cookie	First or Third party	Can be blocked	Session or Persistent	Expiry Time	Purpose
__utma, __utmb, __utmc, __utmt, __utmz, _ga, _gat, _gid	Analytik	Third party	✓	Persistent		
act, wd, xs, datr, sb, presence, c_user, fr, pl, reg_ext_ref, reg_fb_gate, reg_fb_ref	Werbung	Third party	✓	Persistent		
km_ai, km_lv, km_vs, __atuvs, __atuvc, uvc	Funktionalität	Third party	✓	Persistent		

You can also display the each cookie in a separate row by adding the parameter: **display\_single\_cookies=true**

Sample for the shortcode w/ parameter:

## Cookie List

Permalink: <https://www.createit.pl/gdpr/cookie-list/> Edit

pl	Advertising	Third party	✓	Persistent		
reg_ext_ref	Advertising	Third party	✓	Persistent		

### 7.1.5 [ultimate\_gdpr\_cookie\_popup]

This shortcode will let you create a link for the Advance cookie settings. You can add it any where on your site.

## INTRODUCTION

Lorem ipsum dolor sit amet, consectetur adipisicing elit. Proin nibh augue, suscipit a, scelerisque sed, lacinia in, mi. Cras vel lorem. Etiam pellentesque aliquet tellus. Phasellus pharetra nulla ac diam. Quisque semper justo at risus. Donec venenatis, turpis vel hendrerit interdum, dui ligula ultricies purus, sed posuere libero dui id orci. Nam congue, pede vitae dapibus aliquet, elit magna vulputate arcu, vel tempus metus leo non est. Etiam sit amet lectus quis est congue mollis. Phasellus congue lacus eget neque. Phasellus ornare, ante vitae consectetur consequat, purus sapien ultricies dolor, et mollis pede metus eget nisi. Praesent sodales velit quis augue. Cras suscipit, urna at aliquam rhoncus, urna quam viverra nisi, in interdum massa nibh nec erat.

COOKIE CONSENT LINK

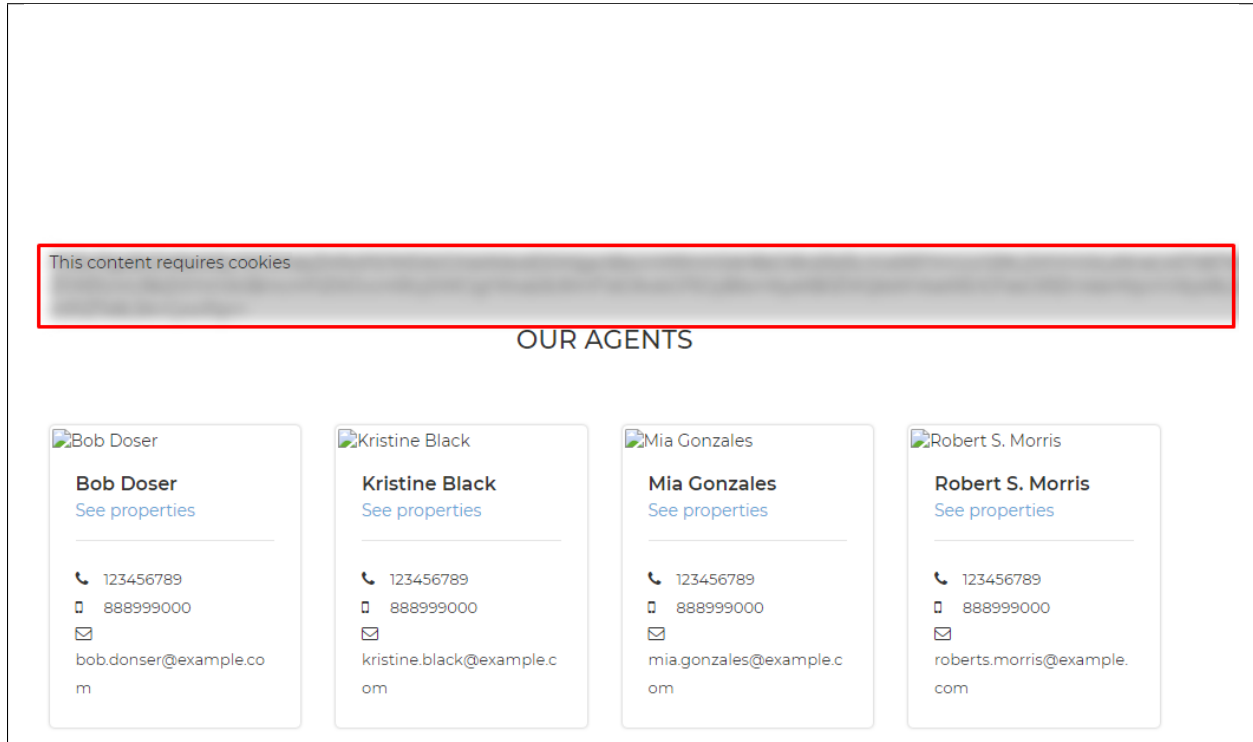

## GENERAL TERMS

Lorem ipsum dolor sit amet, consectetur adipisicing elit. Proin nibh augue, suscipit a, scelerisque sed, lacinia in, mi. Cras vel lorem. Etiam pellentesque aliquet tellus. Phasellus pharetra nulla ac diam. Quisque semper justo at risus. Donec venenatis, turpis vel hendrerit interdum, dui ligula ultricies purus, sed posuere libero dui id orci.

Nam congue, pede vitae dapibus aliquet, elit magna vulputate arcu, vel tempus metus leo non est. Etiam sit amet lectus quis est congue mollis. Phasellus congue lacus eget neque. Phasellus ornare, ante vitae consectetur consequat, purus sapien ultricies dolor, et mollis pede metus eget nisi. Praesent sodales velit quis augue. Cras suscipit, urna at aliquam rhoncus, urna quam viverra nisi, in interdum massa nibh nec erat.

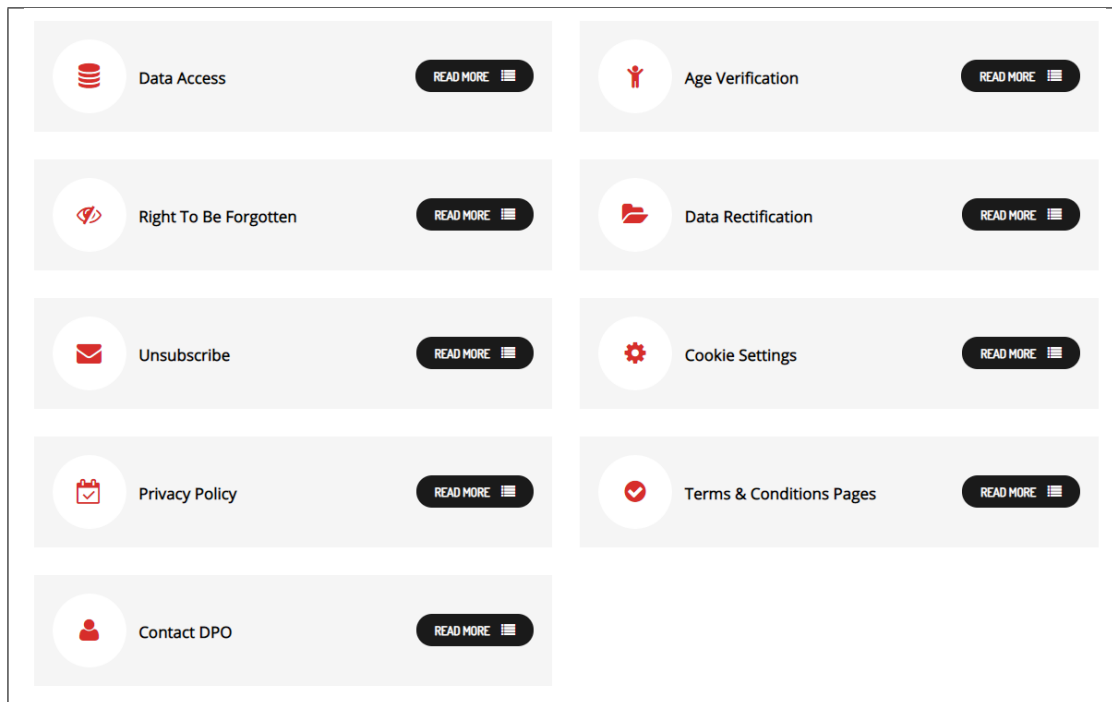

### 7.1.6 [ultimate\_gdpr\_protection level=(1 to 4)]

This shortcode will hide any content in the shortcode unless the cookie group chosen by the user of the site will meet the requirements of the shortcode.

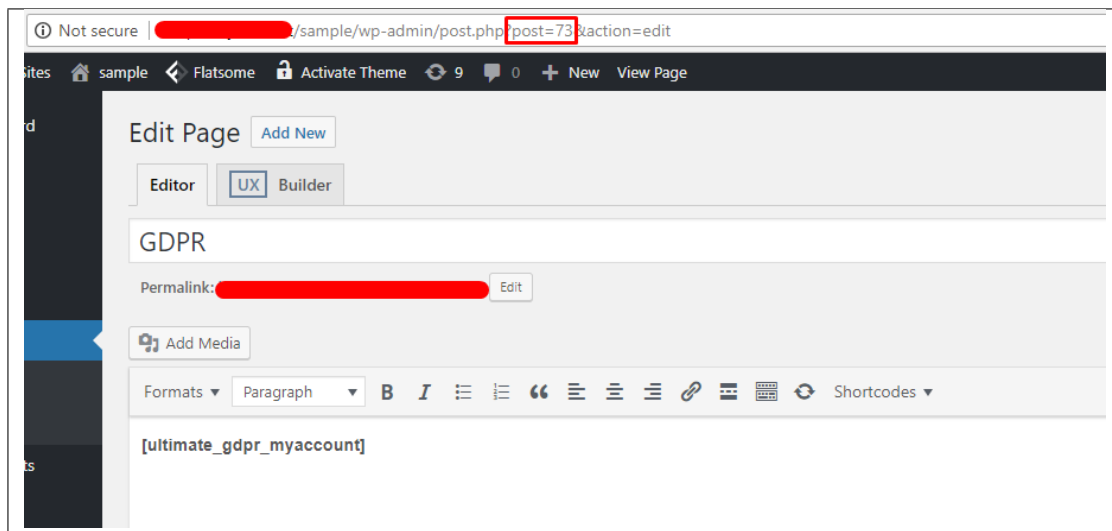

### 7.1.7 [ultimate\_gdpr\_center myaccount\_page=# contact\_page=# icon\_color=#]

This shortcode will create a page that have the Privacy tools in the site.

To get the # in **myaccount\_page=#** in the shortcode, go to the page where you have added the [ultimate\_gdpr\_myaccount] shortcode.

You use the post number of the page in the address bar of the page.

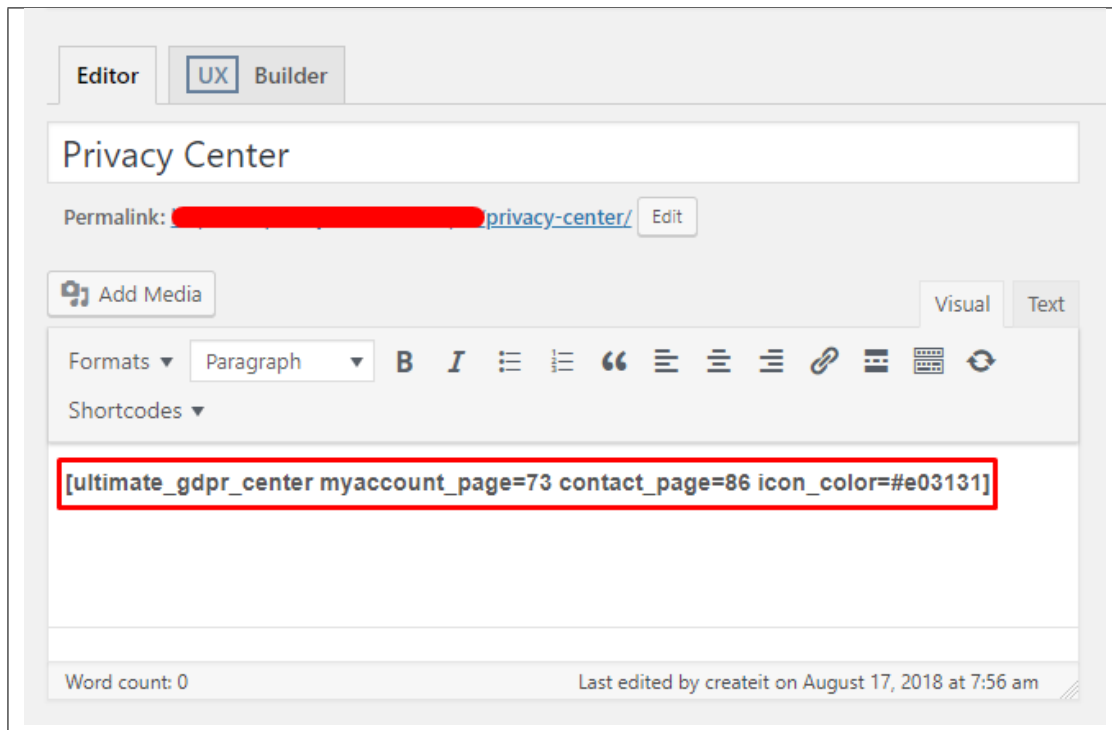

To get the # in **contact\_page=#** in the shortcode, go to the page where you added the contact forms.

Same as the myaccount\_page, you use the post number of the page in the address bar of the page.

For the **icon\_color=#**, add the color code that you would like to use.

**Sample of the shortcode:**

## 8.1 Plugin

### 8.1.1 Why are some plugins are not compatible with GDPR & CCPA plugin?

There are thousands of plugins that are available for Wordpress, one or more plugins have a chance to conflict with Ultimate GDPR & CCPA.

To know how to troubleshoot plugin conflicts, read this part of the documentation:

- [Incompatible with Plugins](#)

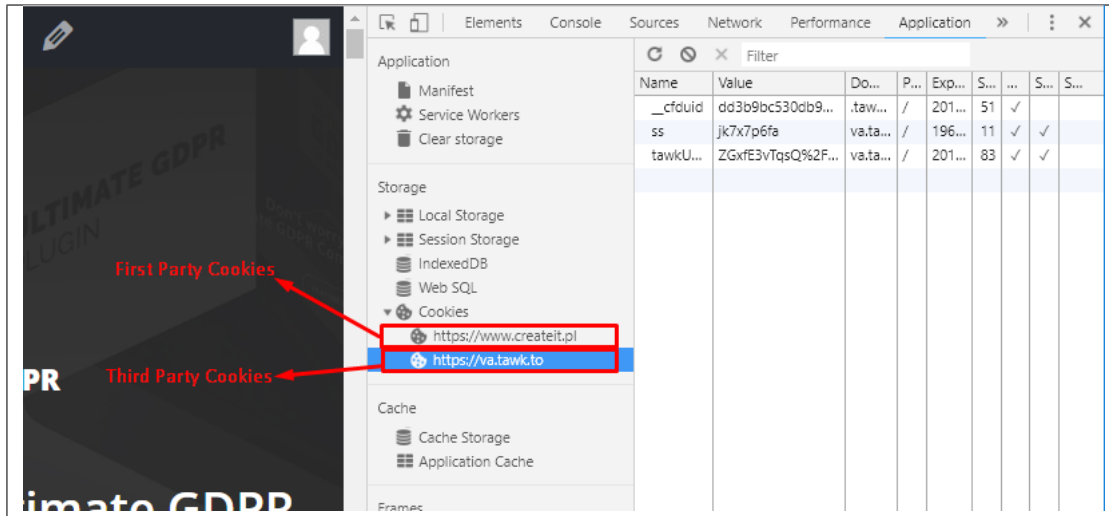

## 8.2 3rd Party Cookies

### 8.2.1 What are third-party cookies?

In “third-party cookie”, the word “party” refers to the domain as specified in the cookie; the website that is placing the cookie.

So, for example, if you visit *example.com* and the domain of the cookie placed on your computer is *example.com*, then this is a first-party cookie.

If, however, you visit *example.com* and the cookie placed on your computer says *some-other-site.com*, then there are third-party cookies generated.

## 8.3 Blocking Cookies

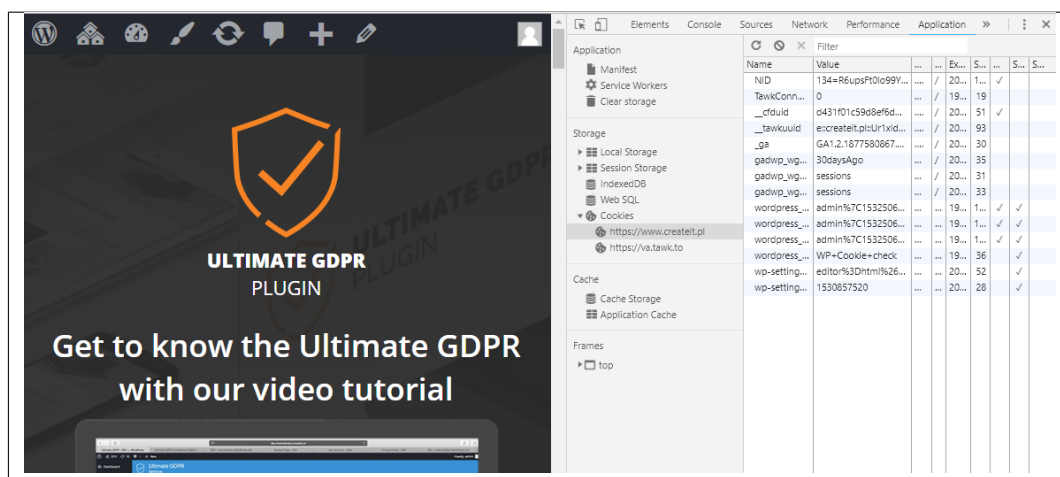

### 8.3.1 Why are some cookies not Blocked?

These are some of the reasons why this happens:

- User have visited the site before the plugin was activated.

We don't want to block all the cookies since the user already interacted with the site.

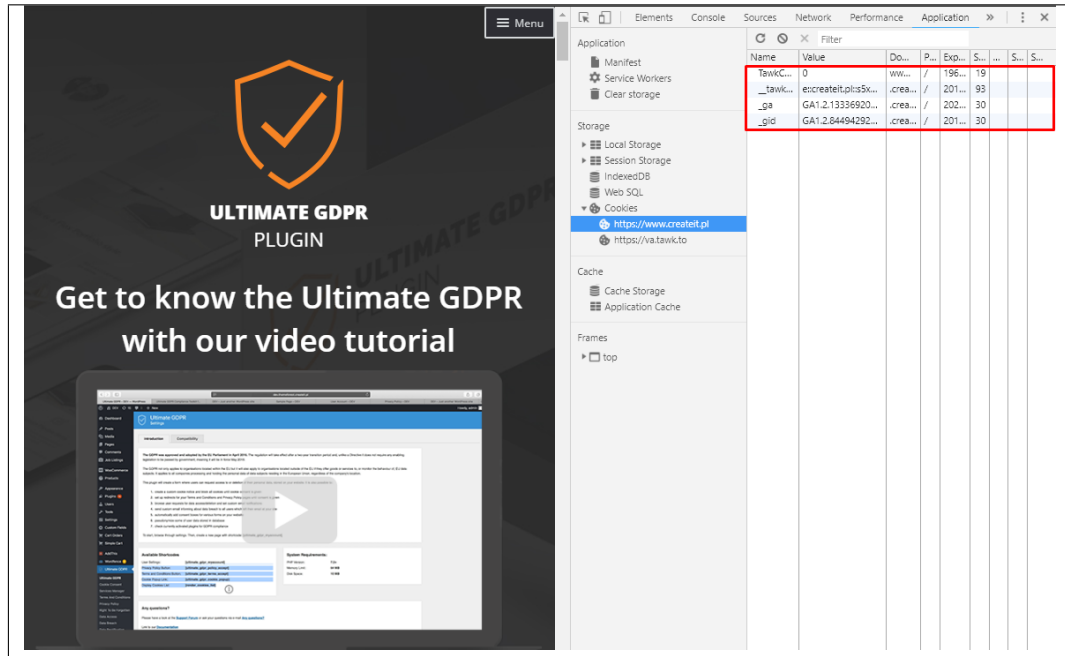

These cookies are saved in the users computer and could be removed by clearing the computer's cache history.

- Cookie is essential for the site to work. (example: PHP session)

These are cookies that are needed for your site to work properly. These cookies are usually added in the cookie whitelist.

To know more about Cookie Whitelist, read this part of the [documentation](#).

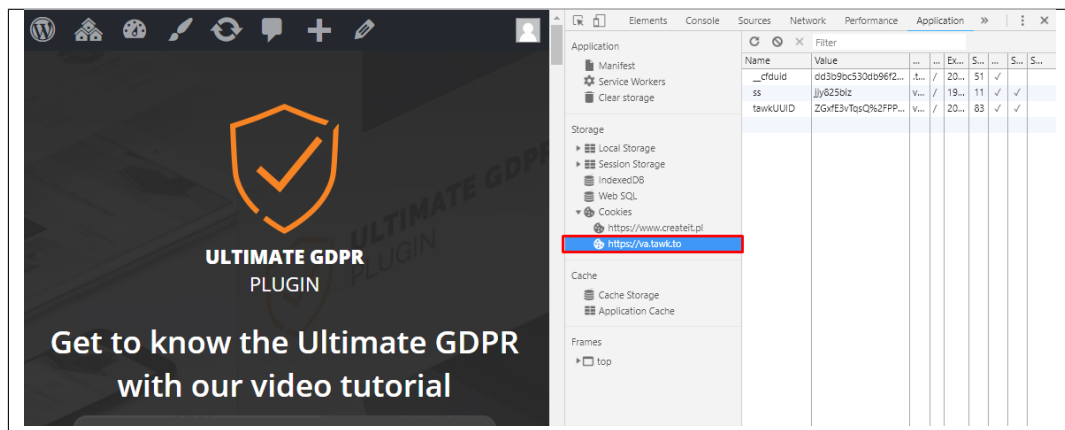

- The cookie is a “third party” type.

Opposite to a “first party” cookie, a “third party” cookie couldn’t be block using standard program-matical methods.

The only way to do it is to prevent the script that is adding the cookie from initializing.

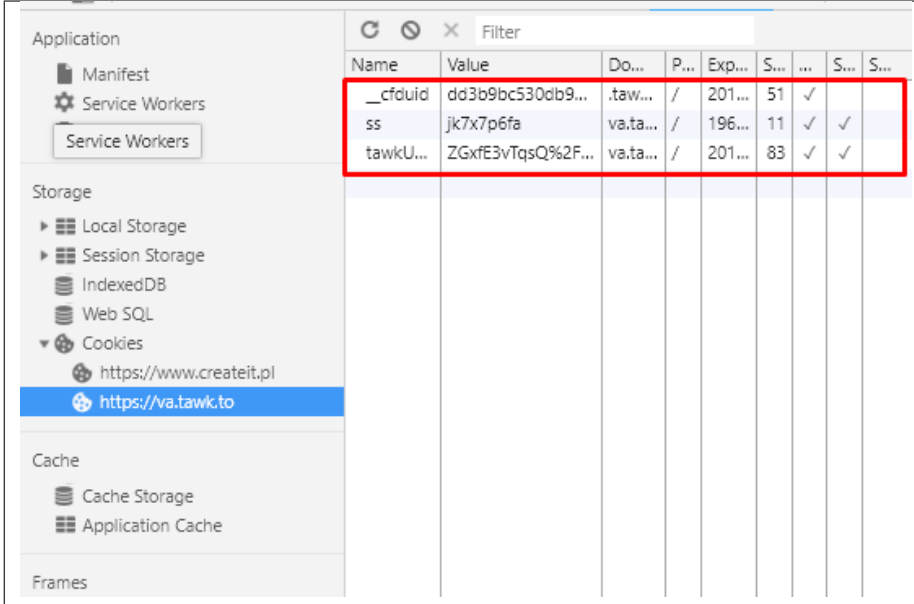

We’re trying to find ways to do so, but there are some rare occasions that it isn’t possible/difficult to block such scripts.

You can read more information about third party cookies [here](#).

- The cookies are created by other plugins that are not integrated with Ultimate GDPR & CCPA.

Cookies that are generated by the active plugins in the site.

Name	Value	Do...	P...	Exp...	S...	...	S...	S...
__cfduid	dd3b9bc530db9...	.taw...	/	201...	51	✓		
ss	jk7x7p6fa	va.ta...	/	196...	11	✓	✓	
tawkU...	ZGxfE3vTqsQ%2F...	va.ta...	/	201...	83	✓	✓	

### 8.3.2 Why is the Cookie Consent always visible even after consent is given?

Some factors may affect the cookie consents even after consent is already accepted.

These are some of the factors:

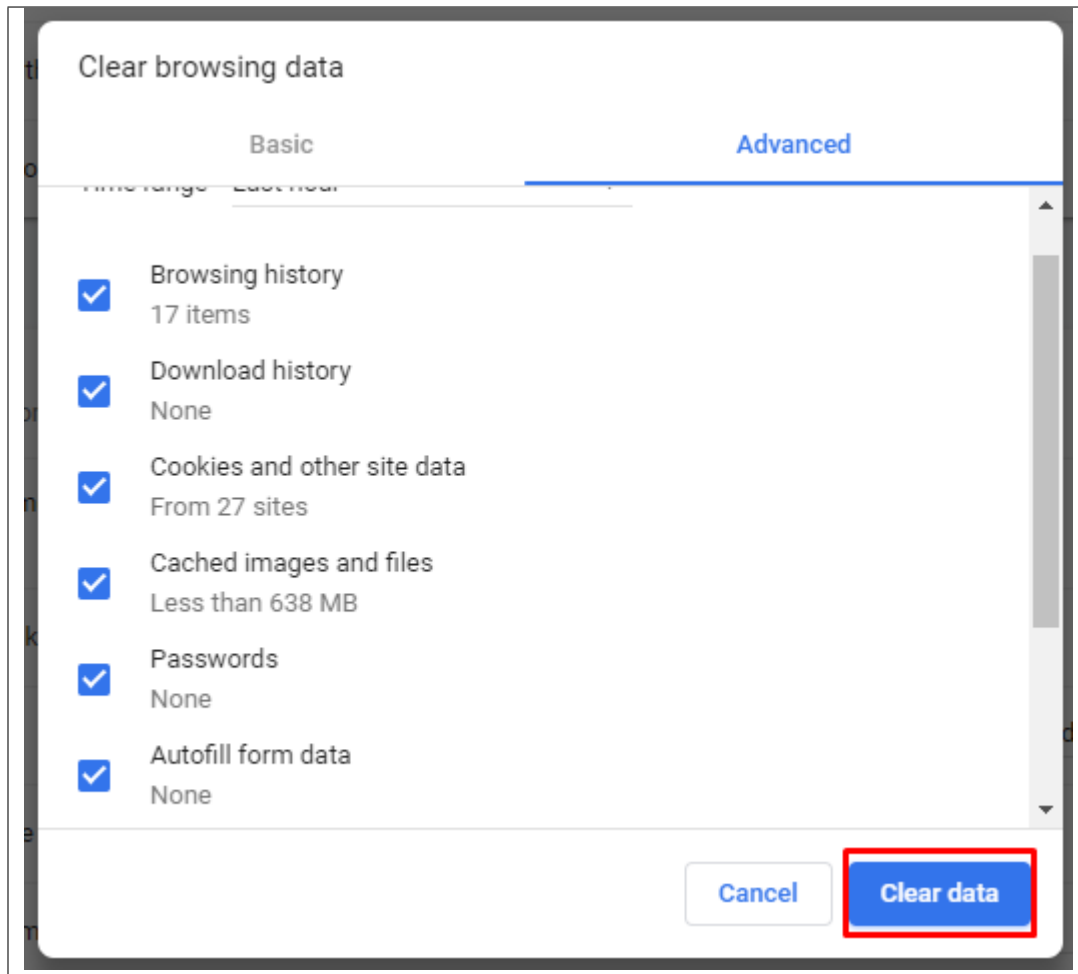

- Due to caching plugin/caching module enabled in the server.
- Server PHP version
- Javascript error on the site

For more details, read this part of the [documentation](#)

### 8.3.3 How to remove cookies that are generated before plugin is installed?

It's not always possible to remove existing cookies. For example “third-party” cookies cannot be removed programmatically. The only way to “block” them is to prevent them from creating.

Users can also remove them manually, by going to the browser settings and clear cookies there (users can also use CTRL + Shift + Delete shortcut to open the browser settings for clear cookies).

## 8.4 Cookie Groups

### 8.4.1 Why is the Cookies Groups incremental?

The Cookie Groups for Ultimate GDPR & CCPA are cookie levels, where you would need to pass level 1 to get to level 2. This will allow tracking of only the necessary cookies or possible cookies.

You can customize the cookie groups as you see fit. You can disable, rename, add/remove cookies, etc., the cookie group of your choice.

Read these parts of the documentation for:

- [Cookie Groups](#)

## 8.5 Cookie Scanner

### 8.5.1 Why is it that No Cookies are Found when using Cookie Scanner?

There are few reasons why the scanner might not working on the website. Please make sure that:

- The website the Cookie Scanner is used on is publicly accessible, otherwise, the scanner can't access the website.
- From *version 2.0.0* of the plugin, the Cookie Scanner feature won't work until license code won't be added in the correct field of the plugin.

### 8.5.2 Why is it that Not All Cookies are Found on my site?

The Cookie scanner is mimicking the site's user, which is surfing the website.

What the user is doing, accessing, or loading in the site will affect the amount of cookies that are in the site.

In these rare situations, cookie scanner cannot detect the cookie, for example:

- A particular cookie is added not on page load, but later.
- A particular cookie is added after user somehow interact with the site (clicking on the link, submitting the form, etc).

To learn more about **how to block cookies**, read this part of the [documentation](#).

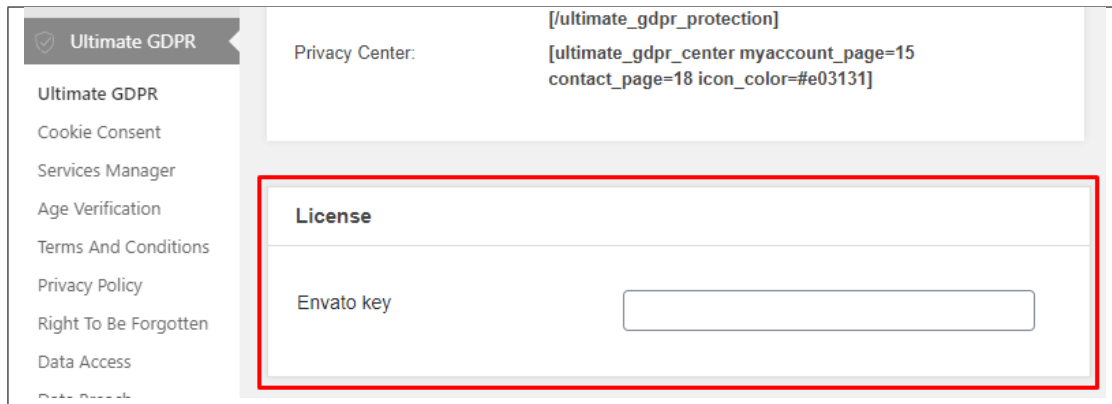

### 8.5.3 Why plugin is asking for my license code?

From *version 2.0.0* of the plugin, the Cookie Scanner functionality won't be available until a valid Envato license key will be provided.

To be allowed to use the Cookie Scanner, please go from the WordPress dashboard to **Ultimate GDPR & CCPA > License** or click the link available in the dashboard message.

There you will find a field in which you need to enter your license key.

Don't know where to find your license key? Please follow the instruction under this [link](#).

## 8.6 Google Analytics Stats

### 8.6.1 What if I have a Cookie Scanner Issue?

Our cookie scanner is using parameters to access the site and find the lists of cookies that site are using.

To prevent Google Analytics from counting stats for **?ctpass=1** requests, just use **Google Analytics IP address filter**

To know how to create an IP address filter, click [here](#).

### 8.6.2 How to use Google Tag Manager?

Using the Google Tag Manager to manage your Google Analytics makes it faster and easier.

---

**Note:** Install Google Tag Manager first in your site so that it can monitor the sites activity.

---

In the Tag Manager, create the Tag for Google Analytics. You can use a pre-existing Google Analytics ID.

By using Google Tag Manager, you can customize how Google Analytics behave in your site.

For information on how to install and setup Google Tag Manager, click [here](#).

## 8.7 Other Issues

### 8.7.1 Why is the plugin slowing down the site?

Plugin includes experimental feature **Pseudonymization**. Which is encrypting user data in database, then on page load user data is decrypted.

This type of functionality can require some server resources. If you see higher load on server, we recommend to disable Pseudonymization.

## 8.8 Google Consent Mode v2

Our WordPress plugin now supports “Google Consent Mode v2.” This feature allows you to set up the plugin to inform Google’s gtag.js or GTM about the choices your users make regarding cookies and tracking on your site.

---

### Note:

**Note:** for 100% compliance - we are recommending to use **TCF Modal** with **Consent Mode** enabled.

More info: [here](#)

---

### 8.8.1 What is Google Consent Mode v2?

- Google Consent Mode v2 is a tool that helps communicate users’ consent choices from your website to Google. It’s crucial for websites using Google services like Analytics, Ads, and more, ensuring you comply with privacy laws.

### 8.8.2 Why it’s important

- **Compliance with privacy laws:** Using Consent Mode helps your website follow the GDPR by telling Google only to track users when they have given permission.
- **Necessary for websites using Google services:** If your site uses any Google services, you need Consent Mode to keep collecting important data legally. This is especially true for visitors from the European Economic Area (EEA) and the UK, no matter where your website is based.
- **Improves data accuracy and personalization:** With Consent Mode, Google can better track conversions and personalize without breaking privacy rules.
- **Enables conversion modeling:** Consent Mode activates a feature called “Conversion modeling.” This advanced tool allows your website to track more conversions by compensating for the absence of data when cookies are rejected.
- **Deadline to enable:** Advertisers should enable Consent Mode by March 2024 to keep their audience data accurate.

### 8.8.3 Why enable consent mode?

- Enabling consent mode is a step towards better GDPR compliance. It allows Google to continue providing valuable insights and personalization options based on user consent. This helps in keeping your analytics and ad performance reports complete and accurate.
- Our plugin’s compatibility with Google Consent Mode v2 makes it easier for your website to manage user consents effectively, ensuring you stay compliant with privacy regulations while maintaining access to critical data and features provided by Google.

### 8.8.4 How to turn on Google Consent Mode v2?

- **Step 1** - Go to **Ultimate GDPR & CCPA > Cookie Consent > Cookie popup tab**.
- **Step 2** - Find the **Google Analytics 4** section. Here, enter your Google Analytics ID (GA4 ID) or Google Tag Manager ID (GTM ID).
- **Step 3** - Look for the option named **Google Consent Mode v2** and switch it to Enabled.
- **Step 4** - You're all set! The tracking code (either GA4 or GTM) will now be added to your website's header, and the user's choices will be sent to Google through Consent Mode.

### 8.8.5 What happens before users choose?

Before a user makes a choice, we send Google default consent values to ensure compliance.:

```
gtag("consent", "default", {
  ad_personalization: "denied",
  ad_storage: "denied",
  ad_user_data: "denied",
  analytics_storage: "denied",
  functionality_storage: "denied",
  personalization_storage: "denied",
  security_storage: "granted"
});
```

### 8.8.6 Testing your setup

To make sure everything is working as it should, you can use these tools:

- **Google Tag Assistant**: A tool to help check if the consent signals are being correctly sent: <https://developers.google.com/tag-platform/security/guides/consent-debugging>
- **Chrome Addon 'Analytics Debugger'**: Use this Chrome extension to debug and verify analytics data: <https://chromewebstore.google.com/detail/analytics-debugger/ilnpmccnfdjjikgkefkcegefikecdc>

### 8.8.7 Customizing consent mode

**Note:** This section is for those familiar with WordPress development. Changing these settings can affect how the plugin works, so please be careful. You can adjust Consent Mode's functionality by adding custom code to your theme or a custom plugin.

- Changing the GA4 or GTM code that gets added to the page header:

```
// functions.php
add_filter('ct_ultimate_gdpr_service_ga4_head_snippet', 'custom_modify_head_snippet1', 1,
    ↪ 2);
function custom_modify_head_snippet1($html, $id) {
    $new_snippet = "<!-- Custom Snippet Here -->";
    return $new_snippet . $html; // Prepend, append, or replace based on needs
}

add_filter('ct_ultimate_gdpr_service_gtm_head_snippet', 'custom_modify_head_snippet2', 1,
    ↪ 2);
```

(continues on next page)

(continued from previous page)

```
function custom_modify_head_snippet2($html, $id) {  
    $new_snippet = "<!-- Custom Snippet Here -->";  
    return $new_snippet . $html; // Prepend, append, or replace based on needs  
}
```

- Adjusting how user choices are translated into Google consent mode parameters and how data is sent using gtag:

```
// custom.js  
(function ($) {  
    $(document).off("consentUpdated.ctUltimateGdpr");  
    $(document).on("consentUpdated.ctUltimateGdpr", function(event, level, level_ids) {  
        // original logic: \ct-ultimate-gdpr\assets\js\consent-mode.js  
        // apply your logic here  
  
        let consent = {};  
        console.log(level);  
        console.log(level_ids);  
    });  
})(jQuery);
```

## THE TRANSPARENCY & CONSENT FRAMEWORK (TCF)

### 9.1 Ultimate GDPR & CCPA Compliance Toolkit: A Certified Consent Management Platform

A Consent Management Platform (CMP) is a software or solution provider that develops notices (e.g. cookie banners) to inform users and capture their preferences with respect to the processing of their personal data. Every CMP needs to obtain a TCF (Transparency and Consent Framework) certificate that sets standards on how this information and additional choices should be provided to users.

List of certified CMPs can found here: <https://iabeurope.eu/cmp-list/>

To view additional details about the TCF 2.2 policy, click on this link: [TCF Policy](#)

---

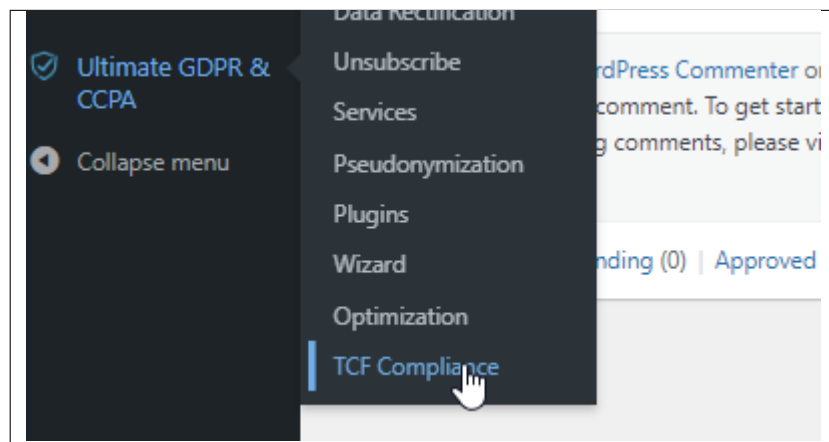

**Note:**

**Note:** We're proud to announce that our plugin is officially recognized by IAB Europe as a Consent Management Platform (CMP), with a TCF CMP ID: 408.

---

### 9.2 How to Enable TCF 2.2 Settings

- Navigate to Ultimate GDPR & CCPA panel > choose **Ad Choices**

- Click **Enabled** button and **Save Changes**.

### TCF Compliance

Activate the TCF 2.2 compliant Ad Choices modal. This allows users to select their advertising preferences and view a comprehensive list of all advertising partners. Enabling this ensures better transparency and compliance with the latest data protection guidelines.

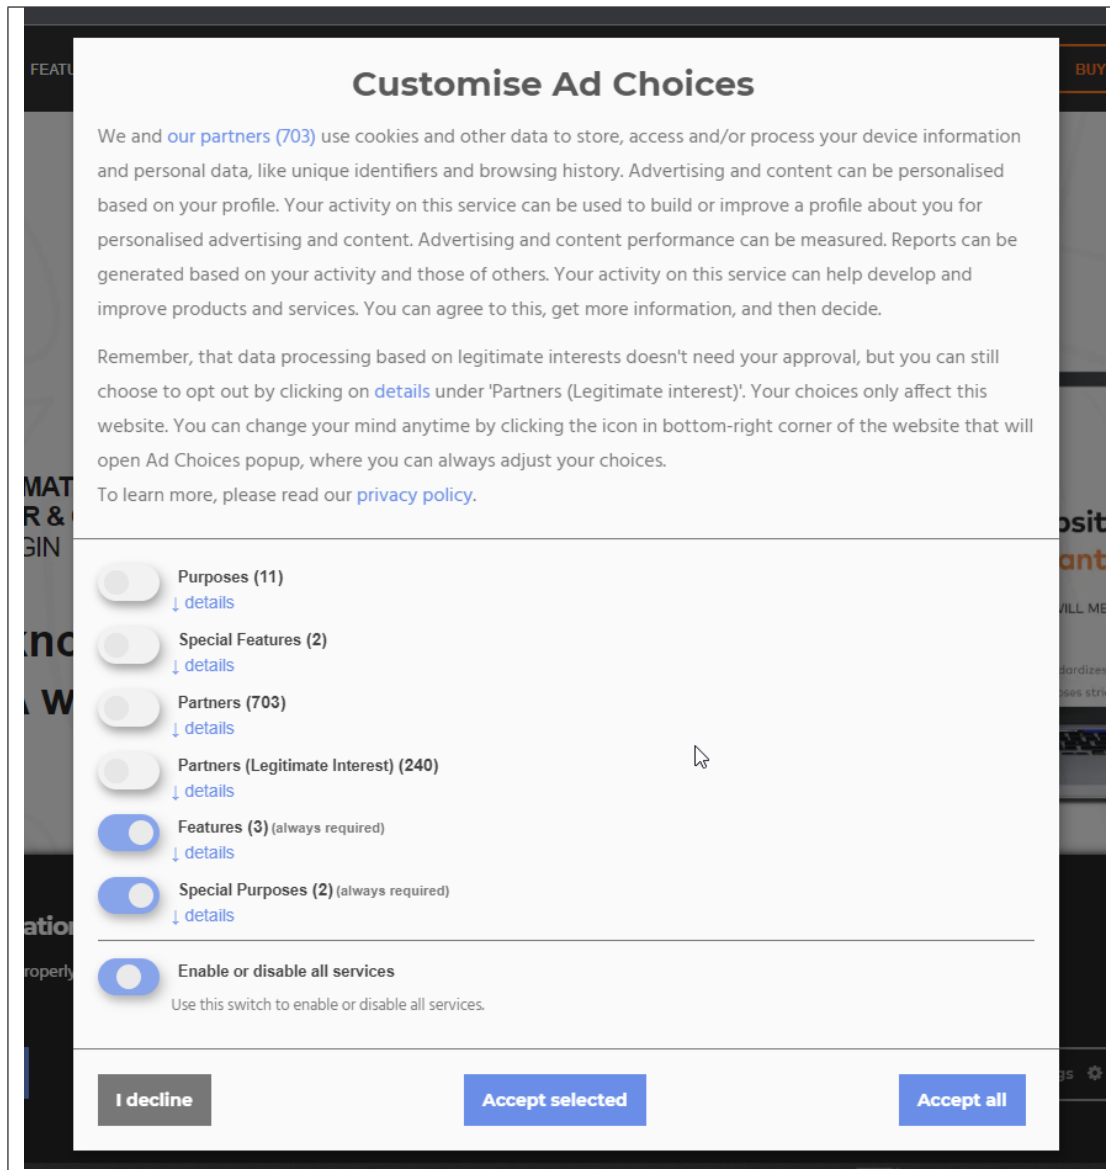

Enable TCF 2.2 Integration

Enabled

Disable

Save Changes

This is the new pop-up that will appear when TCF 2.2 is enabled. Customize Ad Choices pop-up box.

## 9.3 Google Consent Mode v2

Our TCF 2.2 compliant modal supports **Google Consent Mode**. If option is enabled plugin is transmitting user consent choices to GTM or gtag.js.

### Note:

**Note:** We're proud to say our plugin is certified by Google as a Consent Management Platform (CMP), with a TCF CMP ID: 408. This means we meet Google's standards for managing user consents properly.

### 9.3.1 How to enable Consent Mode for TCF banner?

- **Step 1** - Make sure that TCF mode is enabled ( **Ultimate GDPR & CCPA > TCF Compliance > Enable TCF 2.2 Integration** )
- **Step 2** - Go to **Ultimate GDPR & CCPA > TCF Compliance > Ad Choices > Vendor ID Filter** and make sure that ID **755** is added (Google Advertising Products)
- **Step 3** - Go to **Ultimate GDPR & CCPA > TCF Compliance > Custom HEAD code** and paste your **tracking code**. Example implementations - see below.
- **Step 4** - Go to **Ultimate GDPR & CCPA > TCF Compliance > Cookie Preferences** and enable **Google Consent Mode v2**

Example implementation for Google Tag Manager (GTM) tracking code:

---

**Note:**

**Note:** Make sure to replace GTM-XXXXXX with your GTM ID.

---

```
<script>
  window.dataLayer = window.dataLayer || [];
  function gtag() {
    dataLayer.push(arguments);
  }
  if(localStorage.getItem('consentMode') === null) {
    gtag("consent", "default", {
      ad_personalization: "denied",
      ad_storage: "denied",
      ad_user_data: "denied",
      analytics_storage: "denied",
      functionality_storage: "denied",
      personalization_storage: "denied",
      security_storage: "granted"
    });
  } else {
    gtag('consent', 'default', JSON.parse(localStorage.getItem('consentMode')));
  }
</script>
<!-- Google Tag Manager -->
<script>(function(w,d,s,l,i){w[l]=w[l]||[];w[l].push({'gtm.start':
  new Date().getTime(),event:'gtm.js'});var f=d.getElementsByTagName(s)[0],
  j=d.createElement(s),dl=l!='dataLayer'?'&l='+l:'';j.async=true;j.src=
  'https://www.googletagmanager.com/gtm.js?id='+i+dl;f.parentNode.insertBefore(j,f);
})(window,document,'script','dataLayer','GTM-XXXXXX');</script>
<!-- End Google Tag Manager -->
```

Example implementation for Google Analytics 4 (GA4) tracking code:

---

**Note:**

**Note:** Make sure to replace G-XXXXXXXX with your GA4 ID.

---

```

<script>
  window.dataLayer = window.dataLayer || [];
  function gtag() {
    dataLayer.push(arguments);
  }
  if(localStorage.getItem('consentMode') === null) {
    gtag("consent", "default", {
      ad_personalization: "denied",
      ad_storage: "denied",
      ad_user_data: "denied",
      analytics_storage: "denied",
      functionality_storage: "denied",
      personalization_storage: "denied",
      security_storage: "granted"
    });
  } else {
    gtag('consent', 'default', JSON.parse(localStorage.getItem('consentMode')));
  }
</script>
<!-- Google tag (gtag.js) -->
<script async src="https://www.googletagmanager.com/gtag/js?id=G-XXXXXXX"></script>
<script>
window.dataLayer = window.dataLayer || [];
function gtag(){dataLayer.push(arguments);}
gtag('js', new Date());

gtag('config', 'G-XXXXXXX');
</script>

```

### 9.3.2 GTM Configuration overview

This section provides an overview of how Google Tag Manager (GTM) manages consent mode. For in-depth guidance, consider consulting a GTM/SEO expert.

#### Advanced Implementation vs. Basic Implementation of Consent Mode

Consent mode enables your site to communicate users' consent status. It works to dynamically adapt the behavior of Analytics, Ads, and third-party tags based on user consent.

**Basic Implementation** primarily involves waiting to load Google tags until after users have provided their consent. This straightforward approach can lead to significant data gaps, as **no tracking occurs until consent is granted**. While basic implementation allows for some level of conversion modeling, it lacks the depth of insights provided by behavioral modeling, which is crucial for understanding user behavior comprehensively.

Tag Behavior	Behavioral Modeling in GA4	Conversion Modeling
Google tags are loaded after obtaining user consent.	Not available, leading to gaps in understanding user behavior.	Limited, with general models based on non-specific variables.

**Advanced Implementation**, conversely, maximizes the potential of consent mode. By loading Google tags before the consent dialog appears and utilizing **cookieless pings for users who decline consent**, it enables the full suite

of modeling tools in GA4. Behavioral modeling uses machine learning to fill data gaps, offering insights into user behavior, acquisition sources, and conversion paths, even without full user identifiers.

Tag Behavior	Behavioral Modeling in GA4	Conversion Modeling
Preemptive tag loading with cookieless data collection for declined consent.	Enabled, providing insights based on modeled data like daily active users, conversion rates, and more, across different demographics and device types.	Enhanced, offering detailed analysis and optimization capabilities.

---

**Hint:**

**More info:** <https://support.google.com/analytics/answer/9976101>

---

### Understanding Behavioral Modeling Visibility and Criteria

Google utilizes Behavioral Modeling to mitigate the impact of missing data when users decline consent. However, for Behavioral Modeling to be employed and for its insights to be visible in your GA4 reports, certain criteria and thresholds must be met:

- **Consent Mode Activation:** Consent mode must be enabled across all site pages.
- **Advanced Implementation:** Tags must load before the consent dialog is displayed, allowing for cookieless data collection from users who decline consent.
- **Data Volume Requirements:** A minimum of **1,000 events per day** with *analytics\_storage='denied'* for at least **7 days**. And at least **1,000 daily users** sending events with *analytics\_storage='granted'* for at least **7 of the previous 28 days**.

These thresholds ensure there's sufficient data for Google's machine learning models to accurately estimate user behavior based on observed consented interactions.

---

**Hint:**

**More info:** <https://support.google.com/analytics/answer/11161109>

---

### Enabling Basic or Advanced Consent Mode

Consent Mode in Google Tag Manager (GTM) allows you to adjust how user consent signals affect the firing of tags on your website, ensuring compliance with data privacy regulations. Depending on your compliance strategy, you may choose to implement either Basic or Advanced Consent Mode. Here's how to configure each mode:

**Basic Consent Mode** is about blocking Google tags until users grant consent. This approach sends only "consent granted" signals to Google, operating under the assumption that no data is collected from users who did not grant consent.

1. **Block Tags Without Consent:** Use GTM's consent settings to prevent tags from firing unless consent has been explicitly granted by the user. This means manually configuring your tags to check consent states before firing.
2. **Configure in GTM:**
  - In GTM, navigate to a tag's settings.

- Use **Additional consent checks** and set **Require additional consent for tag to fire** option to specify which consent states must be granted for the tag to fire. If any listed state is denied, the tag will not fire.

**Advanced Consent Mode** allows tags to load and send cookieless pings to Google when consent is not granted, enabling the use of behavioral and conversion modeling to fill data gaps.

1. **Configure Consent Signal Handling:** In GTM, ensure that tags are set to fire even when consent has not been fully granted, but configure them to respect consent signals for cookieless data collection.
2. **Configure in GTM:**
  - In GTM, navigate to a tag's settings.
  - **Additional consent checks:** May not be necessary for all tags, depending on whether you wish to collect basic interaction data without personal identifiers. For advanced implementation you might want to leave it empty.

---

**Hint:**

**More info:** <https://www.simoahava.com/analytics/consent-mode-v2-google-tags/>

---

## Cookies Management

Interested in using user **Cookie Preferences** to control scripts and cookies loading in the browser? Our TCF Modal, integrated with Google Tag Manager (GTM), offers a solution for managing cookies. This interactive demonstration showcases the dynamic control of tags based on user-selected consent:

- **Real-time script loading:** observe how the activation of GTM tags (Analytics, Marketing, Functional) is adjusted in response to user consents.
- **Consent-driven tag control:** discover how GTM tags adapt to consent changes with detailed logs

To explore the full capabilities of our consent implementation and understand how it can be adapted to include various other tags (e.g., Facebook Pixel, Google Analytics, and more), visit our [Cookies Management Demo](#) page.

---

**Hint:**

**Cookies Management Demo:** <https://www.createit.com/gdpr/tcf-gtm-demo/>

---

## Testing your setup

To make sure everything is working as it should, you can use these tools:

- **Google Tag Assistant:** A tool to help check if the consent signals are being correctly sent: <https://developers.google.com/tag-platform/security/guides/consent-debugging>
- **Chrome Addon 'Analytics Debugger':** Use this Chrome extension to debug and verify analytics data: <https://chromewebstore.google.com/detail/analytics-debugger/ilnpmcnfdjjikgkcfkcegfikecdc>

---

**Hint:**

**Note:** When Google Consent Mode (GCM v2) is correctly set up, it will communicate the choices made in the “Cookie Preferences” tab of the TCF modal to Google Services.

---

## 9.4 Translations

Our TCF modal already includes those translations:

- English
- Catalan
- Czech
- Danish
- German
- Greek
- Spanish
- Finnish
- French
- Galician
- Croatian
- Hungarian
- Italian
- Dutch
- Norwegian
- Polish
- Portuguese (Brazil)
- Romanian
- Russian
- Serbian (Cyrillic)
- Serbian (Latin)
- Swedish
- Turkish
- Chinese

---

### Hint:

**WPML Support:** Our plugin is compatible with the WPML plugin. It automatically detects the language and displays the appropriate modal for each language.

## Customizing translations

- You can change TCF modal texts on your website by using a WordPress filter. This lets you edit just one piece of text or all the phrases you see.
- Remember, some parts of the text, like the list of partners, their reasons, examples, and explanations, come straight from the Transparency & Consent Framework (TCF) v2.2 official website. We use these to make sure everything is correct and follows their rules.

**Note:** This section is for those familiar with WordPress development. Changing these settings can affect how the plugin works, so please be careful.

```
<?php

/**
 * functions.php
 * Overwrite translations when using TCF modal (Ultimate GDPR & CCPA plugin)
 * Add this snippet to your functions.php (theme) or use custom wordpress plugin
 * You can customize each translation that is displayed in TCF modal.
 * List of partners, purposes, examples, descriptions can't be customized (those are
↳ fetched from official site of The Transparency & Consent Framework (TCF) v2.2)
 */

function ct_tcf_custom_translations($translations) {

    /**
     * Overwrite all strings from main translations
     * List of available languages for TCF modal:
     * 'en' => 'English',
     * 'ca' => 'Catalan',
     * 'cs' => 'Czech',
     * 'da' => 'Danish',
     * 'de' => 'German',
     * 'el' => 'Greek',
     * 'es' => 'Spanish',
     * 'fi' => 'Finnish',
     * 'fr' => 'French',
     * 'gl' => 'Galician',
     * 'hr' => 'Croatian',
     * 'hu' => 'Hungarian',
     * 'it' => 'Italian',
     * 'nl' => 'Dutch',
     * 'no' => 'Norwegian',
     * 'pl' => 'Polish',
